

TEAM: Hotaf Alwadie, Faten Alwadie, Ohood
, Rawan , Lamia

HOW WILL WE MAKE MONEY?

Earn by Google AdSense: Subscribe to the Google AdSense system, where Google adds the ads that come to it. So that the content of these ads is similar to the private content, which we offer on the website that we have created, so Google sends a percentage of no less than 68% of the profits that it obtained as a result of publishing the advertising content, and Google gets the rest of the profits

Data and information collection and analysis: This is done by collecting, classifying, analyzing and selling user data about the site and their interests to advertisers, which is called targeted advertising.

VISION

Provide a deep and simple vision at the same time that attracts the interest of the user and serves him effectively and is subject to development and keeps pace with developments.

MESSAGE

Enabling artificial intelligence solutions
and employing them to make Saudi Arabia
the (Dream Vacation) for
everyone in the world
