

"BACK TO FREEDOM + DIGNITY"

I. Intro: (Sam Schechter recently): Prof. to class: my business - to historians yours - to listen. If you finish first, let me know...

- A. NY Times review B.F. Skinner's Beyond Freedom + Dignity - "if you're going to read only one book this year - this should be it."
- B. As at 4 months ago, shortly after publ. - sold 75,000 ex. (> FDR RR)
- C. Tonight - use SK as inverse answer to J. atta F, FW, then - BFD.

II. Free Will

A. FW as obvious, intuitive concept. A 1000 times every day...
YET - determinism: cause + effect ... (and so apparently \rightarrow DETERMINISM).

B. Historically - 3 forms Detm:

1. Ancient Greece - pre-Socratics (Thales, Pythagoras, Parmenides). Democritus: "Everything is Detm - what was, is, or will be"

2. Middle Ages - Theology-formulation - instead Nature - Airini formulation - or predestination: do we

3. Mod. Science. Back to nat'l Detm. Galileo, Newton.

Spinoza: if stone could speak... LAPLACE: comprehend...
Contemporary period - Detm > scienc; economic; historic; psychol...

C. J. atta's - response to a dilemma:

- One hand - FW = essence / truth: אָנֹכִי אֲמַת / אָנֹכִי יְדַעַת
- Other hand - q-a known all, poss predict so future no will...

\rightarrow $\text{אָנֹכִי יְדַעַת וְאַנְתָּךְ תֵּדַע}$ / $\text{אָנֹכִי יְדַעַת וְאַתָּה תֵּדַע}$

So which is it - FW or A.W. predestination?

(2)

D. i. Josephus: Essenes - Detr. Sadducees - FW.

Phar - פְּנִינָה פַּנְבִּיןָה סְנִינָה . So: more complex than Phar

2. Arot (acc. Phain): ○ קְרֵבָה כְּלָבָד כְּלָבָד
Is statement of PARADOX ...

3. Bkt Q - how resolve it rationally?

4. Problem - Ans, mult. Hist. if diff ans. ST: Arunk: "what
time is it?" - "All my long, same Q, difft answe!"

Yet - certain solutions perennial, reappear diff forms...

E. Saadia - YHL. Knowing ≠ Determinin'....

YHL: prob: knowing PAST... So - Q-A is knowing FUTURE.

F. Garrisonides (w. meditation) - פִּזְבָּחָה - purposeful & w. self-restraint,
renunciation, giving up FW. (creature man, free agent,
thus can act faithfully & A - can go either way; see For D. M. Talm)

G. Crescas - just no diff more to hum. F at depends q's known,
so Crescas - reversal. Sophistication: fr q's yr - DetN; fr mis yr - free.
Inniv. missions are true; from overall perspective fits into
predet. pattern. Ex: statistics on many, many counts.
OR - rational life.

H. Morenov. Sol'n (suggested Buber): both (FW/Det) true at
every step. Logically - impossibl; exist'n - true.

An'ostich - law excluds mate - either/or

Physics - not! Nature/light; no bridge-matter too...

Psychotherapy - transmutes, yet patient free

Han - (Rabbi JBS) - > fish & car; jis hsh zos hsh - oj. y. 1-3/16

Ex in life - Purim

(3)

III - Now: SKINNER

A- Psychol. Detm - Behaviorism. Started w. John Watson 1913 - Psychos not talk consciousness, inner feelings, only ACTS: previs, control BEHAV.

B- SK is SFD = non-fiction version WALDEN II. ...

C- SK's Thesis: Fm, FW = illusion. Betw. genetics & ENVIR, man totally control: no stand, decision, choosing, freedom.

- by ENVIR. If ENVIR unrestrict, behavior as predictable as chem-reaction (skinner Locus)

- previous theories: Mys Fm. Digny, Rugg, Amiability, originality, creativity - human-givens. They attributed Behav → "innovation". Autonomous man - SK: function of innovation; is myth

- nothing moral, emoty or morally, w. ppl who behave badly.

No bad ppl, only defective environments. And this - SCIENCE

- so: BEHAVIORAL TECHNOLOGY - learn fr. animal expts - can right ^{control} behavior

- 2 kinds inverted control: POSITV REINFORCER (= reward);

AVERSIVE REINFORCER (= punish)

- we must design culture, via behv techn, in which ANGRY
PARENT only threat, maximize POSITV REINFORCER - so
ppl w. errA not be - threat, but be - threat, ...

D- Evaluation SK's Thesis:

1. If he's right - let's all close shop. No fam. rel, mor'ty, digny, rugg - none of things that depend on Fm. that make life worthwhile & meaningful. Just: if you're an automaton

- just know that it's survive (if sk right - why?) - submit gr life, envir, to SK & he will make you happy & you a eugenicist.

(4)

~ SK's cynicism.

- a. (p. 5-6): complains Plat's Antiquus still assigned students altho no light from behavior. Nonsense! SK too anti-intellectual (^{Thales, Democritus, Parmenides...})
 - b. proto-totalitarian - READ p. 54 ... Soviet Union?
 - c. Don't steal - READ p. 67; 114... Bernstein: a' fun;
R. Elimination yr' ... while history moral terrorism
 - d. straying - READ p. 119 ... selfishness
3. :: other populists, philos, humanists - attack him:
J. W. Korten: ... denies that a unique being called man exists...

C. S. Lewis: ... man is being abolished

"The chief source of man's dignity," Reinhold Niebuhr wrote, "is man's essential freedom and capacity for self-determination." Carl Rogers has asserted that "over and above the circumstances which control all of us, there exists an inner experience of choice which is very important. This is the kind of thing Skinner has never been willing to recognize."

Skinner's detractors attack the whole concept of behaviorism, which Novelist Arthur Koestler, who has high amateur standing in psychology and other sciences, maintains is nothing but pseudoscience, "a monumental triviality that has sent psychology into a modern version of the Dark Ages." In ignoring consciousness, mind, imagination and purpose, Koestler says, Behaviorist Skinner and his admirers have abandoned what is most important. Similarly, Historian Peter Gay speaks of "the innate naivete, intellectual bankruptcy and half-deliberate cruelty of behaviorism."

The gravest menace from Skinner is his authoritarianism in the view of his critics. They reject the notion that man can no longer afford freedom and believe in fact that he cannot afford the opposite. Says Harvard Social Psychologist Herbert C. Kelman: "For those of us who hold the enhancement of man's freedom of choice as a fundamental value, any manipulation of the behavior of others constitutes a violation of their essential humanity, regardless of the 'goodness' of the cause that this manipulation is designed to

ER

Existential Psychoanalyst Rollo May believes that Skinner is a totalitarian without fully knowing it. "I have never found any place in Skinner's system for the rebel," he says. "Yet the capacity to rebel is of the essence in a constructive society."

In light such criticism, popularity SK, & his BFD reminds me central theme Erich Fromm's Escape from Freedom

(5)

E. Critique of SK.

1. "SCIENCE" - so if fancier terminology... and: Agnostics: he assures that eventually - all won't ... ∵ believe in him
2. I feel he extrapolates from specific & abnormal circumstances
RCAD SK p. 66... but conclusions are those virtually w/o freedom to begin with!
3. Fallacy REDUCTIONISM - be very suspicious of "nothing but".
Se: man = Nth. b/w Animal; Anim = N.B. machine; Man = machine
4. Further - SK concept man = blank, m a-priori - contrary to Kant - esp. Lenin's Dialectic - syncretismatics....

F. Dialectic Chemistry. review BFD in NY Review of Books.

"preachm; virtually no sc'e evidence; not even the germ of an interesting hypothesis; simply incoherent"

ch:
1. SK: takes commonplaces as startling theories - ip's y'all G'DVS/JL.

2. D-c emit low effec't behav. Hrlsbergh; Cndshew.

NL:
2. Fm means precisely wills to follow envt course, or choose alternatives.
But alternatives are given. Fm not mean I can create
a new world ex nihilo. ST - Old lady - candle-rattle - G'dlks

3. In amazing reversal. NY Times reviewer - raves SK - then
wrote another piece - retreating!!

4. D-c Behv can be controlled. But not every Fm man. Right.
Conc-camp. FRANKL: the last of human
freedom - to choose your attitude

(6)

G. Totalitarianism: Political moral criticism: is benevolent despotism; who will control the controllers? - 1984 - only 12 yrs. away.

SI - Has. Rabbi Heaven - Has'm pray with - talk'g strangely b'f'r girl: Thou god in Heaven? Rabbi: Oh no - I'm her Hell!

SK wants to assign a Heaven f'r us. I'm afraid - he's our Hell.

H. Finally - logical attack. By pre-fm philosophy vs Determ; uniquely adopted by Heaven wheelin (centrifugation)

- Nimm Philosophy (class) vs. SK.

1. simply state: Determ can never prove itself - since statement of Determ = Welt Achtung
 2. what makes us except one stat't no scien'tific, & another as wonder, superstition, incredibl? Ex: seit emirgin Int: world = electromagnetism, electrons... And escape! Irrational world composed of /ppp... One has weighed evidence, can predict, is objective, verifiable, has chosen bet. alternatives. Other - irresistible impulse... no weight, it's wq.

BUT if everythg is result previous caus', if all behavior = env't - then no way random bet. prob. predict & random laws, f'nd no wonder - & this theory the is same category; i.e. - /llif in /

(7)

IV - Summary
Conclusion:

A - true history prob FW-DET. showed breakdown
of integrity & self. Josephine - Pharoah. Some
S-philes resistance. Pharaoh. Pyramids.

B - Skinner - evaluation - quantum - psychosomatic -
revolutionist - chemistry attacks - totalitarian - living inotential.

V - Conclusion:

A - One of my favorite authors, Loren Eiseley, in chapter now
book (The Night Country) refers to human health -
Macbeth & witches. He believes their prophecy - & that's
why it becomes true for him. So w/ all those who
tell us that they see - who truly enjoy benefit of being -
they create future by prediction. & - a future w/o
fun, joy, mystery, beauty, creativity; a future "in which
man is abolished."

B - Shakespearean treason -

"It hath been taught us from the primal state
That he which is who wished until he were"

• We become what we wish to become.

• Krtulius von Inheim - 136 - Maximus... i.e., whether
you exist or not depends on whether you believe in them

• Most striking example: FM. If you believe in
FM - you become free. Deny it - & you become

(8)

a slave ready for it's master in WALTER II where
SK + his behavioral technicians will manipulate
you + shape you like Pinocchio's nose...

But back to Loren Eiseley & his closing comment on
Shakespeare's, "that he which is was wished until he were":

This is not the voice of the witches. It is the clear voice of a great poet almost four centuries gone, who saw at the dawn of the scientific age what was to be the darkest problem of man: his conception of himself. The words are quiet, almost cryptic; they do not foretell. They imply a problem in free will. Shakespeare, in this passage, says nothing of starry influences, machinery, beakers, or potions. He says, in essence, one thing only: that what we wish will come.

I submit that this is the deadliest message man will ever encounter in all literature. It thrusts upon him inescapable choices. Shakespeare's is the eternal, the true voice of the divine animal, piercing, as it has always pierced, the complacency of little centuries in which, encamped as in hidden thickets, men have sought to evade self-knowledge by describing themselves as men.

לְבָנָה רַקֵּב אֶלְגָּדִים וְאֶלְגָּדִים
- גַּד הַמְּלֵךְ אֶלְגָּדִים
גַּדְעָן אֶלְגָּדִים, וְאֶלְגָּדִים
