... קוּמֵה

The existence of these things points out the continuance of the word of G-d.

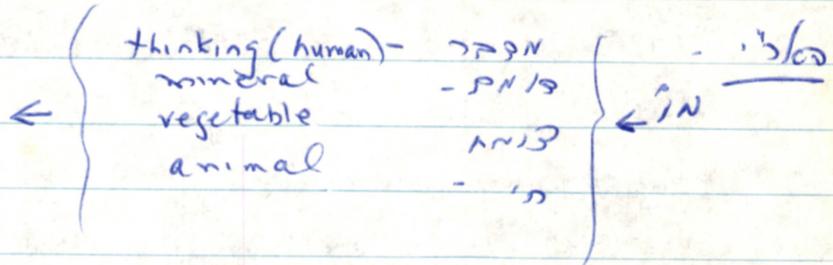

We see grass → it indicates the continuance of

G-d's command .... Thus, this indicates the historical creation and the ongoing creation. Also, then,

G-d is found in everything as everything is a result of the initial Command that still is working in the world.

Without immanence the world would return to nothingness:

there is soul and spiritual vitality - even in the smallest rock:

Religious statement: G-d exists.

Religious activity - Finding G-d in a rock

↙  
ecstatic & romantic

This view is not pantheism where

G-d is nature, instead here we find G-d wearing the disguise of a rock, etc.

If one removes the soul from every object in the world - we return to the pre-world time.

עצמות אלו הן פרי פועל אלו  
אבן, צומח, אדם - הן כולם  
הן פרי פועל אלו  
: הן הן I MANENCE

only THIS פועל אלו receives its soul through a long evolutionary process. Thus in making a rock many processes go on, yet all are derived from the immanence of G-d. Thus, G-d is found in the rock.

problem: - If all nature is a result of computations, combinations & permutations - then metaphysically all is equal - regardless of physical differences.
