

VEMAG Process Check 706

Checkweigher for minced meat and forming lines

Optimum weight control for all working conditions.

Are you working with complex production lines and would like to have 100% weight control for your products? Do you calculate exactly and would like to prevent overweight and underweight packages?

VEMAG Process Check with drop-down conveyor

Use

The VEMAG Process Check is suitable for minced meat and forming lines and helps you to comply with EU regulations for sealed packages.

A drop-down conveyor attached to the unit automatically rejects wrong weights.

Software

Reporting is made easy with a broad range of standard report designs. Easy conversion of reports to other software applications such as Microsoft Excel.

Online production overview with alarm function:

- packages per minute
- accepted total weight
- accepted average weight
- accepted packages by number and percentage
- rejected packages by number and percentage
- giveaway by weight and percentage

Handling

The solid construction is designed for demanding environments. The device is equipped with a special belt running at very high speeds. The belt can be easily removed for cleaning and maintenance purposes.

All the benefits at a glance

- Can be perfectly integrated in VEMAG production lines
- Prevention of underweight and/or overweight packages
- Reduction of giveaway
- Automatic rejection of wrong weights
- Suitable for the most demanding environments
