

»Sect 360«

Slicing larger products

The Sect 360 is the largest portion cutting machine. With its servo-controlled product feed and smart control system, it is possible to portion the product into groups with the consistently identical or at choice varying slice thickness. First-cut control and batching options are other functions that guarantee and optimize yield. The integrated discharge conveyor enables simple and swift product handling after slicing.

Product features:

- » Powerful blade drive
- » Integrated discharge conveyor*
- » Fully automatic lubrication system
- » Indexed or continuous product forward feed motion*
- » Adjustable gripper end position
- » Fully automatic start through photocell control
- » Computer controlled, with program storage and portioning functions, including variable portioning, separation and batching through touch screen*
- » Easily accessible gripper guide-shaft for effective sanitation
- » Stable cut-off blade and support frame for an accurate and clean cut
- » Two-wing blade for higher capacity*
- » Movable*
