

Doodle Page Digital Download

This PDF file contains 1 (one) Doodle Page. The PDF has been put together to give you options when it comes to printing. Pages and patterns that are larger than 8½x11 have been provided in two formats:

1) Full Size

If you would like to have a full size print out, take the full size pages to your local print shop and they can print it for you. All full size Doodle Pages are 11x17

2) Tiled

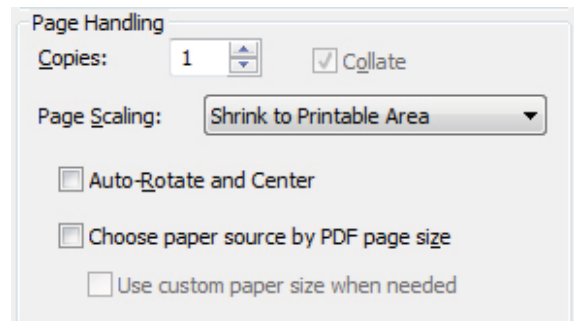

The tiled pages give you the option of printing the full sized Doodle Pages at home. You print the tiled pages and then assemble them to make the larger patterns.

The Doodle Page PDF files are typically laid out like this:

Front – full sized, front – tiled, back – full sized, back – tiled

(Some Doodle Pages do not have backs)

Please note: When printing on a home printer, the edges may get cut off. To avoid this, make sure “Page Scaling” is set to “Shrink to Printable Area” in the Adobe Reader print dialogue box. This will decrease the size of the Doodle Page a very small amount.

You may take this PDF file to your local print shop to have the full-size pages printed for your own personal use.

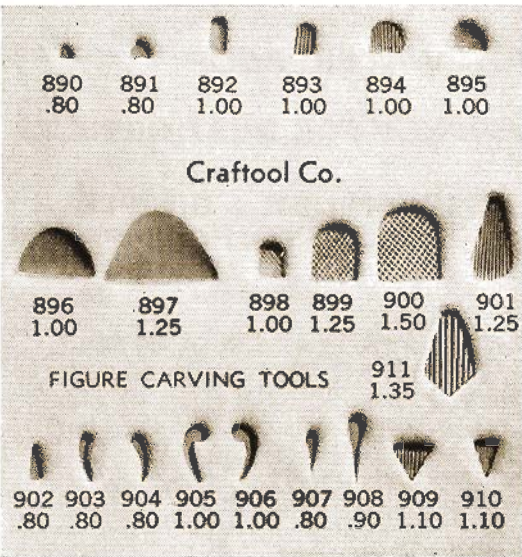

SPRINGTIME by Al Stohlman

In the springtime a young man's fancy turns to love, but "Ol' Man Crafttool" fancies himself already on his summer vacation an' fishin' along some shady stream as carved at left; plenty of playful rainbow trout, shoes off, line in the water, a restful position and doin' some real fishing'. Notice a couple of Crafttools stickin' out of his pocket.

Bevel inside the large fish silhouette with Crafttool of the Month #896. This tool is used for most all of the beveling around the fish, the water ripples and lily pads, where flat beveling is desired. The lily pads are beveled around very lightly to give them the appearance of laying on the surface of the water. #896 is also used to flatten the top of the lily pads by tapping lightly. In figure carving, you must learn to strengthen or lessen your blows on the tool to gain the desired effect. Notice how heavily the leaping fish has been beveled around . . . yet the water ripples are beveled lightly and smoothly with the same tool.

Trying #34 Junior size swivel cutter. The 1/4" angle blade #100N is excellent for cutting the eyes of frog and fish and the small details.

Use the coupon on the reverse side of this page to order from your Crafttool dealer.
