Google Arts & Culture

Inspirational Women in Music
Inspirational Women in Music

Join us on a journey of discovery as we explore inspirational female musicians

This lesson is suitable for anyone but is recommended for students aged 14-16 years and is designed to support you as you explore Google Arts & Culture stories related to the lesson topic.

You can complete the lesson on your own working at home, with a group of friends, or in your classroom. They are designed so that you can work through them at a pace that suits you. If you get stuck, you can talk to a teacher or parent.

Throughout the lesson you will find tasks to complete and questions to answer, so when you reach the end you will have used a range of skills to create something of your own that demonstrates your knowledge and understanding of the subject.

All you need to get started is any device with internet access.

Join us in exploring the impact women have had on the world of music and learn more about their interesting stories.

Things you’ll need to complete this lesson.

- Tablet, laptop or computer with access to the internet.
- Paper, or a notebook, and pen to make notes as you go.
- Drawing materials, such as coloring pens and pencils, paper etc.
- Scissors, glue, scrap paper and general stationery items.
- Art materials, specifically paints and brushes.
- A printer would be beneficial but not necessary – why not draw instead?
In this lesson you will learn about some great women musicians all from different backgrounds. You will explore how each woman has left their mark on society with their music and has paved the way for other women to follow in their footsteps.

What can you expect to learn?

- Learn about a woman who had a significant influence on early electronic music.
- Know how the Latinx sound started, and how its influences can be found in American music.
- Appreciate the life of a composer and the tools she used to create her compositions.
- Understand that there are a wide variety of musical styles from around the world.
- Learn what an orchestra is, and some of the instruments involved through musicians who play them.

Activities to complete

1. Create your own version of a famous TV theme.
2. Design a poster for an artist, advertising an upcoming event.
3. Explore sound in a new way.
4. Test your knowledge of what you have learned from this lesson.

Outcomes you will achieve

- Learn about a woman who had a significant influence on early electronic music.
- Know how the Latinx sound started, and how its influences can be found in American music.
- Appreciate the life of a composer and the tools she used to create her compositions.
- Understand that there are a wide variety of musical styles from around the world.
- Learn what an orchestra is, and some of the instruments involved through musicians who play them.
Vocabulary
Words to look out for in the lesson

anthem, audition, bow, bpm, brass, Broadway, carnival, cello, chorus, clarinet, composer, composition, concert hall, conductor, crop, delay, double bass, effects, fanfare, festival, flautist, found sound, freelance, glissando, harmony, harp, honky-tonk, instrument, key, Latin music, march, melody, musical, Nashville, orchestra, percussion, performance, piano, polka, premier, record, reverb, sampling, semitone, soloist, soprano, sound designer, spectral music, string quartet, symphony, time signature, tone, touring company, viola, violin, woodwind
What is this lesson about?

Discover more about the artistry and creativity of women in the world of music. Watch and listen to their performances and discover how these women helped others to develop their talents.

This lesson will take around 120 minutes.
Women in Art

Elements of the Lesson

Women’s roles in music have varied through the ages. In certain genres such as popular music, they found fame and independence before they were able to in other careers. However, whilst opportunities for women in today’s music industry should be equal to those available to men, there is still a wide range of discrimination and under-representation across all areas of the music world.

In this lesson we will explore the lives and work of women who have enjoyed success. For some it is global, for others a quiet victory on the path to equality. You will study some great women from the world of music, some who are still active and others who have left a legacy for others to follow.

You will then have a look at an orchestra, and discover how they overcame unconscious bias using blind auditions, a method similar to the TV show ‘The Voice’. You will see and hear from three orchestra members who talk about their roles and their instruments.

Finally, you will meet the woman who wrote the first Brazilian Carnival march, discover more about the theme song for the UK sci-fi show ‘Doctor Who’, and learn about being the star of one of the most well-known musicals of the 20th century.

If you make notes on the stories you read, this will help you for the end of lesson quiz.
Great Women in Music

In this chapter, we will review the lives of three women from different genres of music. Two are superstars in their field, the other a quiet maverick who was ground-breaking in her use of music.

This chapter will take around 40 minutes.
Gloria Estefan
Latina Superstar

Estefan is a global superstar who became part of the sound of the 1980s. She was instrumental in popularizing Cuban-influenced pop music with a global audience.

Loretta Lynn
Coal Miner’s Daughter

Lynn had a strong voice and helped challenge the dominance of men in country music. Her career has spanned six decades to date. She has paved the way for others to follow.

Phyllis Tate
Maverick Composer

Tate was a quirky and playful English composer. She was experimental in her compositions and was passionate about musical creativity. She left a huge mark on 20th century music.
Gloria Estefan has sold over 100 million albums and has had number one singles in America, Canada, Spain and the Netherlands, amongst others. Making her one of the most successful cross-over Latina artists of all time.

She has won hundreds of awards, including three Grammy Awards, five Billboard Music Awards, and two American Music Awards.

She has had a successful solo career, was part of the band The Miami Sound Machine and has collaborated with artists, such as Michael Jackson and *NSYNC. Her latest solo album was released in 2020.
Loretta Lynn is a popular country music performer. She has recorded and released music across six decades. Her songs have been successful in giving a voice to working-class women.

Lynn started her music career in the late 1950s and signed her first contract in 1960. She writes songs about real life and often about her own experiences. Her music has generated criticism in the past and some radio stations in America banned at least three of her songs during the 1970s.

She gained new fans, after Jack White produced her 2004 album ‘Van Lear Rose’.

Her success and her honest approach to song writing have carved a path for women in the country music genre.
Phyllis Tate was an English composer, known for her imagination and her originality. She refused to write music that was fashionable at the time and followed her own instincts. Her music was often written for amateur performances and for children.

Tate wrote music with combinations of instruments that were classed as unusual, and she was known for being modest and intuitive. She did not like to analyze her own work and believed that musical creativity could not be taught. Because of this, she turned down the offer to become a professor at the Royal Academy of Music.

She made a unique contribution to 20th century music with her compositions, which included Christmas carols and music inspired by poetry.
Activity 1

Design a Music Poster

You have been asked to design a concert poster for one of the three music stars you have just learned about.

The poster needs to:

- Show their name.
- A sketch of them or something related to them.
- A description that summarizes who they are.
- Venue, Dates and Times (you can decide on the details here.)
- Include information about what will be performed. (You could do some research for a set list that will last 2 hours. Make sure it reflects the musician you have selected.)

Extra Challenge

The [Gloria Estefan](#) story includes some videos. Select one and then write a 100-200 word review/article on what you saw and heard for a magazine or newspaper. It should include a title, subtitle and concise writing to describe the video, and your opinion on what you thought of it.
Women in the Orchestra

Before the early 20th century, women were not included in major symphony orchestras and they were only allowed to play in women-only ensembles. In some countries, like Austria, the change to allow women to be included happened less than 30 years ago. The balance has shifted now and continues to do so.

You will now learn about orchestras through the stories of women who are members of a world-famous symphony orchestra.
What is an Orchestra?

An orchestra is a large group of musicians who play together on a variety of string, wind, and percussion instruments.

Leading the group of musicians is the conductor. The role of the conductor is to ensure that all the musicians are playing in synchronisation by following the timings of the musical score and issuing commands to the musicians via a ‘baton’

The instruments that make up an orchestra are organized into four families:

**Strings:** String Instruments make use of vibrating strings to create their sound. The violin is an example of a string instrument.

**Woodwinds:** Woodwind instruments are made of a long hollow tube of wood or metal and creates a sound as the musician blows air through a thin piece of shaved wood called a ‘reed’, or across a small mouthpiece. The clarinet is an example of a woodwind instrument.

**Brass:** Brass instruments are wind instruments made of metal with a cup-shaped mouthpiece. The sound is made by the musician blowing air into the mouthpiece whilst vibrating their lips. The tuba is an example of a brass instrument.

**Percussion:** Percussion instruments are played by being struck or shaken. A snare drum is an example of a percussion instrument.
The Orchestra
A Brief History of Women in Orchestras

Orchestras have historically been biased against women. In 1970, only 5% of musicians in the top five American orchestras were women. However, that number has grown seven-fold in the last 50 years. How has that change happened?

There are many factors that have contributed to the growth of appointments of female musicians and conductors in orchestras. Women and now more widely accepted in orchestras globally, allowing for growth in the numbers of women applying and greater aspirations for young female musicians.

The introduction of ‘blind’ auditions has had a lasting impact. This is where musicians perform behind a screen to conceal their identity, which can effectively eliminate conscious and unconscious bias. Those in charge of deciding who to pick, base their decision solely on the merits of the quality of performance. The decision is not limited by gender bias, which has a big positive impact on gender equality.

Click the explore button to watch and listen to an orchestra playing a piece by Shostakovich. It was conducted by Marin Alsop, a pioneering American conductor. In 2007, Alsop became the first woman to lead a prominent, major American orchestra.
Suzy Willison-Kawalec
Harp

Suzy Willison-Kawalec is the Principal Harpist for the Royal Philharmonic Orchestra and a Professor at the Royal Academy of Music, where she also studied the harp. As well as performing with the orchestra, she has traveled across Europe and the Middle East to perform both solo, and as a part of chamber recitals and concertos.

Willison-Kawalec has recorded music with artists such as Nigel Kennedy, Bryn Terfel and The 1975. She also performs with several British orchestras as a Guest Principal Harpist.

The harpist’s role in the orchestra is an interesting one. As a harpist, Willison-Kawalec is one of a handful of musicians who are the only ones to play in their section. The sound of the harp is distinct and recognizable, meaning that her playing will stand out in any performance.

During the video, make notes on the following:
• In Suzy’s opinion, what does the harp add to an orchestra?
• If you were in an orchestra, what instrument would you play? Why?
Five Women Photographers

Let us look at five famous fashion photographers from America and Germany. You will explore how they changed the art of fashion photography introducing a more feminine perspective than that of previous photography. These proved to inspire their subjects and initiated new techniques. The five female photographers are: from Germany; Regina Reland and Ellen von Unwerth; from America; Deborah Turbeville, Louise Dahl-Wolfe and Toni Frissell.

Read about who they were as well as view some stunning photos in this editorial feature from Google Arts & Culture.

Explore

After reading about these artists, can you identify the following from the feature.

What are some differences about fashion photographs taken by a woman?

Sulki Yu
Violin

Sulki Yu is an experienced violinist from South Korea, who has worked with many orchestras across the globe. She is a Principal Violinist for the Royal Philharmonic Orchestra and Concertmaster for the Arensky Chamber Orchestra. Her role in the orchestra sits in the First Violins section, where she and the other violinists create the melody of the piece they are playing. They often support with providing cues to other parts of the orchestra and will play the solo violin pieces.

Yu studied at the Guildhall School of Music and Drama in London and holds both a Batchelor of Music Degree and a Master of Music Degree. She has won numerous prizes including in the Yehudi Menuhin Competition and the Hattori Foundation Award, both in 2006.

As well as being an established member of two orchestras, Yu has also performed as a guest soloist with orchestras such as the Moscow State Academic Symphony Orchestra and is a founding member of the Fournier Trio.

During the video, make notes on the following:

- According the Sulki Yu, what are the challenges she faces playing the violin in an orchestra?
- What does she enjoy about it?
Ugne Tiškutė
Viola

Ugne Tiškutė is a violist for the Royal Philharmonic Orchestra. Following in her mother’s footsteps, she started playing the violin at age six and then switched to the viola in her teens.

Born in Lithuania, Tiškutė moved to London in 2009. There she studied at the Royal Academy of Music and earned a Bachelor of Music Degree and a Master of Music Degree, as well as an advanced teaching diploma.

Alongside her work at the Royal Philharmonic Orchestra, she is part of the group Ensemble Mirage.

Like her mother, Tiškutė is passionate about teaching and teaches both viola and violin.

After the video make notes on the following.
What is Ugne’s favourite music?
What is YOUR favourite music and why?
Musical Word Search

Print out a copy or recreate the word search grid yourself, and then find the musical terms listed on the right. The terms are found in the Vocabulary section on slide 4 of this lesson.

Extra Challenge

Blind auditions have proved a successful way of helping professional orchestras ensure that there is a more balanced approach to selecting musicians.

Consider another area where you feel blind auditioning would help achieve equality for everyone.

Write your thoughts up in around 100 words.

Can you find the musical words in the grid above?

<table>
<thead>

<th>10 to 15-minute activity</th>
</tr>
</thead>
</table>

Remember – Words may be running, vertical, horizontal, diagonal, or even backwards.
In this chapter, we studied the orchestra in some detail. The origins of classical music are based in western cultures, with the earliest examples found in Ancient Greece.

In other parts of the world, there are different methods of performing as a group of musicians. Here is an example from Rajasthan, India, where female singers are the stars in these performances.
Exploring Different Musical Genres

In this chapter we are going to look at three examples of different types, or genres, of music. Electronic – ‘Doctor Who’ TV theme music, Musicals – ‘West Side Story’, and Festival – the Rio Carnival. Let's learn about three women who were early pioneers and who helped shape their genres of music.

This chapter will take around 50 minutes.
From ‘Doctor Who’ to ‘West Side Story’ to Rio

We will now learn about three women from different music genres, and their achievements.
Delia Derbyshire was an electronic music composer who grew up in the UK during World War II. She was exposed early on to a catalogue of sounds during the Blitz and the impact can be heard in her work.

Derbyshire worked for the BBC Radiophonic Workshop during the 1960s, a time when it was rare for women to work in electronic music production, especially in experimental music laboratories. For this alone, she can be labelled as a pioneer. However, she is most well-known for creating the theme tune for the UK TV series ‘Doctor Who’. The popularity of the show and of her composition, made people in Britain more aware of electronic music and helped to influence how electronic music developed.

In the ‘Doctor Who’ theme, she used experimental sonic technology, such as the theremin, in order to create an otherworldly sound to reflect the sci-fi theme of the show.

Even up until her death in 2001, Derbyshire was experimenting with different ways of creating music, including working with the artist Sonic Boom.

Compare and contrast the modern ‘Doctor Who’ theme on the BBC website with the original created by Delia Derbyshire.

- How much influence does her original theme have on the new one?
Join Delia Derbyshire as she shows us how she innovates with sound and composition. Use the explore link below to visit the BBC Archives.

Explore
Chita Rivera
Born 23 Jan 1933

Chita Rivera is a celebrated American Broadway star. A dancer, actress, and singer, Rivera has starred in a catalogue of high-profile musicals including ‘West Side Story’, ‘Chicago’, and ‘Bye Bye Birdie’.

She has won two Tony awards and set a record with 10 Tony nominations across her career. She has received other awards, such as the Presidential Medal of Freedom and a Kennedy Center Honor.

Rivera is most recognised for her role as Anita in ‘West Side Story’ a musical loosely based on the Shakespeare play ‘Romeo and Juliet’. She was cast in the musical in 1957, when it was first being staged. She was the first person to play the role of Anita, performing in both the Broadway and West End productions. She also originated another iconic role, starring as Velma in ‘Chicago’, a musical that is still performed across the globe today.

In 1986 she suffered a potentially career-ending injury in a car accident, where she broke her leg in 12 places and had to have surgery. However, she continued to perform and dance after rehabilitation and, at the age of 87, is still an active performer.
Explore Chita Rivera's career and learn more about her from the woman herself.
Chiquinha Gonzaga was a Brazilian musician and composer who created the first carnival march, ‘Ô Abre Alas’ in 1899. She was a visionary and an activist, who suffered a great deal of criticism. She challenged what was considered acceptable for a woman at the time and her work and actions were often declared as scandalous. Despite the criticism she received, she was incredibly successful and became internationally famous.

Gonzaga was the first woman in Brazil to conduct an orchestra and she took part in music performances which traditionally only allowed men. She was the first woman to play piano in choras music, a type of urban Brazilian music popular in the 19th century. This type of music was typically played on flutes and guitars.

As well as paving the way for female musicians in Brazil, Gonzaga was also involved in several movements, including the call to abolish slavery.

Listen to a performance of ‘Lua Branca’, which was composed by Gonzaga in 1910.
Gonzaga was the first popular female composer in Brazil. She created the first carnival march for the world-famous Brazilian Carnival. Find out more about her here.
Activity 3

Compose your own music track

Delia Derbyshire made recordings of everyday sounds as part of her work for the BBC Radiophonic Workshop. She used these sounds as effects for radio dramas and the television. Delia also used them for her compositions. There are two that describe what she did, 'FOUND SOUND' and 'SAMPLING'.

If you have access to a computer, smartphone, or tablet, you can complete this activity. Record sounds and then piece them together using a music app. Free apps to consider are Audacity (PC/Mac), BandLab (Android), GarageBand (Mac/iOS). Follow the instructions below, and on the right, to record and make your own track.

1. Once you have imported your sound, try and recreate the ‘Doctor Who’ theme.
2. Set your software to 200 BPM (Beats Per Minute) and the time signature to 12/8 time.
3. Take your sounds and create an audio track in the project.
4. Crop sounds to make an isolated note.
5. Try and match the theme by copying and pasting the isolated note 16 times.
6. Change the pitch if your software has this function.
7. Add some effects such a delay, reverb and chorus. Experiment to see which works best.

You may need help from your parents or teacher with this activity.
End of Lesson Quiz

See if you can recall what you have learnt from this lesson. How many questions can you answer without going back through the pages.

1. Who is known as the Coal Miner’s Daughter?
2. What instrument does Ugne Tiškutė play for The Royal Philharmonic Orchestra?
3. What piece was being conducted by Marin Alsop by Shostakovich?
4. Who created the original ‘Doctor Who’ theme music?
5. What part of India do the women musicians featured in this lesson come from?
6. Could Chita Rivera put on a show next year?
7. Name the first popular composer from Brazil?
8. ‘A sound drawn from everyday objects that are not normally considered to be musical.’ What is this a description of?
9. Which band did Gloria Estefan sing for?
10. Which professorship did Phyllis Tate refuse to accept, as she firmly believed that musical creativity could not be taught?

You will find the answer to this activity on page 32.
Now you’ve completed this lesson you may want to continue to find out more about women in the performing arts. This is a good starting point to find out more about the performing arts, and this has information about women in culture. Finally, you can delve deeper into the different music covered in this lesson from our partners, Sound & Music, London, Country Music Hall of Fame and Museum and Deutsche Grammophon, a leading classical recording label.
Here are the answers to the quiz. How did you do?

1. Lorretta Lynn
2. Viola
3. Symphony 7 ‘Leningrad’
4. Delia Derbyshire
5. Rajasthan
6. Yes, she is still alive and performing.
7. Chiquinha Gonzaga
8. Found sound
9. Miami Sound Machine
10. Royal Academy of Music
