Millets - an idea whose time has come... again!

The United Nations has declared 2023 as 'The International Year of the Millet' at the behest of India, whose ardent attempts to bring these 'nutri-cereals' back into our homes is taking urgent precedence.

At one time, millets were intrinsic to our nation's foodscape, even consumed on a daily basis until the Green Revolution made rice and wheat more accessible. India's efforts to revive these ancient, forgotten grains could be the vital impetus required to achieve the United Nations' sustainable development goal of ending hunger by the year 2030.

Over the last decade, climate change, population growth and economic slowdown have impacted food security in exponential ways. There is a pressing need to transform the food system to achieve food and nutritional security and to provide an affordable, healthy and nourishing diet to the world at large. As global agrifood systems face these challenges, resilient cereals like millets and pseudo-cereals provide an affordable, nutritious and climate-resilient solution.

IFCA [Indian Federation of Culinary Associations], India's nodal body of culinary professionals, works through its network to promote heritage culinary knowledge and cooking traditions, indigenous ingredients and obscure culinary styles. It's core focus is to develop the gastronomic arts and showcase Indian cuisine on a global platform. For over a decade, IFCA has worked across platforms and fora to promote millets and their virtues and to inspire chefs to experiment with them and showcase their exceptional credentials in their menu offerings.

Milletology - a recipe collective by celebrated chefs, produced by IFCA, is a treasure trove of traditional millet recipes from around the country and a vast repertoire of millet-centric and millet inspired culinary masterpieces. It is an outreach of our collective art and professional talent to answer one of the most important questions facing humanity... how will we feed future generations?

We hope this collective inspires you to discover and cook your own family heritage recipes; they are certain to include millets. We also hope that it encourages you to join the movement and create your own signatures to bring these grains of goodness back to our tables.

Bon appétit.

# etymology of millets in india

The history of millets in India, is connected to the history of food of our land.

Millets refer to several species of cereal grasses in the family of Poaceae, cultivated for their edible seeds. Plant remains from archaeological sites in India indicates that millets were amongst the earliest harvested grains in our country, dating back to the neolithic, chalcolithic, pre-Harappa and late Harappan periods.

Remains of grains and husks excavated from sites at Rohira in Punjab, Hulas in Western Uttar Pradesh, Surkodta, Rangpur, Rojdi in Gujarat, Hallur and Tekkakota in Karnataka, Paunar, Inamgaon and Diamabad in Maharashtra and Ahar in South-Eastern Rajasthan evidence continuous cultivation of millets. These include jowar [sorghum], bajra [pearl millet] kondo [kodo millet], kangni [foxtail millet], ragi [finger millet] along with barley, horse gram and several varieties of rice and wheat.

Around and after that time, for several generations, it is likely that access to wetlands and irrigation was limited. Diverse, small-scale

and low-input farming was carried out on dry and rain fed lands. Millets, with their short growing seasons and their ability to thrive in semi-arid environments, made them the staple grain of nomadic communities across India.

Over time, agricultural communities were exposed to irrigation based farming and cultivation of rice, wheat, pulses and oil seeds took preference over millet farming. Prior to the Green Revolution, millets constituted approximately 40 percent of all cultivated grains [contributing more than wheat and rice], however since then, the production of rice and wheat has doubled and tripled respectively. Mechanised agri-equipment and high yielding seed varieties enabled much higher productivity and in turn, made them commercially lucrative.

Extensive cultivation of monohybrid crops resulted in the near extinction of several indigenous species and native varieties. Further, rapid globalisation led to the adoption of westernised and standardised food habits along with the new aspiration for “refined” and high-convenience diets. Knowledge about

the nutritional qualities of millets diluted over time. Also, millet harvesting and processing, which used to be labour-intensive, with low productivity and profitability was another reason for the “food basket” to shrink, reducing crop diversity in this new era of market oriented agriculture.

This resulted in the relocation of India’s millet growing regions. From 37 million hectares in the mid 1960s, millet farming fell to less than 15 million hectares in 2015-16, thereby losing their importance in commerce and leading to serious agricultural, environmental and nutritional consequences.

The antiquity of our food culture and culinary heritage, in which these heirloom grains were the mainstay in providing natural whole grain nutrition, needs to be revived, preserved and protected. With growing health consciousness, environmental concern and the pressing need for updating our food systems to survive climate change, it is timely that sensitization through programs by the Government of India and other organizations is leading to a revival in the demand for millets. The Indian government is

engaging with organizations and agencies in the value chain to conduct promotional activities and join the “people’s movement” to position India as the “Global Hub of Millets” and revive the forgotten glory of ‘Miracle Millets’ through the International Year of Millets [IYM] 2023.

It is without doubt that these nutri-cereals that have nourished humanity from pre-historic times are the future of agriculture and are an important food source for our planet. They hold the key to modern day problems of chronic disease, global food insecurity and address matters of health, environment, agro-climatic stability and farmer welfare. Their potential to become future-ready crops can lead to improved food security, health and wellbeing.

**Join the movement now!**

# securing the future of food

## Millets as a Medium

'Food security exists when all people, at all times, have physical and economic access to sufficient, safe and nutritious food that meets their dietary needs and food preferences for an active and healthy life' - this is the widely accepted definition of food security emerging from the World Food Summit of 1996. A term that originally referred to the availability and price stability of basic foods, concepts of food security have evolved to reflect the issues of structural poverty, environmental changes, economic trends and conflict. The present definition reinforces that food security is multidimensional and in turn, the solutions must address underlying issues across those multiple dimensions.

Food and nutrition are central to human development. In a world which produces enough to feed its entire population, food emergencies have risen, especially in regions which are most vulnerable to conflict and those that are on the frontline of climate change. Separately and ironically, the world also experiences the double edged problem of undernourishment and obesity. Far too many adults are overweight and far too many children are anaemic. The covid-19 pandemic has aggravated this vulnerability through income loss and supply chain disruptions. The food system also has an intrinsic relationship with land and climate, an accelerating climate crisis will create a crisis of food security.

Against this backdrop, the United Nations declaration of 2023 as the 'International Year of the Millet' is timely. Millets have been a part of our agricultural landscape and diet for centuries. They are drought resistant crops with short growing seasons, requiring little water and can sustain rising summer temperatures and changing rainfall patterns. They are all-weather crops, capable of nourishing us and nourishing the soil around the year and in all seasons. In particular, millets can be cultivated together with other

food crops, in turn extending nature's diversity to our plates. For instance, pearl millet [bajra] provides warmth and strength in the winter whereas sorghum [jowar] is part of summer diet because it is lighter. In comparison to other cereals, millets also have higher nutritional value. Rich in complex carbohydrates, proteins, fiber and vitamins, they are important sources of nutrition in comparison to less complex cereals.

At a time of climate change and depletion of natural resources like water, millet farming is beneficial for farmers as a sustainable and profitable means for income generation. According to the Indian Institute of Millets Research, domestic and export demand for millets has increased multifold over the last few years, indicating an increase in consumer awareness and a need for increased investments in millet production. Government schemes are being formulated to create inclusive frameworks which will connect millet producing communities to domestic and international markets.

Securing the future of food is a large and complex priority, requiring a multifaceted approach to build resilience in the entire supply chain. In the words of Dadabhau Jachak, who has practised organic farming for more than 25 years in the Vadgaon-Patole village in Pune, "in the same way that every person in the world has a unique talent, every crop has unique characteristics which give it a unique place in the farming ecosystem and in our diet". Millets have this potential to unify diverse efforts and create environmental, economic and nutritional safety nets for the world. They must have a place in the solutions we create towards the achievement of critical sustainable development goals [SGD's] of zero hunger, good health and wellbeing, sustainable consumption and production and climate action.

# making the big shift: from alternate to main stream

“We want deeper sincerity of motive, a greater courage in speech and earnestness in action.”  
Sarojini Naidu.

The current challenges that we face in the global food system are manifold and those of long-term consequence. One of the main areas of concern is that a large part of the world's food supply comes from a small selection of plant and animal species. The limited plant diversity, intensive methods of mono-culture farming and dependence on animal protein are a serious threat to food security.

In the way we eat, with increased consciousness of what we consume, lie the opportunities to improve ingredient diversity. When we turn our attention to indigenous, in-season, nutrient-dense produce, we support farmers and local producers, reducing carbon footprint and improving agro biodiversity.

The comeback of millets, acknowledged as the smart food of the century is very timely. Their myriad nutritional credentials are well known. They are a storehouse of a wide range of nutrients and vitamins and their high fiber content and low glycaemic index make them an exceptional grain choice to include in our diets. Further they improve blood sugar management, digestive health, are packed with antioxidants and ensure a healthy metabolism.

Millets are extremely versatile and lend exceptionally well to culinary innovation. As vanguards of change, the influence that Chefs wield is tremendous, in creating awareness around these 'nutri-cereals' and how their consumption is healthy and environment-considerate.

This collective of recipes is a reflection of the vast possibilities and opportunities that exist to bring the once alternate millets back to mainstream and the time is now!

### For Assembling

Avocado, peeled and sliced [just before assembly]	3 nos
Artisan cream cheese	60 gms
Black sesame seed	5 gms

## To Prepare

### Sourdough Starter

In a bowl, combine grated apple, 500 gms of brown rice flour and 360 ml of lukewarm water and mix thoroughly. Transfer into a large airtight container, leaving enough room to double in size. Seal and set aside. Leave the starter at room temperature [preferably 18°C-22°C] for a period of 3 days.

Mix the starter thoroughly and discard half of it. Add 250 gms of flour and 180 ml of filtered water to the remaining starter mixture and let it rest for 2 more days. Repeat the same process of mixing and discarding half of the mixture. This time make it slightly more wet than previously and add 250 gms flour and about 220 ml of water. Allow it to rest for another 24 hours.

### Dough

Before making the dough, be sure to feed your sourdough starter at least twice, allowing it to reach peak activity level. Combine all dry ingredients: flours, salt and psyllium husk in a mixing bowl. Add wet ingredients: starter, water and maple syrup [optional].

Mix well using a stand mixer. Form dough into a smooth ball and let it rest in a bowl.

Do not knead or fold. Cover with a damp cloth and set aside at room temperature, to ferment for about 4–6 hours. Allow the dough to rise, cover with a damp cloth and refrigerate overnight. Preheat the oven to 240°C, remove the dough from the container and transfer to a baking tray. Score the surface and bake covered for approximately 60 minutes. Remove the lid and bake for an additional 5 minutes. Once a nice golden-brown crust is achieved, allow it to rest and cool on a wire rack.

### Spiced Pearl Millet

Boil the soaked millets with sufficient water. Strain any excess liquid and cool. Add onions, coriander, chilli, lemon juice, cumin powder, deggi chilli powder, sea salt and mix well.

### Dressing

Heat olive oil and turkey rashers in a non-stick pan, cook till crispy. Reserve the crispy rashers. Add the dressing ingredients with the turkey rasher oil and mix well to emulsify.

## To Serve

Slice the sour dough, heat on a pan with olive oil. Spread cream cheese, sprinkle the spiced pearl millets generously to cover the toast evenly. Place the sliced avocado. Drizzle the dressing. Crush the crisp cooked turkey rashers slightly and place on the avocado.

Garnish with sesame seeds and amaranth cress.

## To Prepare

### Jowar Waffle

Mix both the flours, salt and baking powder together. Whisk the eggs and fold in the flour mixture. Add the melted butter, cold milk and whisk again till the batter is smooth.

Cover and allow the batter to rest for 30 minutes. Pre-heat the waffle iron and brush it with a little butter. Pour enough waffle batter on the waffle iron, close the lid and allow to cook for about 7-8 minutes. Remove when both sides are crisp and golden.

### Pithle

Sieve the gram flour in a large bowl, slowly add water and make a smooth batter. In a heavy bottom pan, heat oil, add the mustard seeds, chopped onion and chopped garlic. Cook for a minute, add chopped green chilli and cook for another minute. Slowly pour in the gram flour batter, keep stirring continuously to prevent the mixture from sticking to the bottom.

Once the mixture starts bubbling, lower the flame and keep cooking for another 8-10 minutes. Add salt and the chopped fresh coriander.

### Mirchi Thecha

Heat a pan and dry roast the peanuts on medium heat till peanuts are well roasted. Cool and rub the peanuts with both hands to remove the peels and keep aside. Heat oil in another pan, add green chillies and garlic cloves and sauté for a minute. Add the peanuts and cook for a minute. Remove the ingredients from the pan and allow to cool. Pound the mix in a mortar pestle till coarsely ground. Add salt.

## To Serve

Plate the freshly cooked waffle and accompany with hot pithle along with the thecha served at room temperature.

### To Prepare

#### Ragi Appam

Wash ragi grains, rice, dal and fenugreek seeds well and soak for 3.5 hrs. Soak ragi separately from the remaining ingredients. Grind the rice, dal and fenugreek seeds and mix well in a blender. Add ragi grains and grind again.

Finally add red rice poha, grated coconut and grind everything into a thick batter. Season with sugar and salt. Take about 1-2 tbsp of lukewarm water in a bowl. Then add the active dry yeast and stir to mix well. Add this yeast solution to the batter and mix well.

Cover and keep aside to allow fermentation [preferably overnight] depending on the temperature conditions. The batter will rise and increase in volume the next day. Check consistency of the batter and add water to adjust the batter to a thick pouring consistency.

Preheat the appam pan on medium high heat. Grease the entire surface. Pour a ladle full of ragi appam batter on the pan and swirl the pan in circular motion to spread the batter, thick on the base and thin on the sides.

Cover the pan with a lid for approximately 2 minutes until the ragi appam is crisp

and brown on the sides and the centre is steamed and cooked. Transfer the appam to a plate and proceed to prepare more fluffy ragi appams.

#### Cēna Kadla Kari

Blend half a cup of black chickpeas till smooth and reserve. Blend grated coconut to a smooth paste and reserve. Heat oil in a pan, add whole spices and let them crackle. Add in onions, curry leaves, chillies and sauté till golden.

Add ginger garlic paste and mix well. Add tomatoes and cook till soft and it starts to release its oils from the side. Add salt and spice powders and keep stirring. Add coconut paste, chickpeas, along with its cooking liquid and fried yam cubes. Add pureed chickpeas and more water if needed. Simmer on slow heat till it comes together.

## To Prepare

### Mandiya

[make the day before]

Mix ragi malt powder and 30 ml water. Make sure there are no lumps. Put 350 ml water and cinnamon to boil. Add the ragi malt powder and salt. Now slow cook for 15-20 minutes. Leave to cool in a clay bowl, overnight. By the morning it will be a little fermented, hence slightly sour.

### Kodo Millet with Moringa Leaf

[make the day before]

Soak kodo millets overnight in water. The next day, boil in 250 ml water. Drain. Just before serving, in a bowl, put moringa leaf, ghee and salt. Add hot kodo millet to it and mix. Serve hot.

### Pickles

Boil 300 ml water with vinegar, sugar and salt. Meanwhile, slice radish and beetroot into thin rings and place into their own sterilized jars. After the water boils for 5-7 minutes, crush teff and add it to the water. Boil for 10 minutes on a low flame. Allow the pickles to cool slightly. When lukewarm, divide the pickling liquid between both the jars. Store in the refrigerator.

### Roast Vegetables

Slice pumpkin and sweet potato into same sized pieces. Transfer to a baking tray. Coat liberally in peanut oil and sprinkle with salt. Cook for 10-15 minutes at 180°C. Add fennel leaves and Malabar spinach leaves to the baked vegetable, mix and cook for 5 minutes.

### To Assemble

Put last night's Mandiya soup in a bowl. Add hot kodo millet with moringa leaf, boiled eggs, all the roast and pickled vegetables and enjoy!

Note: This recipe uses 2 kinds of millets, instead of rice, to make it lighter for an audience who isn't walking several kilometres every day. Living in Goa has made me appreciate vegetables that also travel, grow easily, and nourish in small quantities. In this recipe, a friend taught method of using hot grains to cook moringa leaves and ghee is another simple, yet delicious way to increase the nourishment in a meal, especially for women in need of iron.

## To Prepare

### Amaranth Dhirda

In a bowl sift bajra and nachni flour and add all other ingredients, except oil. Mix water and stir into a thin batter just enough to coat the back of a spoon. Heat a pan. Add few drops of oil and allow to heat. Take a round spoonful of batter and swirl over the pan evenly to coat the entire pan.

Take precaution not to make it thick. The batter should be evenly spread and must cover the entire pan. Place a lid on the pan and allow to cook for 3 minutes on a low flame. Lift the lid and release the steam. The pancake should have released itself from the sides by now. At this stage slowly remove the pancake and flip over to cook the other side. Make similar pancakes of 7" diameter pancakes, approximately 12.

### Garlic & Green Chilli Thecha [Chutney]

Blend green garlic, roasted peanuts and green chillies in a chopper to a coarse mix. In a pan, heat oil and add the coarsely grounded paste and cook for 3-5 minutes until slightly browned. Add salt and remove.

### Coconut & Turmeric Sauce

Make coconut milk by adding some warm water to the grated coconut. Blend in a mixer and squeeze the coconut milk out through a muslin cloth. In a pan heat ghee [clarified butter]. Temper with the cumin, fennel and the turmeric. Add the curry leaves while the ghee is hot. Reduce the flame and add few drops of water. Add the reserved coconut cream and blend in the tempering. Add the kokum, and add just enough water to make a thick sauce.

## To Serve

To serve, plate the amaranth dhirda with garlic and green chilli thecha and coconut and turmeric sauce.

Wash, drain and dry the mushrooms. When dry, quarter them and set aside. Deseed and dice an assortment of bell peppers. Peel and chop the onion. Cut the basil leaves thinly. Soak the foxtail millets for 30 minutes and cook in boiling water until fully done.

### Filling

Finish the mixture with finely chopped parsley and scallion.

Set aside, let cool. Sprinkle corn starch and mix well to bind the mixture. Form the mixture into little roundels with a dimple in the centre. Refrigerate for 1 hour. “

The idea for this dish stemmed from the monotony of tambdi bhaji as a household vegetable. My goal was to try and make this ordinary vegetable into something a lot more exciting than just a wilted homestyle preparation. Taking something globally recognised such as a Spanakopita and incorporating local Goan produce such as red amaranth and cashew butter gave the dish a completely new flavour profile without taking away from the delicate, buttery nature of filo pastry that we all love.

# local inspired spanakopita

## Ingredients

### For Red Amaranth Filling

Red amaranth leaves [tambdi bhaji]	500 gms
Onion, peeled and finely chopped	1 no
Garlic, peeled and finely chopped	2 cloves
White wine	60 ml
Salt and white pepper	to taste
Olive oil	10 ml

### For Cashew Butter

Unsalted cashew nuts broken or whole	50-75 gms
---	-----------

### For Pastry

Filo pastry	165 gms/9 sheets
[Store bought pastry is acceptable]	
Melted unsalted butter	250 gms
Silicone/kitchen brush	

## To Prepare

### Red Amaranth Filling

Wash and roughly chop the red amaranth leaves, and strain the excess moisture. In a pan, heat 1 tbsp of olive oil and begin by sautéing the garlic until fragrant and light brown. Add in the onions and sauté till translucent.

Deglaze the pan with white wine, reduce and add in the red amaranth. Immediately season the amaranth with salt to speed up the release of moisture, toss and sauté well for 2-3 minutes. Once all the water from the leaves has evaporated, adjust the final seasoning with salt and white pepper and set aside in a bowl to cool

### Cashew Butter

Roast the cashew nuts in an oven or pan on low to medium heat until golden brown. Set on a tray or plate to cool. Once cooled, blend in a mixer into a smooth paste until the natural oils of the cashews splits from the paste.

Using a spatula or whisk, add in the cashew butter to the cooked tambdi bhaji and mix well. Check the mixture for seasoning before setting aside. Cool in the fridge for at least 1-2 hours before shaping.

### Spanakopita

Lay out a single whole sheet of filo pastry as is from the packet. Ensure to cover the rest of sheets with a cloth to prevent them from drying out. Brush melted butter along all the sides of the filo pastry and random strokes in the centre of sheet. Be sure to be generous as we need the butter to make the sheets stick together.

Next, lay another sheet of filo on top of the first, ensuring to line up the edges as much as possible [to reduce wastage]. It's best if two people lay the sheet by holding all 4 corners of the sheet. Repeat the process until you have 3 sheets layered on one another. 3 sets of 3 layered sheets would yield 24 pieces which would be good for 6 servings.

Divide the layered filo sheets into 8 rectangular strips of equal size. To do this, fold the filo in half, crease lightly, and repeat again. Unfold the sheets, cut along the folded creases to get 4 even quarters of the sheet. Next, simply cut all 4 quarters in half again to obtain 8 even strips.

Brush the top 2 inches of each strip with butter to help seal each filo parcel. Spoon ½ tbsp of mixture at the bottom of each strip diagonally as shown in the picture. Take the bottom left corner of the strip and fold over the mixture by lining the bottom edge of the strip with the side edge, ensuring the mixture is encased under the filo pastry without any leaks. The fold should resemble a right angled triangle.

Then take the bottom tip of the triangle and fold vertically upwards to lock in the mixture. Take the bottom right corner of the triangle to match the bottom edge of the current triangle with the left edge of the filo sheet.

Repeat the process until you reach the top of strip and seal with the final edge brushed with butter.

Once all the Spanakopita are folded, lay on a baking sheet brushed with butter and bake in the oven at 180°C for 7-8 minutes and golden brown on all sides. Flip the Spanakopita halfway while baking to ensure the sides don't burn.

Serve hot and crisp straight out of the oven.

Tip: Spanakopita can be stored in the freezer for up to 2 weeks and can be baked directly frozen whenever you'd like. Ensure you store them wrapped individually in aluminium foil to avoid them sticking to each other.

Turn the tortilla dough out onto a lightly floured work surface and knead for 5 minutes until the dough is nice and smooth. Divide the dough into 12 equal portions. Place the dough between 2 butter papers and brush with olive oil and roll out the dough as thin as possible. Using a 6 cm diameter cutter cut them into perfect roundels. # foxtail millets with smoked lamb & mustard greens

## Ingredients

Foxtail millet	200 gms
Assamese smoked lamb, bite-size chunks	100 gms
Tender mustard greens	a small bunch
Asian pennyworth	a small vine
Carrots, peeled and diced	25 gms
Snow peas, steamed and chilled	25 gms
Spring onions, sliced thinly	10 gms
Fresh pineapple, diced	30 gms
Fresh peach, diced	25 gms
Sawtooth coriander, chopped	10 gms
Salt	to taste

## For Citrus Ginger Vinaigrette

Local orange, juice	1 no
Assam lemon juice	5 ml
Assam lemon rind	5 gms
Fresh pounded pepper	2 gms
Mustard oil	10 ml
Local ginger, juice	5 ml

## To Prepare

### Salad

Soak the foxtail millets for about 5-6 hours and then steam the millets using the double boiler method till the millets are cooked, soft and fluffy. Allow to cool.

In a pan, toss the diced smoked lamb in a little oil and give it a quick stir. Allow this to cool once off the flame. Season with salt and reserve till cooled.

In a mixing bowl, add the foxtail millet, smoked lamb, vegetables and fruits. Roughly tear the Asian pennyworth and tender mustard greens and mix into the salad. Combine the vinaigrette ingredients and mix well.

## To Serve

Add the dressing to the salad ingredients and mix lightly till all ingredients are well combined. Check for seasoning and serve.

Note: My grandmother's version of this salad was a one-pot meal which had everything that she grew in her backyard kitchen garden. Though the salad was very rustic, she would skillfully add chunks of smoked lamb that we were fond of to disguise our less favorite ingredients – the ones we always refused! I now make this visually appealing and more aesthetic salad in a variety of different ways.

Preparing smoked lamb in the traditional way is a complex, strenuous and time taking process. Artisanal smoked lamb is now available and makes a very good alternative to home smoked lamb.

Fire roasted potatoes and vegetables with seasonal fruits make a great vegetarian version of this recipe. Keep the dressing in its original avatar, since it is these flavours that connect this recipe to the Land of Blue Hills and the Red River.

“ Foxtail millet is available in Assam and has been consumed in many forms and ways for many generations and in the most common form of a “kheer” or Pudding. My grandmother was cognizant of the nutritional benefits of millets and stepped out of the norm to create interesting dishes and ensured her family ate nutritiously whilst also teaching us to respect the produce from our land. This recipe, is my version of her millet salad in gratitude and appreciation to the person who taught me the nuances of cooking and eating well.

In India, “kathal” or jackfruit is referred to as the meat of the vegetarians, as the fibrous texture of the cooked jackfruit is said to resemble that of cooked mutton [goat meat], and often served in vegetarian households for non-vegetarians as well. This recipe is a vegetarian take on the very popular Mexican taco and is recreated using an Indian inspired filling. With the omission of desi ghee [clarified butter] and the mayonnaise, this recipe works well for gluten-free and lactose-free diets.

### Turkish Adana Millet Kebab

Combine finger millet flour and 100 ml of warm water in a bowl and mix homogeneously. In a heavy bottom pan, add the olive oil. When the oil is medium hot, slowly incorporate the chopped onion and garlic. Once sautéed add the red bean mix and cook for a few minutes. Add the ground spices and seasoning. Allow to turn fragrant. Add the finger millet slurry and whisk until all moisture has evaporated and the mixture resembles a semi solid consistency. Divide the mixture into approximately 70 gms balls and affix to skewers. Smoothen the kebabs with wet hands and shape the mixture into long and flat kebabs. Keep refrigerated till required. Before serving, grill the kebabs over charcoal fire or a hot griddle, lightly brush with olive oil.

Wash the romaine lettuce and allow to crisp in ice cold water. Drain and keep aside. Combine the pre-cut vegetables. Add the palm vinegar, garlic powder, black salt and pepper power, lightly toss and set aside.

### Proso Green Garlic Wrap

Take a mixing bowl add all the ingredients

together, mix homogeneously. Allow the batter to ferment in a warm place for 20 minutes or until air bubble formations become visible on the batter surface. Lightly warm a non-stick frying pan or a smooth iron griddle. Lightly brush with olive oil, add ladle full [30 ml] of the batter in the centre of the pan and slowly swirl it to spread evenly on the entire surface of the pan. Cook covered on medium heat. Once light fluffy pancakes [8 inch diameter] are cooked on one side quickly turn them to cook both sides. Set them aside to cool.

### Roasted Carrot & Walnut Muhammara

Combine all pre-prepared in a food processor, except chopped mint, few walnut kernels and dried pomegranate seeds. Blend to a fine paste, adjust seasoning and fold in the mint leaves. Keep aside the walnut kernels for garnish.

## To Assemble

Make a simple arrangement on a rustic textured plate. Lay the proso and green garlic pancakes flat on a plate, spread a generous layer of roasted carrot and walnut muhammara on it. Tear out the lettuce leaves with hand and lightly toss with the marinated salad vegetables, line it up in the centre of the pancake and top it with 2 skewers of the millet kebabs. Lightly fold the pancakes in half vertically. You can also wrap a dry palm leaf around it and tie up with a jute thread in the centre. Serve a small portion of muhammara dip on the side garnished with olive oil, dried pomegranate seeds and walnuts.

Keep the dough covered with a damp cloth to prevent it from drying out. Dust some flour on to a rolling board and roll into a chapati, alternately roll the dough between 2 sheets of plastic. Heat a tawa [flat griddle] and place the rolled chapati on it.

Smear a little water on the top and allow any cracks that appear on the surface to smoothen out. Cook on both sides as you would a chapati. Remove and apply some ghee on one side. Repeat till all the dough has been prepared into rotis.

Note: Using freshly milled flour will give the best results [both easier to make and to eat].

### Kaccha Pakka Papaya

Heat oil in a pan and temper with the mustard seeds, cumin seeds and asafoetida. Add the curry leaves and green chilli and then add the papaya, salt and turmeric and mix well. Cook covered for a few minutes and transfer into a serving dish. Serve at room temperature.

## To Serve

Serve the ponk muthia nu shaak and the jowar rotis with the kaccha pakka papaya alongside.

Note: When fresh ponk is not in season, one can use dried sorghum. Soak the jowar millets and boil them in salted water. Drain and use in the recipe as you would ponk.

## khimsari bajre ka soyta

### Ingredients

Pearl millets, broken/crushed	330 gms
Green gram, whole, unpeeled	200 gms
Clarified butter	300 gms
Whole garam masala [cinnamon sticks, brown cardamom, peppercorns, bay leaves and cloves]	20 gms
Ginger paste	50 gms
Garlic paste	50 gms
Fresh tomato puree	200 gms
Yoghurt	200 gms
Water	1000 ml
Chilli powder	50 gms
Coriander powder	150 gms
Garam masala powder	10 gms
Turmeric powder	5 gms
Salt	18 gms
Tender mutton pieces	300 gms
Onions, julienned and deep fried to golden brown	10 gms

### Method

Begin by combining the broken pearl millets and green gms and soaking them in 500 ml of water at room temperature. Heat clarified butter in a skillet on a low flame. Add the whole garam masala items and roast them for a minute, until they turn brown and aromatic.

Toss in the garlic and ginger pastes and roast them for 10 minutes, stirring frequently. Stir in the tomato puree and allow it to cook for 15 minutes. Add the yoghurt, remaining water [500 ml], chilli powder, turmeric powder,

coriander powder, garam masala powder and salt and let it simmer for 30-35 minutes.

In the meantime, drain the soaked pearl millets and green gms with the help of a strainer. Add in the pearl millets and green gms and mutton pieces to the cooked yoghurt mixture. Cook on a continued low flame for 1.5 hours, while stirring the mixture on frequent intervals.

**Note:** This slow cooking technique is optimal in order for all the ingredients to incorporate. Keep stirring the mixture frequently to prevent it from sticking to the skillet.

Towards the end of the 1.5 hours, you'll find that the mutton has tenderised and the clarified butter begins to separate from the mixture. Your soyta is now ready. Turn off the cooking flame and place the skillet aside.

### To Serve

Garnish the soyta with powdered garam masala and fried onion juliennes. Serve the soyta hot, alongside some yoghurt, red chilli chutney and melted clarified butter.

### Notes:

- A vegetarian variant of this iconic soyta can be made by replacing the mutton with assorted vegetables in the same quantity.
- If you're cooking in colder climates, the cooking time of soyta could vary and take upto 2 hours, but ensure that you continue to cook the soyta over a low flame.

## tulsi honey & finger millet tea cake

### Ingredients

#### For Tulsi Honey & Finger Millet Tea Cake

Ripe banana	1250 gms
Black palm jaggery	260 gms
Tulsi infused honey	100 ml
Olive oil	90 ml
Walnuts, chopped	240 gms
Finger millet flour	610 gms
Wheat flour [gluten free]	410 gms
Flax seeds	20 gms

### To Prepare

#### Tulsi Honey & Finger Millet Tea Cake

Blend the banana with grated black jaggery in a blender till the jaggery completely dissolves in the mixture.

Add honey slowly and continue to blend. Take the mixture out in a bowl. Gradually add the olive oil into the blended mixture and mix well using a balloon whisk.

Add the dusted walnuts to the batter and mix. Now add the finger millet and wheat flour together in 4 to 5 batches, each time mixing the flour in the batter by cut and fold method, using a spatula to ensure gentle mixing.

Pour the ready batter in a greased and baking paper lined bread tin or alternatively use a Teflon coated cake mould.

Tap the filled up mould to ensure there are no air gaps in the batter. Sprinkle the flax seeds to cover the batter completely. In a preheated oven, bake at 180°C for 25 minutes. Allow to cool and demould.

Salt	5 gms
Sugar	5 gms
Olive oil	25 ml
Cold water	180 ml

### Tomato Sauce

Pelati tomatoes	200 gms
Olive oil	50 ml
Basil, fresh	15 gms
Garlic, peeled and chopped	20 gms
Sugar	to taste
Salt	to taste

### Breaded Chicken

Chicken thigh boneless	2 thighs
Eggs	2 no
Breadcrumbs	100 gms
Oil	for frying
Salt	to taste
Black pepper powder	to taste

### Balsamic Glaze

Balsamic vinegar	100 ml
Water	50 ml
Sugar	20 gms

### Pizza Topping

Mozzarella cheese, shredded	150 gms
Toasted almonds, slivered	8 gms
Parsley, chopped	5 gms
Native parmesan cheese, shaved	40 gms

## To Prepare

### 50% Amaranth Pizza Dough

Measure all the dry ingredients and mix together. Pour onto a smooth surface that

can be used to knead the dough. Make a well in the center of the flour and pour the cold water into it. Knead for approximately 5 minutes into a homogeneous dough.

Once a sticky dough has formed, slowly knead in the olive oil for another 10 minutes. Allow to rest for half an hour before equally dividing it into two dough balls.

Transfer to a greased, covered container [preferably with an airtight lid] and store in the refrigerator overnight. This process is known as 'Cold Fermentation' and allows for the dough to develop more complex flavours. The next morning, it should have doubled in size. Remove from the refrigerator an hour before baking to allow it to come to room temperature.

### Tomato Sauce

Blend the pelati tomatoes and keep aside. In a pan, heat the olive oil. Once hot, add the chopped garlic and sauté till translucent and aromatic. Just before it starts to turn golden, add the pureed pelati tomatoes. Add a little water to adjust the consistency and cook till the tomatoes no longer taste raw. Season with salt and sugar and take off the flame. Tear the basil leaves and add to the sauce. Mix well and refrigerate overnight.

### Breaded Chicken

Whisk the eggs and pour into a flat-bottomed container. Spread out the bread crumbs in another flat-bottomed container. Flatten the chicken thighs using a mallet. Marinate with salt and black pepper powder. Dip the chicken into the whisked egg. Allow the egg mixture to coat the

chicken on both sides before placing it into the breadcrumbs. Coat the chicken well with breadcrumbs and fry at 170°C for 8 minutes or until golden brown and cooked through.

Dice the fried chicken and reserve.

### Balsamic Glaze

Mix all three ingredients for the glaze in a pan, and simmer till it halves in volume. It should be sweet and sour and have a light syrup consistency. Allow to cool to room temperature and store in an airtight container.

### 50% Amaranth Pizza

Once the dough reaches room temperature, stretch each dough ball out into a circle with a diameter of 10 inches. Dock the center of the bases using a docker or a fork, leaving 1 inch of dough from the perimeter for the crust. Semi cook the bases in the oven at 300°C for 3 minutes each.

Top the semi cooked pizza base with tomato sauce, shredded mozzarella cheese and diced fried chicken. Transfer to the oven and cook each pizza at 300°C for 3 more minutes or until the cheese and crust are both golden.

## To Serve

Cut each pizza into six slices. Garnish with slivered toasted almonds, native parmesan cheese shavings and chopped parsley. Drizzle the balsamic glaze and serve hot.

# gaajar halwa crémeux, nachni carrot cake, candied carrot crisps

## Ingredients

### For Nachni Carrot Cake:

Nachni [finger millet] flour	70 gms
Castor sugar	90 gms
Baking soda	1.5 gms
Baking powder	0.5 gms
Carrot [orange or red], grated	115 gms
Orange juice, freshly squeezed	15 gms
Egg	1 large
Cinnamon powder	1 gms
Ginger powder	1 gms
Canola oil	20 gms
Salt	to taste

### For Gaajar Halwa Crémeux

Carrot [orange or red], grated	250 gms
Fresh carrot juice	350 gms
Whole milk	10 gms
Heavy cream	15 gms
Castor sugar	50 gms
Cardamom powder	5 gms
Cinnamon powder	2 gms
Grated nutmeg	2 gms
Saffron	1 gm

### For Candied Carrot Crisps

Red carrot	20 gms
Orange carrot	20 gms
Castor sugar	50 gms
Oil	for frying

## To Prepare

### Nachni Carrot Cake

Heat the oven to 170°C. Sift all the dry ingredients and mix together in a bowl. In another mixing bowl, combine [but do not whip] the sugar and eggs till the sugar dissolves.

Add in fresh orange juice and canola oil to

the egg mixture and combine well. Add the grated carrots to the bowl, and lastly fold in all the sifted dry ingredients and mix well until the contents form a smooth batter.

Pour the batter equally into 6 dome shaped silicone molds [~weight = 55 gms each] and bake for 12-14 minutes or till a toothpick inserted into the cake comes out clean.

Once baked, remove, and let the 6 carrot cakes cool down in their mold for ~30 minutes, before demolding.

Set aside at room temperature or refrigerated till you're ready to construct the dish.

### Gaajar Halwa Crémeux

In a pan, cook the grated carrots on a medium flame for about 5-6 minutes. Add the cardamom powder, cinnamon powder, grated nutmeg and saffron, and sauté further for another 2-3 minutes.

Add the fresh carrot juice, and milk, and continue cooking till the grated carrots get soft and tender. Once the carrots are cooked completely, add in the sugar and cream and bring the pan contents to a boil. Take off the flame and transfer to a bowl to cool down. Once cooled, process the carrot mixture to a smooth paste in a blender or food processor. Strain the paste through a sieve to remove any lumpy solids and set aside.

Transfer the carrot halwa mixture to a whipping siphon and charge with nitrogen, shaking well to create the perfect foam.

Refrigerate in the charged siphon till you're ready to construct the dessert.

### Candied Carrot Crisps

Peel the carrots, and then using a mandolin, shave thin carrot slices lengthwise. Place the carrot slices on a silicone mat and cover them with another silicone mat to keep them flat.

Dehydrate the silicone mat sandwiched carrot slices overnight or for 24 hours in a dehydrator. If you don't have a dehydrator, you can achieve the same using an oven on very low heat.

The carrot slices will dehydrate but will remain chewy like jerky. Remove the dehydrated carrot slices and store in an airtight container.

Before serving, flash fry the carrot slices at 180°C for a few seconds till crisp. Remove on paper napkins to absorb all excess oil. Dust the crisp fried carrot chips with icing sugar and set aside.

## To Assemble

Place a carrot nachni cake hemisphere in the center of a plate. Shake the chilled whipping siphon contents vigorously and discharge the halwa crémeux foam over the carrot nachni cake covering it completely.

## To Serve

Cover with candied carrot chips and dust with a sprinkling of cardamom powder.

### Coconut Nutmeg Foam

Mix the coconut cream and the nutmeg powder, keep it in a cool place. Pour the sauce in the foam gun. Pass it through the nitrogen charge and collect in a bowl.

## To Assemble

Demould the pudding from a mould or cut an appropriate size from the tray the pudding has been set in.

## To Serve

Place the pudding on a plate. Cut the fruits and arrange on the side of the pudding. Pour a spoonful of the foam on the pudding and serve immediately.

Coconut sugar	100 gms
Unsalted butter	100 gms
Star anise, powder	5 gms
Salt	1 gm
Kodo millet, puffed	30 gms
Charoli nut, lightly toasted	50 gms

### Nolengud Baked Yoghurt

Black sesame jaggery brittle [chikki]	6 nos
Edible flowers	8 nos

## To Prepare

### Kodo Millet & Charoli Streusel

In a mixing bowl, add softened unsalted butter, coconut sugar, kodo millet flour, almond flour, star anise powder and salt. Combine all ingredients to form a dough.

Chill this mixture for an hour in the refrigerator. To bake the streusel, preheat the oven to 175°C. Place parchment paper/silicon mat on a baking tray. Loosely break up the chilled streusel mixture to form chunk size crumbs. Bake the crumbs at 175°C for 15 minutes.

Remove from the oven and allow to rest. Add the puffed kodo millets and toasted charoli nuts to the streusel mixture. Reserve in an airtight container, till required.

### Nolengud Baked Yoghurt

Combine nolengud jaggery and hung yoghurt and whisk together until no lumps remain. Fold in the cream and melted chocolate till all ingredients are well combined.

To bake the yoghurt, preheat the oven to 175°C. Prepare a double boiler by pouring water into a deep bake proof tray. Portion the reserved streusel equally into bake proof bowls.

Pour the baked yoghurt mixture over the streusel and equally between all the bowls and place the bowls into the double boiler. Bake the yoghurt at 175°C for 8–10 minutes. Remove from the tray, wipe down the bowl to remove any water stains and refrigerate.

## To Serve

Toss the in-season berries [or fruits] lightly with orange rind. Garnish with tossed berries and edible flowers and serve with black sesame jaggery brittle.

Note: While nolengud is available mainly in the winter months and has its own unique taste, texture and immunity boosting properties, date palm jaggery [grated and cooked with minimum water to make a thick syrup], maybe alternated in this recipe.

Opportunities to include millets in dessert contemplations are endless. Their nutritional credentials are supported by their mild to nutty taste profiles and creamy, fluffy and crisp textures.

### For Spiced Chocolate Millet Mousse

Pearl millet	100 gms
Water	50 gms
Milk	350 ml
Brown sugar	120 gms
Fresh cream	50 gms
Dark chocolate	150 gms
Allspice powder	5 gms
Cinnamon powder	2 gms
Clove powder	2 gms
Ginger powder	2 gms

### For Ganache

Fresh cream	100 gms
Dark chocolate	100 gms
Salt	a pinch

### Millet Crumble For Garnish

Use the leftover crumble base mixture for garnish.

## To Prepare

### Crumble Base

Roast 250 gms of pearl millets in a pre-heated oven at 150°C for 5 minutes and make a fine powder in a mixer or a food processor. Cool down the millet flour. In a baking tray, mix together the millet flour, brown sugar and salt. Chop 50 gms of

the cold butter into cubes and add it to the flour mix. Using the fingertips, rub the flour mixture and butter together until it resembles a wet crumble texture. Press the sand like mixture on the baking tray to form a thin, even layer.

Bake in a pre-heated oven at 180-190°C for 15-20 minutes, making sure to mix the crumbs half way through baking. Once cooled completely, crush the crumble, and add the remaining 20 gms of melted unsalted butter. Mix till all the crumb is hydrated.

Pour 150 gms of this mixture into a lined cake ring of 6 inches and press down firmly to create an even base. Refrigerate until firm. Retain the remainder of the crumble mixture for garnish.

### Mousse

Soak 100 gms of millet in 50 ml of water for 20 minutes. Put the soaked millet in a pot. Add 350 ml milk and bring to a boil. Reduce the heat to low and cook for 15-16 minutes, while stirring occasionally.

Once all the liquid has been absorbed, shift the millet mixture to a bowl let it cool completely. Make a smooth paste in a mixer or a food processor and reserve the millet paste. In a fresh sauce pan heat the fresh cream and the chopped dark chocolate together and add the brown sugar.

Mix until dissolved. Shift the chocolate mixture to a mixing bowl. Stir in all the spice powders into the chocolate mixture. Mix well. Add the millet paste into the chocolate mixture while the chocolate mixture is still slightly warm. Mix well and allow to cool. Spread the cold chocolate - millet cream on top of the crumble base and refrigerate overnight.

### Ganache

Chop the chocolate into fine pieces and place in a bowl. Heat the cream until it just begins to boil and pour over the chocolate. Let it sit for 30 seconds and then stir together until all the chocolate is melted and no lumps remain. Mix in the salt. Once thick and cooled completely, transfer into a piping bag with nozzle of choice and pipe over the set mousse cake.

### To Serve

Remove the cake from the ring and cut into 6 equal pieces. Garnish with the millet cracker set aside earlier. Serve cold.

# Acknowledgments

On behalf of the Presidium of Indian Federation of Culinary Associations [IFCA], I wish to thank all the chefs who have contributed their signature creations to make 'milletology - a recipe collective by celebrated chefs', possible.

Our President, Chef Manjit Singh Gill's vision of this collection of millet-centric recipes, has taken a very inclusive and collaborative form, clearly visible in every chef's unique recipe showcased in this book. The inclusion of our country's heritage millets, pseudo cereals and indigenous ingredients in their restaurant menus, conveys the chefs' commitment to the resurgence of millets, improved nutrition and food security.

The Presidium would like to extend its gratitude to the editorial board, headed by Chef Madhu Wadhvani Krishnan for the dedication and unstinting effort in producing this keepsake worthy book, ably supported by Chef Debraj Bhaumik, Chef Nitin Shende and Chef Gunjan Goela.
