

# ENVOI™

500mg CBD per bottle  
30 (1mL) servings per bottle

**ENVOI Full Spectrum Hemp Oil** contains everything the plant contains; all the terpenes, cannabinoids, flavonoids, fatty acids, including trace amounts of THC, and helps create the Entourage Effect.

### Why Use It

Envoi Full Spectrum Hemp Oil is packed full of the beneficial compounds abundant in the hemp plant, including terpenes, cannabinoids and flavonoids that help create the entourage effect, a phenomenon that results when the compounds within the hemp plant interact with the human body to produce a stronger influence than just one of those compounds alone. Each serving provides 16.7 mg of cannabidiol (CBD) and 0.8 mg of cannabigerol (CBG) to support the normal-range functioning of our Endocannabinoid System. Envoi Hemp Oil is derived from pure, full-spectrum hemp oil, and is combined with heart-healthy MCT oil, peppermint extract and stevia extract to ensure that each serving is not only beneficial, but also tastes good!

Full spectrum hemp oil with CBD and CBG

### When To Use It

Shake well before each use. Fill dropper and release under tongue; hold for 60 seconds then swallow. Store away from humidity, heat and light. Take one to two times daily.

Please be advised that the laws and regulations governing the possession and sale of hemp-derived products, including Cannabidiol (CBD), vary greatly throughout the country. It is currently illegal to possess or sell hemp-derived products, including CBD, in certain states, including South Dakota and Idaho. Any distributor possessing and/or selling hemp-derived/CBD products in a state, district, or territory where hemp/CBD is illegal does so at their own risk. Lifocity, Inc expressly disclaims any liability for distributors or customers illegally possessing or selling any Lifocity, Inc. product containing hemp. Lifocity, Inc encourages distributors and customers to stay abreast of all applicable state and federal law in this ever-changing regulatory environment.

FEATURE	BENEFIT*
INDUSTRIAL HEMP	High CBD content Low THC; cultivated and regulated to contain < 0.3% Nonpsychoactive 100% US grown Grown according to organic farming standards
CBD (CANNABIDIOL)	A nonpsychoactive chemical compound found in the cannabis plant Also called, phyto-cannabidiol Supports the body's Endocannabinoid System (ECS)

## Common Questions & Answers:

### Q: What is Envoi?

**A:** Envoi is a line of quality hemp products that are designed to help you feel good and are loaded with phytocannabinoid compounds that are gaining recognition in the health and wellness world for their support of the body's endocannabinoid system and positive impact on our health.

### Q: What are the benefits of hemp CBD products?

**A:** The CBD found in Envoi Full Spectrum Hemp Oil products supports the body's endocannabinoid system, which is responsible for regulating recovery and repair processes. CBD promotes overall well-being and may help improve mood and sleep. CBD may be beneficial to:

- Non-cystic acne
- Menstrual cramps
- Helps stabilize mood

### Q: Can Envoi be purchased legally in all 50 states?

**A:** Although the 2018 Farm Bill removed hemp-derived CBD products (with less than 0.3% THC on a dry weight basis) from the list of Controlled Substances, the legislation does not legalize the sale and possession of CBD generally across the country. The laws and regulations governing the possession and sale of hemp-derived products, including CBD, vary greatly from state to state. For example, it is currently illegal to possess or sell CBD in South Dakota and Idaho. Before purchasing CBD, we strongly advise you to check the applicable laws and regulations of the state in which you reside, or in which you plan on purchasing CBD.

### Q: Will the CBD in Envoi Full Spectrum Hemp Oil get me high?

**A:** Our products are manufactured with extracts of the off-spring of the Cannabis plant (Cannabis Sativa L), which is more commonly known as industrial hemp. THC is the psychoactive compound found in the marijuana plant that gets people "high." The relatively low amount of THC found in the industrial hemp plant is considered a trace amount and doesn't produce the intoxicating effects of marijuana. In addition, we take steps to ensure our products are federally compliant and contain less than 0.3% THC concentration on a dry weight basis.

### Q: What is the difference between full spectrum and broad spectrum CBD?

**A:** Full spectrum CBD contains trace amounts of THC (but no more than the federal limit) while broad spectrum CBD is THC free. Both contain the terpenes, cannabinoids, flavonoids, and fatty acids found in the hemp plant that are known for their beneficial effects. Consumers are more likely to experience the "entourage effect" with full spectrum CBD, however, broad spectrum products may be a better choice for individuals that don't want any trace of THC in their system.
