On behalf of all our team, welcome to Robina Town Dental.

We are dedicated to helping you achieve and maintain a natural, beautiful smile.

Located in the Robina Town Shopping Centre, we are committed to providing you with the very best quality dentistry, and will always consider you our first priority. We pride ourselves on being leaders in dental technology, investing in modern, state-of-the-art dentistry treatments and in-house facilities to help you recapture the essence of your smile.

For the team at Robina Town Dental, dentistry is not just about treating concerns or improving smiles, it's about treating people. We want you to understand and feel comfortable with the treatments we recommend. We want you to enjoy your experience with us and to know that we can help you to look and feel great, and live a better life

While developing your treatment plan with you, we will take the time to fully explain each procedure and tailor our treatments to your personal needs. We encourage you to ask questions as we want you to be fully involved and informed about your dental health care.

It is the goal of every member of our team to see you smile for life.

Orthodontics

An excellent solution for correcting misaligned teeth, orthodontics can be undertaken either as a single treatment or in conjunction with other cosmetic procedures. Orthodontics has come a long way from the days of bulky, heavy, metal wires and brackets. At Robina Town Dental, our goal is to help children and adults achieve an ideal bite and a straight, healthy and beautiful smile for life.

Our team is experienced in Orthodontics for all ages. We treat children and teenagers with functional or growth appliances and full fixed orthodontics. We also love changing the smile of adult patients with 'invisible' removable orthodontics or translucent fixed braces that blend with your teeth, making them much less noticeable than stainless steel braces. We are also proud to be one of the first in Australia to offer DNA appliances to our patients. The DNA appliance allows the body to gently correct the positions of the teeth in its own natural way, instead of using mechanical forces.

Cosmetic and Rehabilitative Dentistry

Smile Makeovers

Cosmetic dentistry blends modern dental science with creativity and vision to create a smile that appears natural, functions efficiently and enhances your quality of life. To achieve this, our team will develop a personalised treatment plan, which may include:

Porcelain Crowns and Veneers

Combining great strength, function and a natural appearance, crowns provide strength and support to a tooth that has become weak. Crowns are created by our on-site ceramist, allowing you to leave your appointment with a beautiful, strong and natural-looking new smile.

Where a crown encases a tooth, porcelain veneers are finely crafted shells of porcelain placed on the front surface of your teeth to mask discoloration, chips, close gaps and improve the appearance of slightly crooked teeth for a straighter smile.

Porcelain Bridges

An effective solution for replacing one or several missing teeth, bridges prevent your adjacent and opposing teeth from moving out of alignment. A bridge is supported by crowns secured to teeth on either side of the space.

Tooth Whitening

The desire for an attractive white smile has made teeth whitening treatments a very popular cosmetic dental procedure. In-chair and at-home whitening is available, and each is a fast and effective way of making a dramatic difference to your smile. Often offered as a treatment to complement other dental procedures, whitening can only lighten natural teeth, therefore existing restorations may need to be replaced to match your new smile.

Every member of the Robina Town Dental team is committed to helping you achieve a beautiful, natural looking smile for life.

Implant Dentistry

Dental implants are an ideal solution for replacing missing teeth. They mimic natural teeth in function, feel and appearance and, unlike other tooth replacement alternatives, they do not rely on adjacent teeth, metal clasps or adhesive gel for support, as they bond with the jawbone similar to the root of a natural tooth.

Implants are able to replace single teeth, multiple teeth or secure loose and uncomfortable dentures.

Neuromuscular Dentistry

For some people, instead of being a time of rest and relaxation, sleep is followed by chronic headaches, migraines and neck or shoulder pain. Surprisingly, the cause may not be a back or muscle complaint but a misalignment of your teeth and jaw.

At Robina Town Dental we have extensive experience and advanced technology to diagnose and correct jaw misalignment, alleviating discomfort and restoring your quality of life.

Following our treatment, you may experience decreased or eliminated pain and discomfort, resulting in better overall health. Once your symptoms are relieved and your bite is stabilised, we may permanently adjust your bite to its optimal position.

Oral Hygiene

Achieving and maintaining your oral health will do more for you than help keep your breath fresh and your natural teeth looking bright. Good oral health is also vital for your overall general health, as several studies have shown a link between poor oral health and other concerning conditions such as an increased risk of heart disease, miscarriage, stroke, type II diabetes and cancer.

Attending regular oral health examination and cleanings will enable the Robina Town Dental team to detect and treat concerning issues while they are still in their early stages, thereby eliminating the need for more extensive treatment procedures, which is usually required when concerns evolve.

We know you will enjoy meeting the friendly, professional team at Robina Town Dental.

For all of us, dentistry is about caring for individuals, not just treating dental concerns. We will take the time to fully explain each procedure as we tailor your treatment, and we want to hear your questions too. Dedication to helping you achieve and maintain a natural, beautiful smile is our focus at Robina Town Dental.
