Chairman's Address

Dear Shareholders,

I am pleased to enclose the 16th Annual Report of BKI Investment Company Limited (BKI) for the year to 30 June 2019.

During the year, BKI reached the milestone of trading on the ASX for 15 years, having listed in December 2003. Since that time, BKI has:

- Grown its shareholder base from 7,832 in 2003 to almost 18,000;
- Increased Total Assets from \$171m to \$1.3b;
- Paid out over \$640m to shareholders in Dividends and Franking Credits;
- Distributed seven Fully Franked Special Dividends; and
- Reduced the MER from 0.69% in 2003 to 0.17% in 2019.

Result Highlights

Investors' chase for growth has continued, resulting in 2019 being a turbulent year for markets. The S&P/ASX 300 Accumulation Index increased by 11.4% over the year. However, it was a tale of two halves, with the market dropping 7.0% between July and December 2018, before rallying an incredible 19.8% between January and June 2019.

We have been able to deliver another solid result for our shareholders in a market dominated by volatility and uncertainty. Net Operating Result before special investment revenue increased from \$44.2m to \$49.2m, an increase of 11%. Basic Earnings per Share before special investment revenue was 6.75cps compared to 7.10cps last year, as the number of issued shares increased significantly following the 2018 entitlement offer.

Positive contributors to this result include increased dividends from Woodside Petroleum, New Hope Corporation, BHP Limited, Macquarie Group, Transurban Group, Sydney Airport and Lindsay Australia, while lower dividends from National Australia Bank, Telstra Corporation, Suncorp Group, Invocare Limited and LendLease Limited detracted from the result. Revenue from bank deposits continues to be low.

BKI received \$27.98m in Special Investment Income during 2019FY, compared to \$0.8m in 2018FY. BKI received \$4.35 million in special dividend income over the year from Telstra Corporation, QUBE Logistics, IAG Insurance, Suncorp Group, Woolworths Group, BHP Limited, Wesfarmers Limited and Milton Corporation, compared to \$0.79 million of special dividends received in 2018. BKI also received special investment income totalling \$15.54 million from off market buy-backs conducted by BHP Limited and Caltex Limited, and a further \$8.09 million from a non-cash demerger dividend from Wesfarmers. This demerger dividend wasn't paid in cash, but instead BKI was issued new shares in the newly listed Coles Group Limited.

Total Shareholder Return including franking credits for the year to 30 June 2019 was 11.6%, compared to the S&P/ASX 300 Accumulation Index, which returned 13.5% over the same period. BKI has delivered a Total Shareholder Return including Franking Credits of 10.4% per annum over a 15 year period compared to the S&P/ASX 300 Accumulation Index, which returned 10.6%.

BKI's Net Portfolio Return (after all operating expenses, provision and payment of both income and capital gains tax and the reinvestment of dividends) for the year to 30 June 2019 was positive 9.4%.

Dividends

In the lead up to the Federal Election, we were overwhelmed by the level of angst in the investment community regarding Labor's proposal to eliminate cash refunds of excess franking credits. In response to a possible change in franking credit policy, the Directors of BKI declared a Fully Franked Special Dividend of 1.50cps in the first half. The BKI Directors have also agreed to distribute to shareholders another Fully Franked Special Dividend of 1.00cps with the full year result.

Including the two Special Dividends, the BKI Board has declared total dividends of 9.825cps in FY2019, up from 7.325cps paid last year. Like all previous dividends paid to shareholders, all FY2019 dividends are fully franked.

Following payment of the 2019 dividends, BKI will have approximately \$16.75m of imputation credits available for future dividends.

Dividend Key Dates

The last trading date to be eligible for the FY2019 Final Dividend is Thursday 8 August 2019. Key dates for the fully franked Final Dividend are as follows:

Event	Date
Last trading date to be eligible for the Final Dividend	Thursday 8 August 2019
Ex-Dividend Date	Friday 9 August 2019
Record Date	Monday 12 August 2019
DRP Nomination	Tuesday 13 August 2019
Payment Date	Thursday 29 August 2019

BKI’s Dividend Reinvestment Plan (DRP) offers shareholders the opportunity to acquire further ordinary shares in BKI. The DRP will not be offered at a discount. To obtain access to a DRP form please visit the following webpage: www.bkilimited.com.au/dividend-reinvestment-plan/

BKI focuses on investing for the long term in profitable, high yielding, well managed companies that ultimately deliver wealth for BKI shareholders, through an increasing fully franked dividend and capital growth. The chart below shows how powerful compounding can be by reinvesting the dividends that have been paid by BKI over the last 14 years.

Chairman's Address (continued)

In this example, an investor who spent the equivalent of \$10,000 to purchase BKI shares upon listing in December 2003 and reinvested those dividends, would have received fully franked dividends of \$1,943 in a rolling 12 month period. The franking credits enhance the income by a further \$833 (total income of \$2,776). The same investment in a term deposit (based on the cash rate + 0.50%) would be earning \$357pa with no franking credits.

Dividend Reinvestment Plan (DRP)

BKI's DRP will be maintained, offering shareholders the opportunity to acquire further ordinary shares in BKI. The DRP will not be offered at a discount. The DRP price will be calculated using the average of the daily volume weighted average sale price of BKI's shares sold in the ordinary course of trading on the ASX during the 5 trading days after, but not including, the Record Date (Monday 12 August 2019).

Management Expense Ratio (MER)

BKI's MER as at 30 June 2019 was 0.17%. The Board & Portfolio Managers are shareholders in BKI, we invest for the long term and do not charge excessive external portfolio management fees or any performance fees. We focus on creating wealth for all shareholders by keeping costs low and increasing fully franked dividends and capital growth.

Outlook

We believe the momentum in our equity market could continue to be driven by macro factors rather than company fundamentals. Yet these macro conditions are out of our control, and it is easy to get caught up in the negative. We expect there will be several periods of opportunity for long term investors in the year ahead and that patience will pay off.

The recent chase for growth is just one segment of the market. As we see continued pressure on the official cash rate, many investors who rely on income will now become reluctant to invest further into cash products. We believe that this situation will continue to encourage investors into equity markets and in particular into stocks that are offering attractive and sustainable dividend yields.

BKI is well placed to take advantage of this situation offering shareholders and potential future investors an attractive fully franked dividend yield. Using the 3.625cps interim dividend and 3.70cps final dividend, the BKI current dividend yield is 4.6%, grossed up to 6.5%, based on a tax rate of 30% and a share price of \$1.60. Including the 1.00cps special dividend declared today, the BKI dividend yield increases to 5.2%, grossed up to 7.4%, assumes a tax rate of 30% and a share price of \$1.60.

Chairman's Address (continued)

BKI is also well positioned with a portfolio of high quality dividend paying stocks. BKI's cash represents approximately 8% of the portfolio and we have no debt. We will continue to ensure BKI achieves its goals of investing for the long term in profitable, high yielding, well managed companies.

On behalf of my fellow Board members and the investment managers, I would like to thank you for your ongoing support of BKI and wish you all the very best for the year ahead.

Robert Millner
Chairman

Portfolio Manager's Report

Dear Shareholders,

Contact Asset Management, as the Portfolio Manager of BKI Investment Company, is pleased to include our report for FY2019.

Market Commentary

The momentum in our equity market continued to be driven by macro factors rather than company fundamentals. Over the last year, we have seen the conclusion of the Royal Commission into the Australian banking system, a devaluation of Australian house prices and worries over a global trade war escalation. We have also experienced important and meaningful outcomes in both State and Federal elections.

In the last quarter of the financial year, concerns of a domestic and global growth slowdown are being confirmed with interest rate cuts. The Reserve Bank of Australia has now lowered the official cash rate to a new record low of 1.0%. It is the first back-to-back cut since 2012, aimed at underpinning employment growth and provide greater confidence to the consumer and the homeowner.

Overall it has been an exciting 12 months, with the S&P/ASX 300 Index again generating very strong returns.

The half-yearly reporting season ended with many good quality companies delivering stronger than expected results and company guidance that reflected more buoyant market conditions. Capital management initiatives were also front of mind, with many management teams having the confidence to focus on investing for the future. Announcements of share buybacks, acquisitions and general business investment have been driven by stronger balance sheets, strong cash flows and improved operational certainty. For long-term investors this is certainly a welcome change from achieving earnings growth simply through cost out programs.

However, there are areas of concern that may influence the market direction during the August reporting season. We are concerned around a global growth slowdown. Many stocks in our market are trading on very high multiples and may not be supported by earnings growth when they provide the market with full year results.

BKI's total investments over FY2019 was approximately \$190.0m, with disposals of approximately \$76.6m.

Performance

BKI's short-term performance has improved. Total Shareholder Return including franking credits for the year to 30 June 2019 was 11.6%, compared to the S&P/ASX 300 Accumulation Index, which returned 13.5% over the same period.

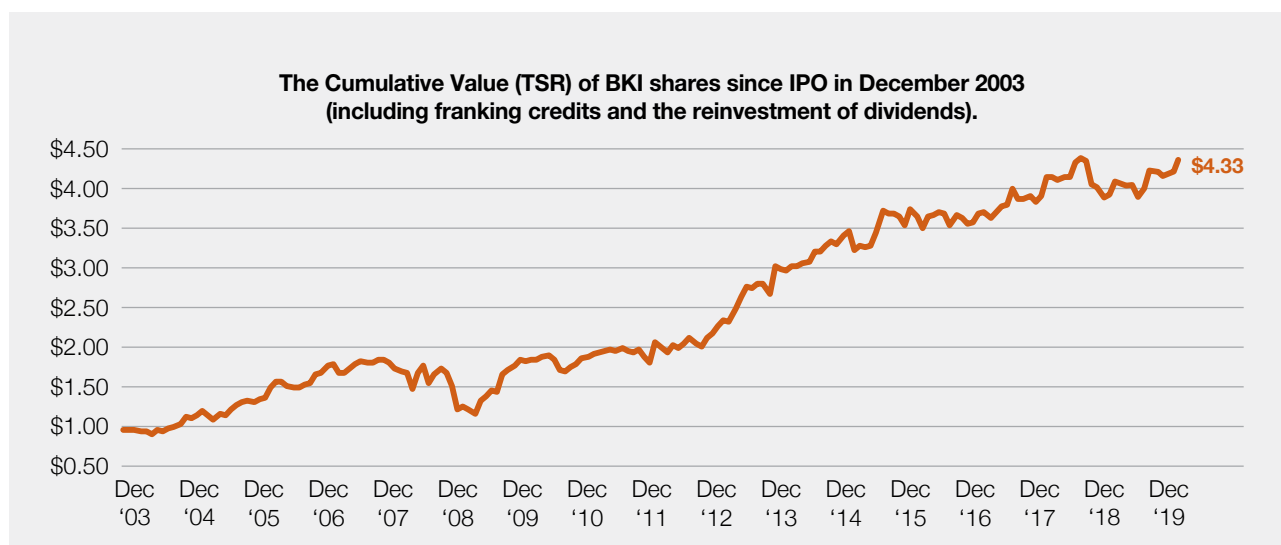

BKI's Total Shareholder Returns including Franking Credits for 15 years has delivered 10.4% per annum, compared to the S&P/ASX 300 Accumulation Index, which returned 10.6% over the same period.

Portfolio Manager's Report (continued)

BKI's Net Portfolio Return (after all operating expenses, provision and payment of both income and capital gains tax and the reinvestment of dividends) for the year to 30 June 2019 was 9.4% compared to the S&P/ASX 300 Accumulation Index, which returned 11.4% over the same period.

There continues to be significant long-term value created by owning BKI shares. BKI focuses on investing for the long term in profitable, high yielding, well managed companies that ultimately deliver wealth for BKI shareholders, through an increasing fully franked dividend and capital growth. The chart below shows how powerful compounding can be by reinvesting the dividends that have been paid by BKI over the last 15 years.

4. Principal Activities

Principal activities of the Group are that of a Listed Investment Company (LIC) primarily focused on long term investment in ASX listed securities. There were no significant changes in the nature of those activities during the year.

5. Operating Results

BKI's Total Ordinary Revenue from its investment portfolio was \$52.3m, 10.0% higher than 2018, driving a 11.1% increase in Net Operating Result before special investment revenue to \$49.2m from \$44.2m in 2018. Basic and diluted earnings per share before special dividend income was down 4.9% to 6.75cps.

Positive contributors to this result include increased dividends from Woodside Petroleum, New Hope Corporation, BHP Limited, Macquarie Group, Transurban Group, Sydney Airport and Lindsay Australia, while lower dividends from National Australia Bank, Telstra Corporation, Suncorp Group, Invocare Limited and LendLease Limited detracted from the result. Despite a gradual decrease in rates being offered on cash products, revenue from bank deposits was much higher than the previous year due to BKI's higher cash levels.

Directors' Report (continued)

9. Significant Changes in the State of Affairs

Other than as stated in this Directors' Report and in the accompanying Financial Report, there were no significant changes in the state of affairs of the Group during the reporting year.

10. Likely Developments and Expected Results

The operations of the Group will continue with planned long term investments in Australian equities and fixed interest securities. The Group will continue its strategy of investing for the long term in a portfolio of assets to deliver shareholders an increasing income stream and long term capital growth. The success of this strategy will be strongly influenced by the performance of the underlying investee companies, their share price movements, and capital management and income distribution policies.

The performance of these companies will be influenced by general economic and market conditions such as economic growth rates, interest rates and inflation. Performance could also be influenced by regulatory change. These external conditions are difficult to predict and not within the control of the Group, making it difficult to forecast the future results of the Group.

However, BKI is a research driven, long term manager focusing on investing in well managed, profitable companies. Stock selection is bottom up, focusing on the merits of individual companies rather than market and economic trends. The Group will continue to implement prudent business practice to allow the achievement of the Group's Corporate Objectives and Business Strategy.

14. Directors' and Officers' Indemnity

The Constitution of the Company provides indemnity against liability and legal costs incurred by Directors and Officers to the extent permitted by the Corporations Act 2001.

Directors' Report (continued)

16. Non-audit Services (continued)

The Board of Directors has considered the non-audit services provided during the previous financial year and is satisfied that the provision of those non-audit services by the auditor (or by another person or firm on the auditor's behalf) during the year is compatible with, and did not compromise, the audit independence requirements of the Corporations Act 2001 for the following reasons:

- all non-audit services were subject to the corporate governance procedures adopted by the Company and have been reviewed by the Board to ensure they do not impact upon the impartiality and objectivity of the auditor; and
- the non-audit services do not undermine the general principles relating to auditor independence as set out in APES 110: Code of Ethics for Professional Accountants issued by the Accounting Professional and Ethical Standards Board, as they did not involve reviewing or auditing the auditor's own work, acting in a management or decision making capacity for the Company, acting as an advocate for the Company or jointly sharing risks and rewards.

20. Remuneration Report (Audited)

This remuneration report outlines the Director and Executive remuneration arrangements of the Group in accordance with the requirements of the Corporations Act 2001 and its Regulations. For the purposes of this report, Key Management Personnel of the Group are defined as those persons having authority and responsibility for planning, directing and controlling the major activities of the Group, directly or indirectly.

The Company has externalised its investment management function to Contact Asset Management Pty Limited, and currently has no employees. In addition to the Directors, the only individual classified as Key Management Personnel is Mr Jaime Pinto, the Company Secretary, and there are no Other Key Executives.

Remuneration Policy

The Board is responsible for determining and reviewing remuneration arrangements, including performance incentives, for the Directors themselves and the Company Secretary. It is the Group's objective to provide maximum shareholder benefit from the retention of a high quality Board and Executive team by remunerating Directors and Key Management Personnel fairly and appropriately with reference to relevant employment market conditions, their performance, experience and expertise.

Directors' Report (continued)

20. Remuneration Report (Audited) (continued)

Elements of Director and Key Management Personnel (KMP) remuneration

The Board's policy for determining the nature and amount of remuneration for Key Management Personnel of the Group is as follows:

- The remuneration policy is developed by the Remuneration Committee and approved by the Board after professional advice is sought from independent external consultants.
- All Key Management Personnel are to receive a base fee, or salary and superannuation, combined with performance incentives.
- Performance incentives are only paid once predetermined key performance indicators have been met.
- Incentives paid in the form of shares are intended to align the interests of the Key Management Personnel with those of the shareholders.
- The Remuneration Committee reviews the remuneration packages of Key Management Personnel annually by reference to the Group's performance, KMP performance and comparable information from industry sectors.

The performance of Key Management Personnel is measured against relative market indices and financial and strategic goals approved by the Board and as agreed with each KMP. Performance is measured on an ongoing basis using management reporting tools. Performance for the assessment of incentives is performed annually, based predominantly on the growth of shareholder and portfolio returns. The Board may exercise discretion in relation to approving incentives and can recommend changes to the Committee's recommendations. Any changes must be justified by reference to measurable performance criteria. The policy is designed to attract the highest calibre of KMP and reward them for performance results leading to long-term growth in shareholder wealth.

All remuneration paid to Key Management Personnel is valued at the cost to the Group and expensed.

The Board's policy is to remunerate Non-Executive Directors at market rates for time, commitment and responsibilities. The Remuneration Committee determines payments to the Non-Executive Directors and reviews their remuneration annually, based on market practice, duties and accountability. Independent external advice is sought when required. The maximum aggregate amount of fees that can be paid to Non-Executive Directors is subject to approval by shareholders at the Annual General Meeting.

Performance-based Remuneration

BKI has previously established the BKI Incentive Scheme to form part of the remuneration packages of the Group's executive team.

The aims of the BKI Incentive Scheme are:

1. To promote superior performance at BKI over both the short and more importantly, long term.
2. To ensure remuneration is fair and reasonable market remuneration to reward staff.
3. To promote long term staff retention and alignment.

As at 1 July 2018 and as at the date of this report the only participant in the BKI Incentive Scheme was Mr Jaime Pinto.

To achieve the objectives of BKI, the BKI Incentive Scheme is required to include several components with separate measurement criteria.

Short Term Incentive

The Short Term Incentive is determined by reference to annual Total Portfolio Return compared to the S&P ASX 300 Accumulation Index. BKI's Total Portfolio Returns are measured by the change in pre tax NTA and are after all operating expenses, payment of both income and capital gains tax and the reinvestment of dividends.

The Short Term Incentive is paid by way of BKI shares purchased on market by the Company.

For the 2019FY the Short Term Incentive for the Company Secretary was set at 15,000 BKI shares.

Directors' Report (continued)

20. Remuneration Report (Audited) (continued)

100% of the Short Term Incentive is based on the Total Portfolio Returns as follows:

BKI Total Portfolio Return Compared to S&P/ASX 300 Acc Index	% of Eligible Bonus
Less than Index	0%
Equal to Index	100%
Plus 1%	110%
Plus 2%	120%
Plus 3%	130%
Plus 4%	140%
Plus 5% or more	150%

The Short Term Incentive is subject to discretionary Board adjustment for the achievement of improved Management Expense Ratio and promotion of BKI.

The following table summarises performance for the year to 30 June 2019 against the Short Term Incentive measurement criteria:

1 Year BKI Total Portfolio Return	S&P/ASX 300 Acc Index over 1 Year	Over / (Under) Performance	% Entitlement to Eligible Bonus
9.4%	11.4%	(2.0)%	Nil

The vesting criteria for the 2019 Financial Year Short Term Incentives were therefore not satisfied, and the Company did not award any short term incentives in respect of 2019 Financial Year Short Term incentives.

Long Term Incentive

The Long Term Incentive is determined by reference to annual Total Shareholder Returns; compared to the S&P/ASX 300 Accumulation Index. Total Shareholder Returns are based on the change in BKI Share Price and include the reinvestment of dividends.

For the year ended 30 June 2019, the Company Secretary's Long Term Incentive was set at 25,000 BKI shares. All outstanding Long Term Incentives granted are to be awarded to participants after 4 years provided that BKI's 4 year Total Shareholder Returns exceed the S&P/ASX 300 Accumulation Index over the same period. Should that test fail on the day, it is to be retested in Year 5.

The Long Term Incentive Scheme is to be paid by way of BKI shares purchased on market by the Company. The Company accrues as an expense the appropriate portion of the future cost of all Long Term Incentives issued. Once an incentive has lapsed or it is probable that the incentive will not vest, the Company reverses prior year accruals previously recognised in respect of that Long Term Incentive. The net positive or negative expense is included in the disclosed remuneration of the Company Secretary.

During the 2019 Financial Year the following outstanding Long Term Incentives granted by the Company became eligible for vesting:

Incentive issue	Issue date	Number of rights granted	Value of initial grant	Initial vesting date	Expiry date	Number of rights vested	Number of rights yet to vest/ lapse
J Pinto 2016	01/07/2015	18,628	\$31,500	30/06/2019	30/06/2020	Nil	–

Directors' Report (continued)

20. Remuneration Report (Audited) (continued)

The table below summarises the performance for the relevant four year period against the Long Term Incentive measurement criteria:

1/07/2015 to 30/06/2019	3.3%	9.7%	(6.4)%	nil

Based on the above performance the vesting criteria for Long Term Incentives issued on 1 July 2015 were not satisfied. In accordance with the terms of the Long Term Incentive Scheme, these incentives will be retested as at 30 June 2020.

During the 2019 Financial Year the following outstanding Long Term Incentives granted by the Company became eligible for retesting:

Incentive issue	Issue date	Number of rights granted	Value of initial grant	Initial vesting date	Expiry date	Number of rights vested	Number of rights yet to vest/ lapse
J Pinto 2015	01/07/2014	18,545	\$30,600	30/06/2018	30/06/2019	Nil	–

The table below summarises the performance for the relevant five year period against the Long Term Incentive measurement criteria:

Period	5 year BKI total shareholder return	S&P/ASX 300 accumulation index over 5 years	Over/ (Under) performance	% Entitlement to eligible bonus
1/07/2014 to 30/06/2015	3.7%	8.9%	(5.2)%	nil

Based on the above performance the vesting criteria for Long Term Incentives issued on 1 July 2014 were not satisfied. In accordance with the terms of the Long Term Incentive Scheme, these incentives lapsed as at 30 June 2019.

No outstanding Long Term Incentives granted by the Company became eligible for vesting between 1 July 2019 and the date of this report.

The following table summarises movements in Long Term Incentives granted by the Company that have not vested or lapsed as at the date of this report:

Incentive issue	Issue date	Number of rights granted	Value of initial grant	Initial vesting date	Expiry date	Number of rights vested/ lapsed	Number of rights yet to vest/ lapse
J Pinto 2016	01/07/2015	18,628	\$31,500	30/06/2019	30/06/2020	–	18,628

Notes to the Financial Statements

for the year ended 30 June 2019

1. Summary of Significant Accounting Policies

The financial report is a general purpose financial report that has been prepared in accordance with Australian Accounting Standards, Australian Accounting Interpretations, other authoritative pronouncements of the Australian Accounting Standards Board and the *Corporations Act 2001*.

The financial report covers the parent entity of BKI Investment Company Limited and its controlled entities, with information relating to BKI Investment Company Limited as an individual parent entity summarised in Note 22. BKI Investment Company Limited is a listed public company, incorporated and domiciled in Australia.

The financial report complies with all International Financial Reporting Standards (IFRS) in their entirety.

The following is a summary of the material accounting policies adopted by the Group in the preparation of the financial report. The accounting policies have been consistently applied, unless otherwise stated.

Basis of Preparation

The accounting policies set out below have been consistently applied to all years presented.

The Group has attempted to improve the transparency of its reporting by adopting 'plain English' where possible. Key 'plain English' phrases and their equivalent AASB terminology are as follows:

Phrase	AASB Terminology
Market Value	Fair Value for Actively Traded Securities
Cash	Cash and Cash Equivalents
Share Capital	Contributed Equity

Reporting Basis and Conventions

The financial report has been prepared on an accruals basis and is based on historical costs modified by the revaluation of selected non-current assets, financial assets and financial liabilities for which the fair value basis of accounting has been applied.

Accounting Policies

a. Principles of Consolidation

A controlled entity is any entity BKI Investment Company Limited has the power to control the financial and operating policies of so as to obtain benefits from its activities.

A list of controlled entities is contained in Note 21(i) to the financial statements. All controlled entities have a June financial year-end.

All inter-company balances and transactions between entities in the Group, including any unrealised profits or losses, have been eliminated on consolidation. Accounting policies of subsidiaries have been changed where necessary to ensure consistencies with those policies applied by the parent entity.

Where controlled entities have entered or left the Group during the year, their operating results have been included/excluded from the date control was obtained or until the date control ceased.

Minority equity interests in the equity and results of the entities that are controlled are shown as a separate item in the consolidated financial report.

b. Income Tax

The charge for current income tax expense is based on the profit for the year adjusted for any non-assessable or disallowed items. It is calculated using the tax rates that have been enacted or are substantially enacted by the balance sheet date.

Notes to the Financial Statements (continued)

1. Summary of Significant Accounting Policies (continued)

Deferred tax is accounted for using the balance sheet liability method in respect of temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. No deferred income tax will be recognised from the initial recognition of an asset or liability, excluding a business combination, where there is no effect on accounting or taxable profit or loss.

Deferred tax is calculated at the tax rates that are expected to apply to the period when the asset is realised or liability is settled. Deferred tax is credited in the income statement except where it relates to items that may be credited directly to equity, in which case the deferred tax is adjusted directly against equity.

Deferred income tax assets are recognised to the extent that it is probable that future tax profits will be available against which deductible temporary differences can be utilised.

The amount of benefits brought to account or which may be realised in the future is based on the assumption that no adverse change will occur in income taxation legislation and the anticipation that the group will derive sufficient future assessable income to enable the benefit to be realised and comply with the conditions of deductibility imposed by the law.

BKI Investment Company Limited and its wholly-owned Australian subsidiaries have formed an income tax consolidated group under the tax consolidation regime. Each entity in the group recognises its own current and deferred tax liabilities, except for any deferred tax balances resulting from unused tax losses and tax credits, which are immediately assumed by the parent entity. The current tax liability of each group entity is then subsequently assumed by the parent entity. The group notified the Australian Tax Office that it had formed an income tax consolidated group to apply from 12 December 2003. The tax consolidated group has entered a tax sharing agreement whereby each entity in the group contributes to the income tax payable in proportion to their contribution to the net profit before tax of the tax consolidated group.

c. Financial Instruments

Recognition

Financial instruments are initially measured at cost on trade date, which includes transaction costs, when the related contractual rights or obligations exist. Subsequent to initial recognition these instruments are measured as set out below.

The Group has two portfolios of securities, the investment portfolio and the trading portfolio. The investment portfolio relates to holdings of securities which the Directors intend to retain on a long-term basis and the trading portfolio comprises securities held for short term trading purposes.

Securities within the investment portfolio are classified as 'financial assets measured at fair value through other comprehensive income', and are designated as such upon initial recognition. Securities held within the trading portfolio are classified as 'mandatorily measured at fair value through profit or loss' in accordance with AASB 9.

Valuation of investment portfolio

Listed securities are initially brought to account at market value, which is the cost of acquisition, and are re-valued to market values continuously. Movements in carrying values of securities are recognised as Other Comprehensive Income and taken to the Revaluation Reserve.

Where disposal of an investment occurs, any revaluation increment or decrement relating to it is transferred from the Revaluation Reserve to the Realised Capital Gains Reserve.

Valuation of trading portfolio

Listed securities are initially brought to account at market value, which is the cost of acquisition, and are re-valued to market values continuously.

Movements in carrying values of securities in the trading portfolio are taken to Profit or Loss through the Income Statement.

Fair value

Fair value is determined based on last sale price for all quoted investments.

d. Employee Benefits

Share incentives

Share incentives are provided under the Short and Long Term Incentive Plans (the Plans). The incentives awarded under the Plans are based on the performance of the Group over differing periods specified within the rules of the Plans. The Plans are settled in shares, but based on a cash amount.

Notes to the Financial Statements (continued)

1. Summary of Significant Accounting Policies (continued)

Expenses are recognised over the assessment period based on the amount expected to be payable under the Plans, resulting in a provision for incentive payable being built up on the balance sheet over the assessment period. In the event that the executive does not complete the period of service, or the vesting criteria are not satisfied within the required period, the cumulative expense is reversed.

e. Revenue

Sale of investments occurs when the control of the right to equity has passed to the buyer.

Interest revenue is recognised on a proportional basis taking into account the interest rates applicable to the financial assets.

Dividend and distribution revenue is recognised when the right to receive a dividend or distribution has been established.

All revenue is stated net of the amount of goods and services tax (GST).

f. Cash and Cash Equivalents

Cash and cash equivalents include cash on hand, deposits held at call with banks, other short-term highly liquid investments with original maturities of 12 months or less, and bank overdrafts.

g. Goods and Services Tax (GST)

Revenues, expenses and assets are recognised net of the amount of GST, except where the amount of GST incurred is not recoverable from the Australian Tax Office. In these circumstances the GST is recognised as part of the cost of acquisition of the asset or as part of an item of the expense. Receivables and payables in the balance sheet are shown inclusive of GST.

Cash flows are presented in the cash flow statement on a gross basis, except for the GST component of investing and financing activities, which are disclosed as operating cash flows.

h. Segment Reporting

Operating segments are reported in a manner consistent with the internal reporting used by the chief operating decision-maker. The Board has been identified as the chief operating decision-maker, as it is responsible for allocating resources and assessing performance of the operating segments. The Group operates solely in the securities industry in Australia and has no reportable segments.

i. Comparative Figures

When required by Accounting Standards, comparative figures have been adjusted to conform to changes in presentation for the current financial year. Where a retrospective restatement of items in the statement of financial position has occurred, presentation of the statement as at the beginning of the earliest comparative period has been included.

j. Rounding of Amounts

The parent has applied the relief available to it under ASIC Corporations Instrument (Rounding in Financial / Directors' Reports) 2016/191 and accordingly, amounts in the financial report and Directors' report have been rounded off to the nearest \$1,000.

k. Critical Accounting Estimates and Judgments

Deferred Tax Balances

The preparation of this financial report requires the use of certain critical estimates based on historical knowledge and best available current information. This requires the Directors and management to exercise their judgement in the process of applying the Group's accounting policies.

The carrying amounts of certain assets and liabilities are often determined based on estimates and assumptions of future events. In accordance with AASB 112: Income Taxes deferred tax liabilities have been recognised for Capital Gains Tax on unrealised gains in the investment portfolio at the current tax rate of 30%.

As the Group does not intend to dispose of the portfolio, this tax liability may not be crystallised at the amount disclosed in Note 12. In addition, the tax liability that arises on disposal of those securities may be impacted by changes in tax legislation relating to treatment of capital gains and the rate of taxation applicable to such gains at the time of disposal.

Apart from this, there are no other key assumptions or sources of estimation uncertainty that have a risk of causing a material adjustment to the carrying amount of certain assets and liabilities within the next reporting period.

Notes to the Financial Statements (continued)

1. Summary of Significant Accounting Policies (continued)

l. New or amended Accounting Standards and Interpretations adopted

The Company has adopted all of the new or amended Accounting Standards and Interpretations issued by the Australian Accounting Standards Board ('AASB') that are mandatory for the current reporting period.

The following new Accounting Standards and Interpretations issued by the AASB have become effective in the current accounting period.

AASB 9 Financial Instruments and associated Amending Standards

The new AASB 9: Financial Instruments and its associated amending standards replaces all versions of AASB 9 and completes the project to replace AASB 139 – Financial Instruments Recognition and Measurement.

The standard introduces new classification and measurement models for financial assets. A financial asset shall be measured at amortised cost if it is held within a business model whose objective is to hold assets in order to collect contractual cash flows which arise on specified dates and that are solely principal and interest. A debt investment shall be measured at fair value through other comprehensive income if it is held within a business model whose objective is to both hold assets in order to collect contractual cash flows which arise on specified dates that are solely principal and interest as well as selling the asset on the basis of its fair value. All other financial assets are classified and measured at fair value through profit or loss unless the entity makes an irrevocable election on initial recognition to present gains and losses on equity instruments (that are not held-for-trading or contingent consideration recognised in a business combination) in other comprehensive income ('OCI'). Despite these requirements, a financial asset may be irrevocably designated as measured at fair value through profit or loss to reduce the effect of, or eliminate, an accounting mismatch.

For financial liabilities designated at fair value through profit or loss, the standard requires the portion of the change in fair value that relates to the entity's own credit risk to be presented in OCI (unless it would create an accounting mismatch).

New simpler hedge accounting requirements are intended to more closely align the accounting treatment with the risk management activities of the entity. New impairment requirements use an 'expected credit loss' ('ECL') model to recognise an allowance. Impairment is measured using a 12-month ECL method unless the credit risk on a financial instrument has increased significantly since initial recognition in which case the lifetime ECL method is adopted. For receivables, a simplified approach to measuring expected credit losses using a lifetime expected loss allowance is available.

AASB 15: Revenue from Contracts with Customers

AASB 15 Revenue from contracts with customers establishes a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers. The Group currently does not have any revenue to which AASB 15 is applicable.

The adoption of these Accounting Standards has not had, and is not expected to have, a material impact on the financial performance and position of the Group and consequently, no further disclosures have been included in this report.

m. Australian Accounting Standards not yet effective

The Group has not applied any Australian Accounting Standards or UIG interpretations that have been issued as at balance date but are not yet operative for the year ended 30 June 2019 ("the inoperative standards"). The Group only intends to adopt the inoperative standards at the date at which their adoption becomes mandatory. The impact of the inoperative standards has been assessed and the impact has been identified as not being material. The most relevant standards are discussed in further detail below.

AASB 16 Leases

AASB 16 Leases will supersede the existing lease accounting requirements in AASB 117: Leases and the related Interpretations. It introduces a single lessee accounting model by eliminating the current requirement to distinguish leases as either operating leases or finance leases depending on the transfer of risks and rewards of ownership.

The Standard is mandatory for first interim periods within annual reporting periods beginning on or after 1 January 2019. The adoption of this standard is not expected to have an impact on the financial performance and position of the Group.

Notes to the Financial Statements (continued)

18. Management of Financial Risk

The risks associated with the holding of financial instruments such as investments, cash, bank bills and borrowings include market risk, credit risk and liquidity risk. The Board has approved the policies and procedures that have been established to manage these risks. The effectiveness of these policies and procedures is reviewed by the Audit Committee.

a. Financial instruments' terms, conditions and accounting policies

The Group's accounting policies are included in Note 1, while the terms and conditions of each class of financial asset, financial liability and equity instrument, both recognised and unrecognised at the balance date, are included under the appropriate note for that instrument.

b. Net fair values

The carrying amounts of financial instruments in the balance sheets approximate their net fair value determined in accordance with the accounting policies disclosed in Note 1 to the accounts.

c. Credit risk

The risk that a financial loss will occur because a counterparty to a financial instrument fails to discharge an obligation is known as credit risk.

The credit risk on the Group's financial assets, excluding investments, is the carrying amount of those assets. The Group's principal credit risk exposures arise from the investment in liquid assets, such as cash and bank bills, and income receivable.

Cash and bank bills are reviewed monthly by the Board to ensure cash is only placed with pre-approved financial institutions with low risk profiles (primarily "Big 4" banks) and that the spread of cash and bank bills between banks is within agreed limits. Income receivable is comprised of accrued interest and dividends and distributions which were brought to account on the date the shares or units traded ex-dividend.

There are no financial instruments overdue or considered to be impaired.

d. Market risk

Market risk is the risk that changes in market prices will affect the fair value of a financial instrument.

The Group is a long term investor in companies and trusts and is therefore exposed to market risk through the movement of the share/unit prices of the companies and trusts in which it is invested.

The market value of the portfolio changes continuously because the market value of individual companies within the portfolio fluctuates throughout the day. The change in the market value of the portfolio is recognised through the Revaluation Reserve. Listed Investments represent 91% (2018: 83%) of total assets.

As at 30 June 2019, a 5% movement in the market value of the BKI portfolio would result in:

- a 5% movement in the net assets of BKI before provision for tax on unrealised capital gains (2018: 4%); and
- A movement of 7.8 cents per share in the net asset backing before provision for tax on unrealised capital gains (2018: 6.9 cents).

The performance of the companies within the portfolio, both individually and as a whole, is monitored by the Investment Committee and the Board.

BKI seeks to reduce market risk at the investment portfolio level by ensuring that it is not, in the opinion of the Investment Committee, overly exposed to one Group or one sector of the market.

Notes to the Financial Statements (continued)

18. Management of Financial Risk (continued)

At 30 June 2019 and 30 June 2018, the spread of investments was in the following sectors:

Securities representing over 5% of the investment portfolio at 30 June 2019 or 30 June 2018 were:

	Percentage of total investment (%)		Amount (\$'000)

Commonwealth Bank	6.7	5.7	82,154	67,436
National Australia Bank	5.4	6.4	67,045	76,003
Westpac Banking Corporation	4.8	5.8	58,887	68,079

The relative weightings of the individual securities and relevant market sectors are reviewed at each meeting of the Investment Committee and the Board, and risk can be managed by reducing exposure where necessary. There are no set parameters as to a minimum or maximum amount of the portfolio that can be invested in a single company or sector.

e. Interest rate risk

The Group is not materially exposed to interest rate risk. All cash investments are short term (up to 1 year) for a fixed rate, except for cash in operating bank accounts which are at-call and attract variable rates.

The Group has no financial liability as at 30 June 2019 (2018: Nil).

f. Foreign currency risk

The Group is not exposed to foreign currency risk as all investments are quoted in Australian dollars.

Notes to the Financial Statements (continued)

g. Liquidity risk

Liquidity risk is the risk that the Group is unable to meet financial obligations as they fall due.

The Group has no borrowings, and sufficient cash reserves to fund core operations at current levels for more than 10 years.

The Group's other major cash outflows are the purchase of securities and dividends paid to shareholders and the level of both of these is fully controllable by the Board.

Furthermore, the majority of the assets of the Group are in the form of readily tradeable securities which can be sold on-market if necessary.

h. Capital risk management

The Group invests its equity in a diversified portfolio of assets that aim to generate a growing income stream for distribution to shareholders in the form of fully franked dividends.

The capital base is managed to ensure there are funds available for investment as opportunities arise. Capital is increased annually through the issue of shares under the Dividend Reinvestment Plan. Other means of increasing capital include Rights Issues, Share Placements and Share Purchase Plans.
