

Heart & Lungs Experiment Tips

Read below for extra tips to help you complete your science experiments.

Beatin' Heart

- **DO NOT** latch the zip ties until you double-check the tubing paths.
- Fold the necks of the balloons as tightly as possible. Ask an adult for help for securing the zip ties to the balloons.
- Keep the plunger of the syringe upright when adding water to the tubing.
- If a balloon leaks, attach a spare zip tie to the neck of the balloon.

Pumpin' Lungs

- If you're having difficulty inserting the tubing into the straw, cut a tiny slit on the sides of the straw.
- Ask an adult for help tying the balloon if needed.
