

El Castillo Dot-to-Dot

El Castillo ("the Castle") stands in the center of Chichén Itzá, an ancient city where the Maya people lived from 750 to 1200. The pyramid has a total of 365 steps to represent the number of days it takes the Earth to orbit the Sun. Scientists think the Maya used the shadows of El Castillo like a calendar to track the seasons and mark harvest and planting times. Connect the dots from 1 to 85 to complete the image of El Castillo. Hint: Use a straightedge, like a ruler, to connect the dots.
