

Pinball Party Experiment Tips

Read below for extra tips to help you complete your science experiments.

Playing Pinball

- Pay careful attention to the letter placement in the instructions. The orientation of the letters will help you figure out which way the pieces go.
- If the piece is symmetrical, you can flip it either way before using.
- Sand any rough edges of the various pieces or sand the pieces so they fit better together.
- Bend L and M to make them more flexible before inserting. If they snap, replace with N and O.
