Roadmap

# Just an exchange before

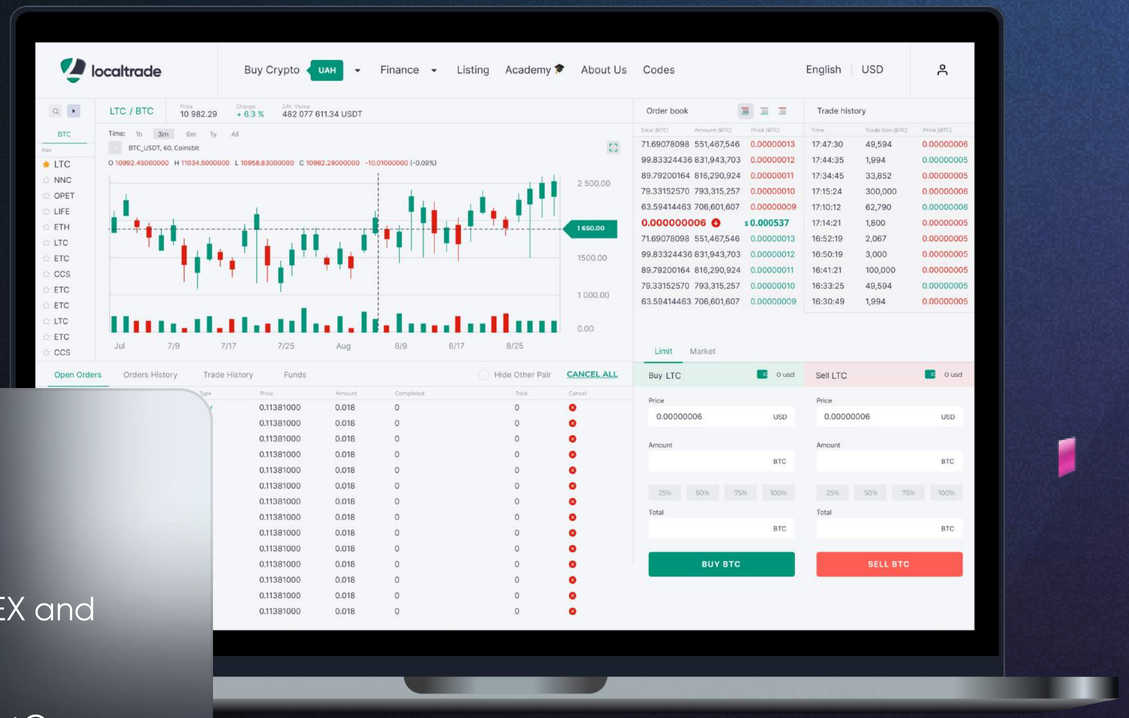
Now – a reimagined place for your crypto success

Project Roadmap ↗ | Launchpad ↗ | DeFi Wallet ↗ | 0xpay ↗

# 2017 - 2021

**LocalTrade was founded** as a regular CEX. Our team wanted to make LocalTrade a place where crypto trading will be accessible for everyone, and we did a great job!

Our CEX had gone through a 4-year accumulation phase to raise like a rocket to the moon. Which you can face right now



# Q2 2021

**New Team** saw great potential in LocalTrade CEX and that gave a refreshment to the project.

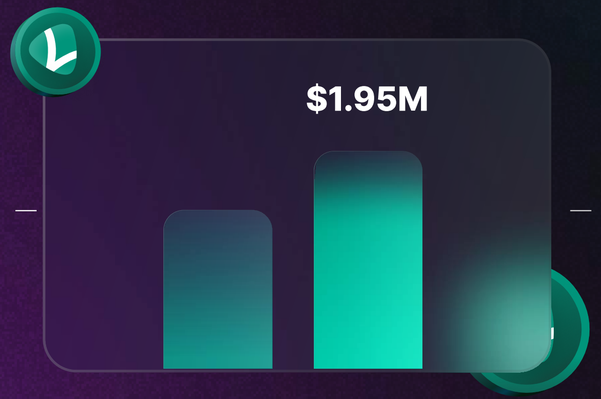
We entered the **Top-80** list of CEX by CoinMarketCap trust score

# Q1 2022

Impressive numbers for 3 months, huh? We made the token **which will give much more benefits** than other CEX utility-tokens.

# Every crypto project has its token.

But LTT sets new trends with advanced utility approach



**12M LTT Tokens Sold** before IDO

**48%**
A P R

save on fees

Save on fees in almost every LocalTrade product **with LTT**

100M Limited supply and 60% of it is already burnt

# Q2-Q3 2022

Even during worst crypto falls, LTT utility could sometimes cause up to 80% weekly token growth

# We rock regardless the market phase

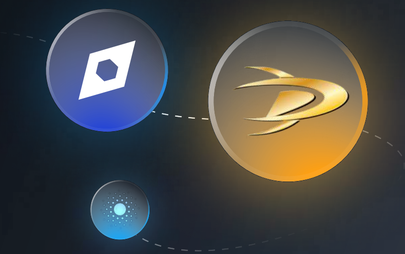
Because nothing can stop the innovations

**$2B**

volumes during
the first month after release

[0xpay] crypto-payments provider released

Licensed in EU



3 listings monthly

# OUR ECOSYSTEM

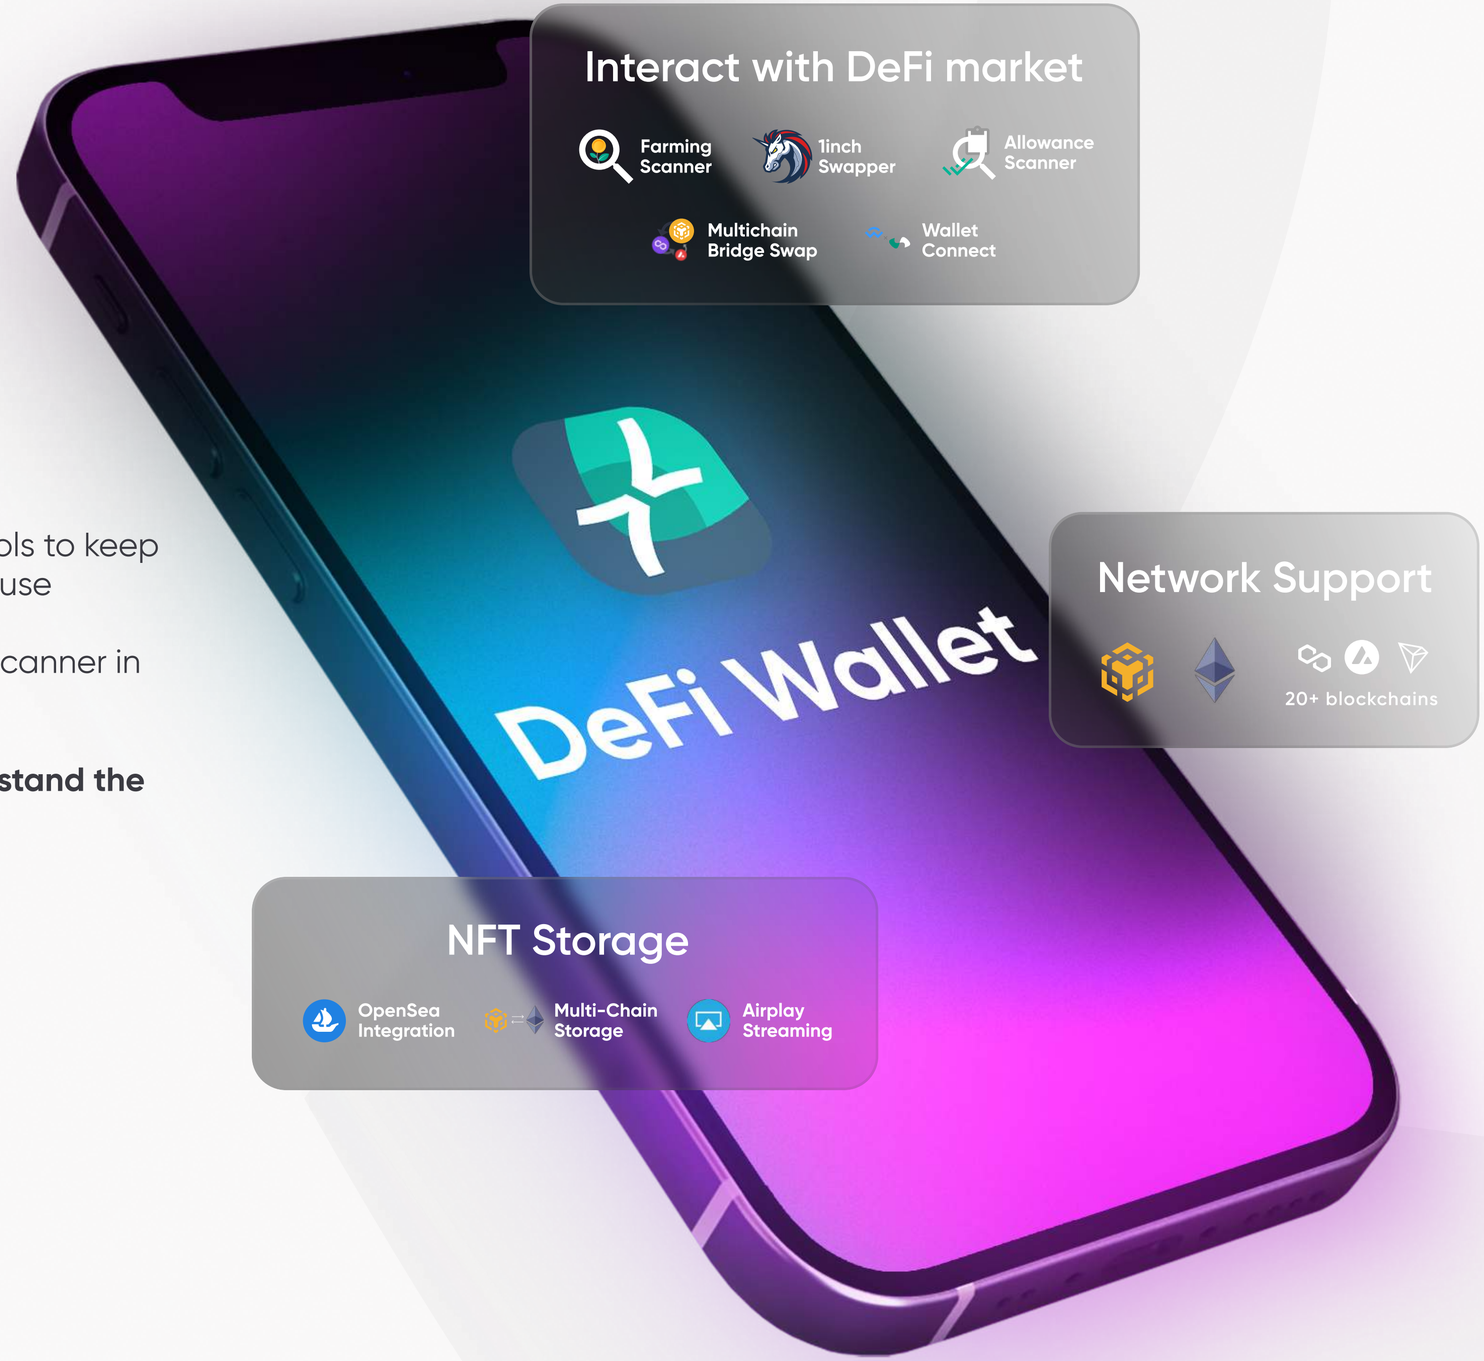
# DeFi Wallet

We gave LocalTrade Wallet some better tools to keep your crypto profitble, safe and still easy-to-use

Our main planned feature is an allowance scanner in DeFi Wallet.

**Discover the allowances you signed, understand the risks, protect your assets!**

Download on the App Store



# LocalTrade CEX Launchpad

Great projects launch everyday, and we want to become a part of their history. LocalTrade CEX brings new liqudity, users and popularity to skyrocket the unknown before projects!

We substituted the separate Launchpad platform with LocalTrade CEX. So, since Q2 2022 we list ~4 new tokens monthly.

### $LTT powered

Listing Fees paid in $LTT
50% burnt

### Weekly listings

Another week –
another opportunity

Payoneer PayPal

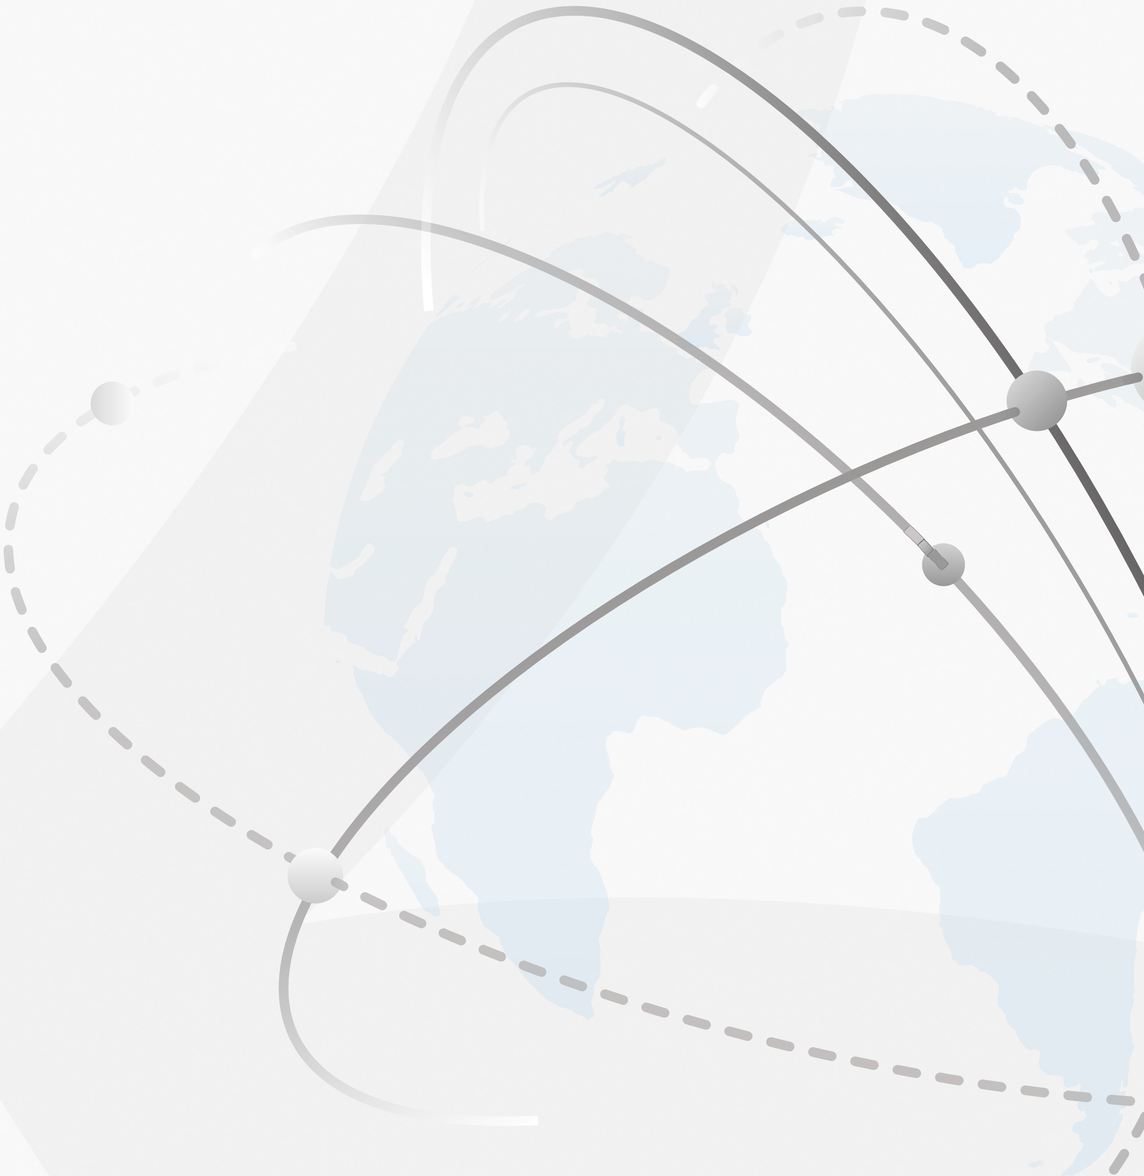
[0xpay]

# 0xPay for business & Merchants

0xpay solution makes it possible for any business to start accepting crypto payments, or set up a full-fledged crypto infrastructure without complex coding.

To make things even smother merchants **buy LTT to pay less fees**.

They buy LTT to have less fees, we burn it for a bigger price.



### Efficient

$LTT gives discount on fees
Making it 0.4%

### Token utility

Merchants will buy $240k worth of $LTT monthly to cover fees

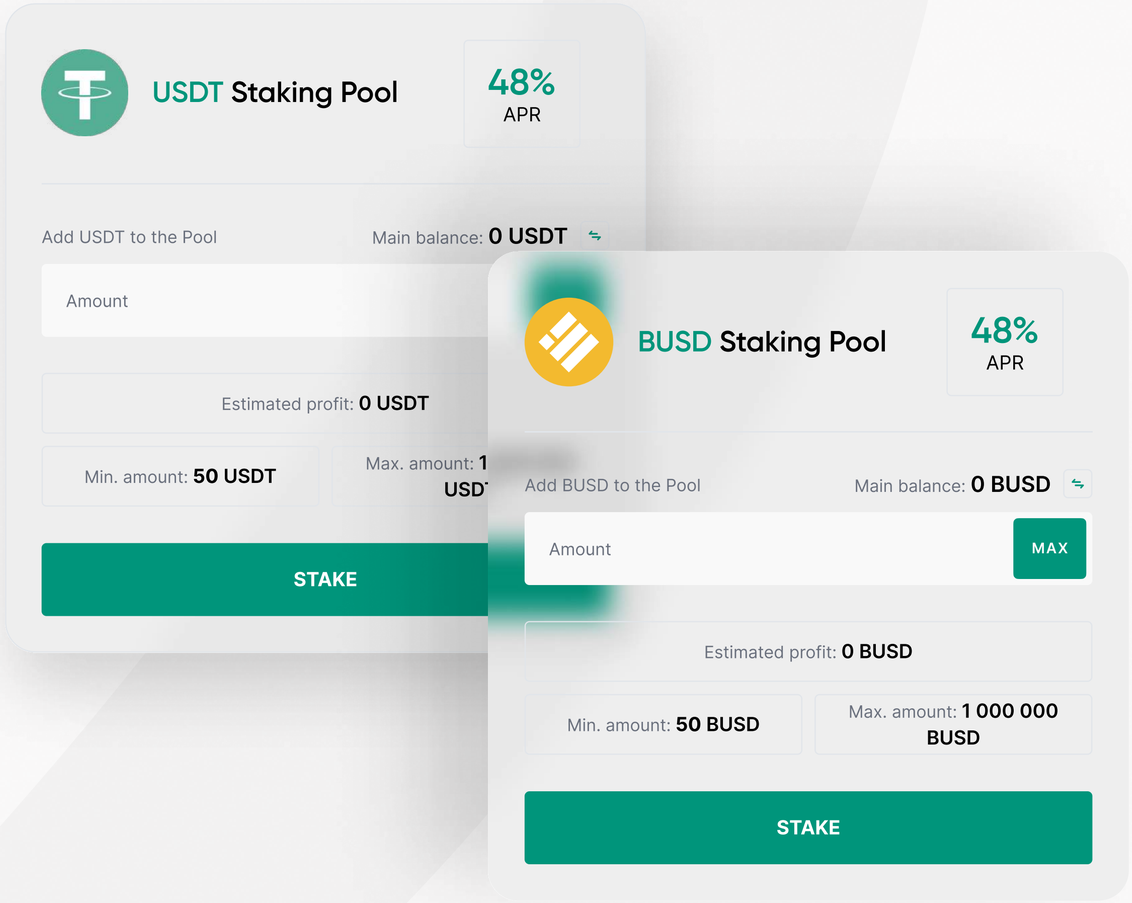
# Staking

Receiving free tokens is always a great idea! Especially when the current market state doesn't allow earning by trading. Thus, we expanded CEX functionality with an easy-to-use and transparent staking.

From August 2022 users **stake USDT, BUSD, LTT** and receive **competitive rewards** on the LocalTrade trading platform.

**48% APR**

**Daily rewards in LTT utility token**

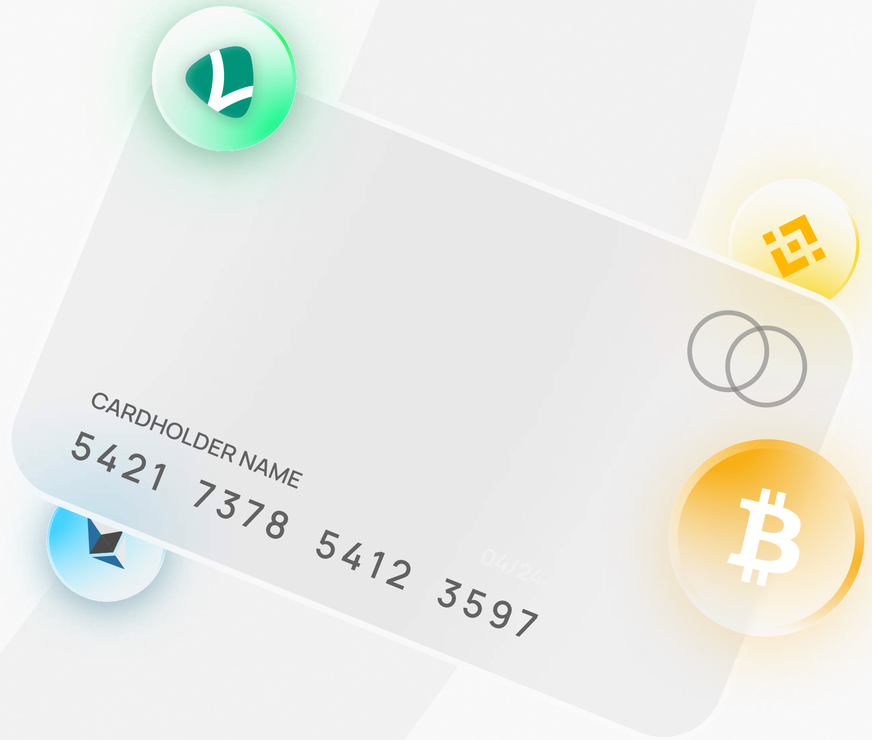


# Debit Card

Using crypto in real-world never was a pleasant experience.
But we're here to change it.

EU license for LocalTrade allows us to process more fiat currencies with 0xpay (EUR, AED, USD) and distribute our services worldwide.

So, in Q1 2023 you will be able to buy goods with card and spend the crypto from your LocalTrade CEX account!



**Benefits for LTT holders**

**Low fees**

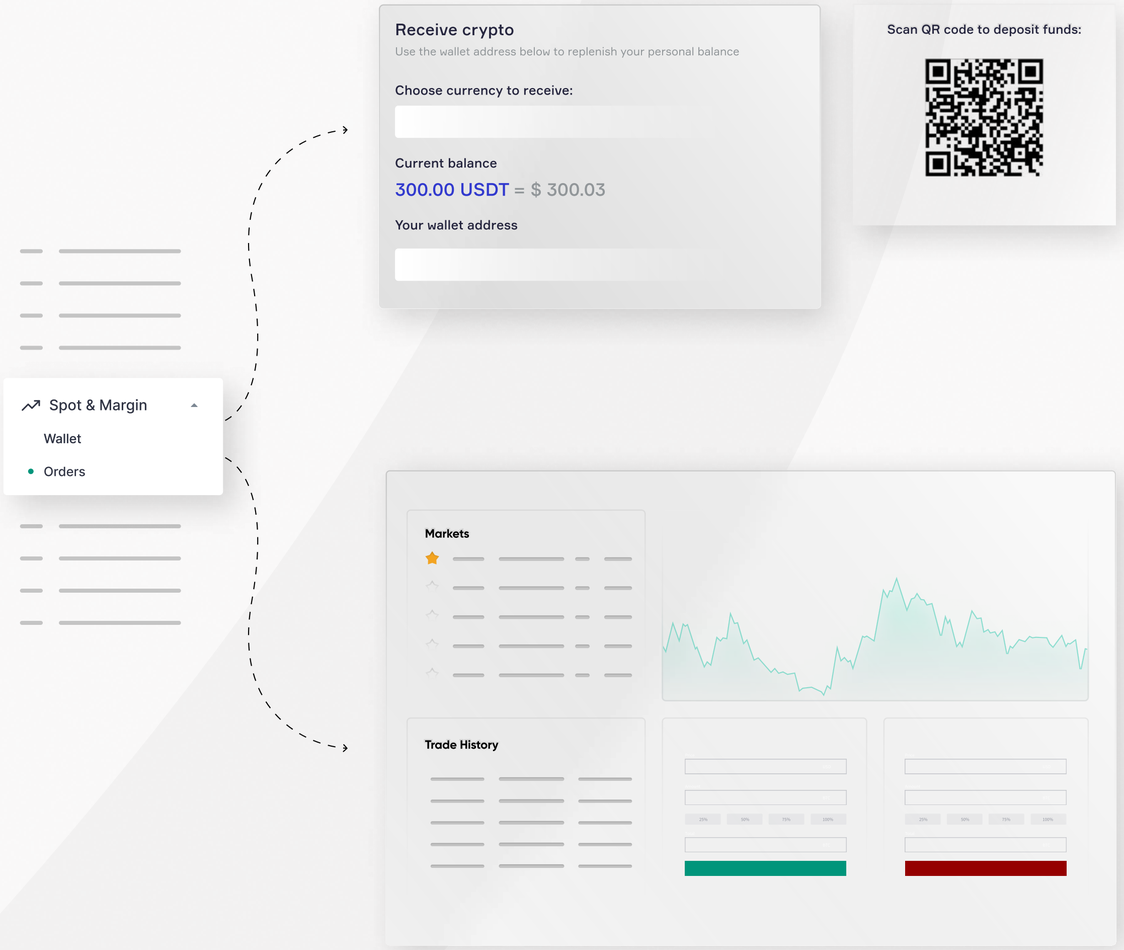
**Spend worldwide**

# CEX 2.0 Q1-2 2023

It may take hours to understand how the easiest operations are performed on other exchanges. We are making a CEX made by humans and for humans.

With each action on LocalTrade CEX you might learn **and understand** something new about crypto-trading.

*“We can’t promise you will earn your first million with LocalTrade, but we can provide you with tools, which will help you to do it with your own decisions and actions”.*



**Transparent**

**Safe**

**Made by Humans for Humans**
