#### **Editorial Method**

All the music in this edition is for solo lute in renaissance vieil ton tuning (6 courses tuned G c f a d' g', assuming a lute in G pitch, only n° 32 with an added 7th course, tuned to F) and appears in German tablature in the original sources. The music is transcribed here into tablature with flag-style rhythm notation (rhythm signs shown only when rhythm changes or at the beginning of staves). The rhythm signs used are the renaissance system consisting of vertical lines with sloping hatches, none for semibreves, one for minims, two for crotchets, three for quavers or four for semiquavers. The tablature was typeset using Wayne Cripps TAB programme version 4.3.39 on an Apple iMac running system OS X 10.5.3.

The transcription adheres to the German tablature in the sources, except that obvious errors have been altered and recorded in the commentary. Editorial alterations are recorded by reference to what appears in the original source followed by what it has been changed to editorially. The location of changes in the tablature are indicated by the bar number and

position of the note or chord in the bar, followed by the fret and course of the note or notes on the lute. For example, 1/3 refers to the third note or chord in the first bar, and c5 indicates the second fret on the fifth course. Chords are indicated by juxtaposed notes (for example a1b2d3c4a5 for a C minor chord), and melodic sequences are separated by hyphens (for example a1-c1-e1-f1 for a rising melody on the first course). No ornaments are found in the original tablature and so none are included in the transcriptions. Right hand fingering occurs in some of the music in the original tablature (see introduction) and has been reproduced in the transcription as a dot under a tablature letter to indicate striking the note with the right index finger. The commentary also includes an inventory of the music together with concordances and cognates (the latter preceded by 'cf.'), when known.

Comments or requests for further information about this edition can be directed to the author by email (j.h.robinson@ncl.ac.uk).

## 27. FANTASIA 1 - Francesco da Milano

Kargel 1586, sigs. A1r-A1v

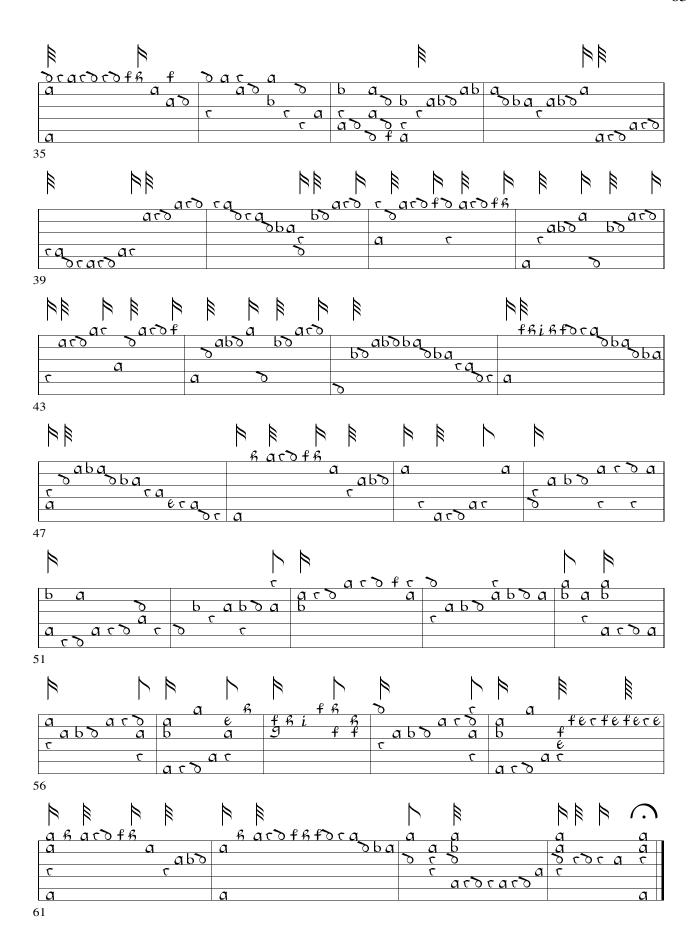

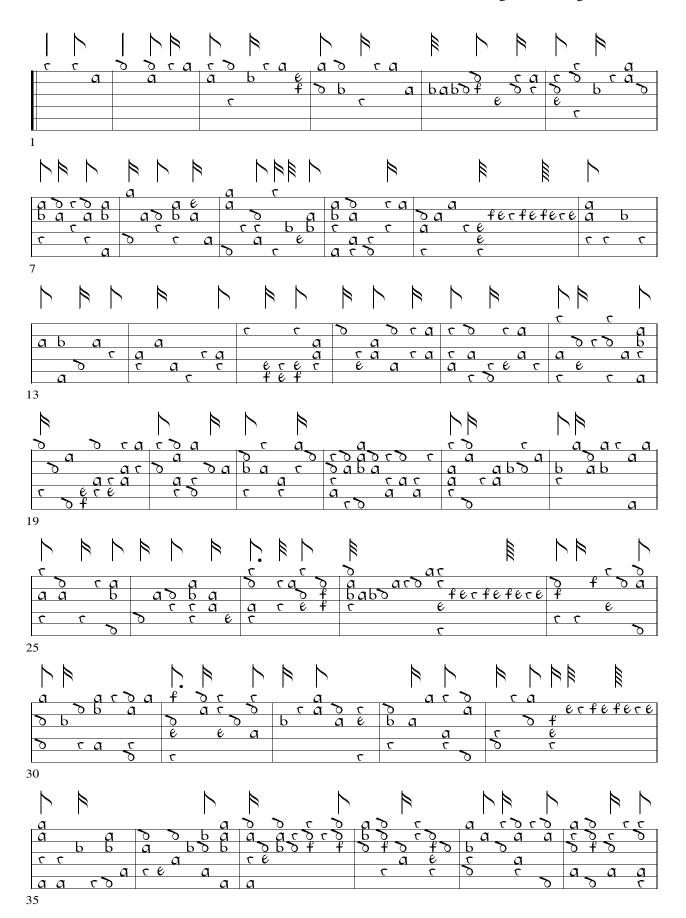

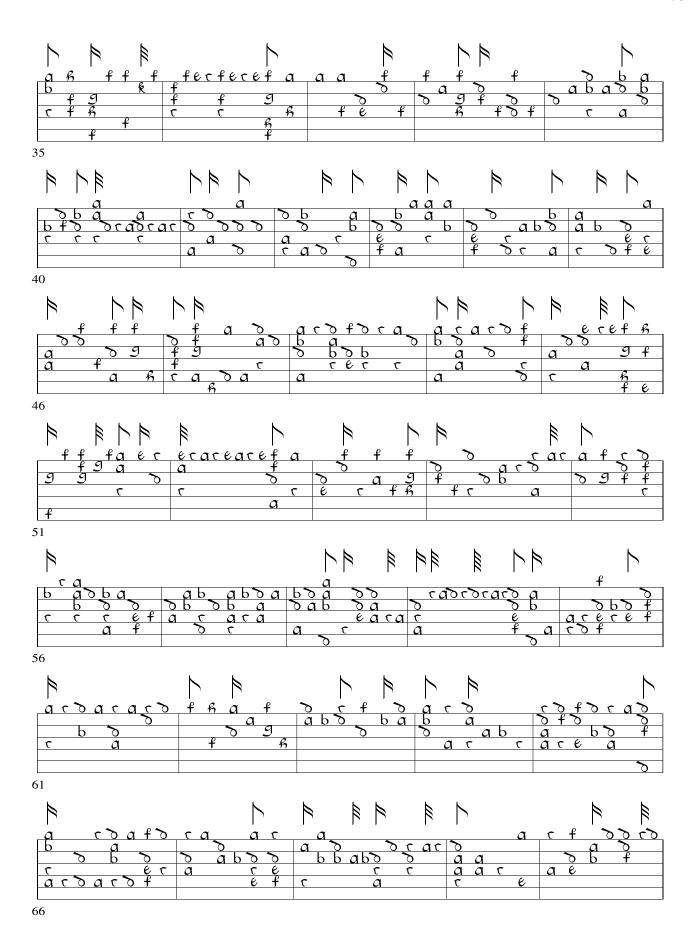

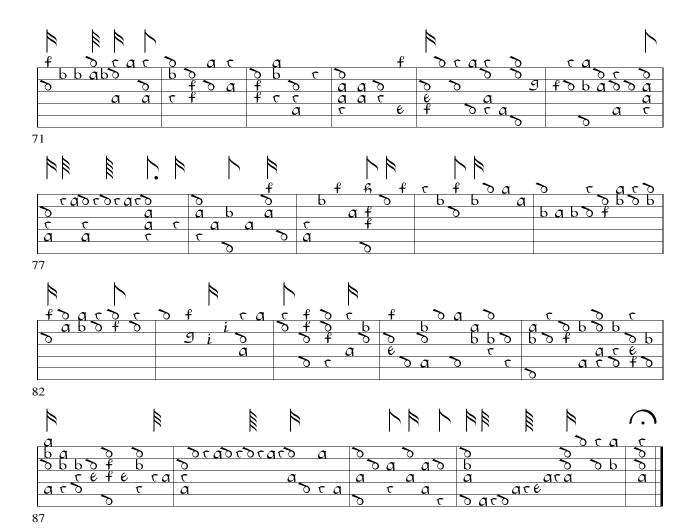

APPENDIX

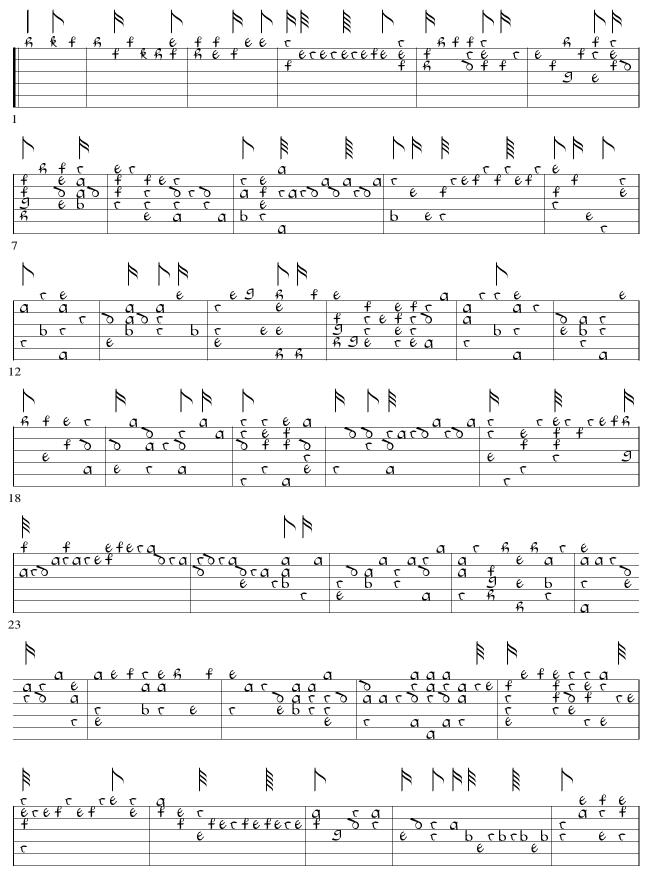

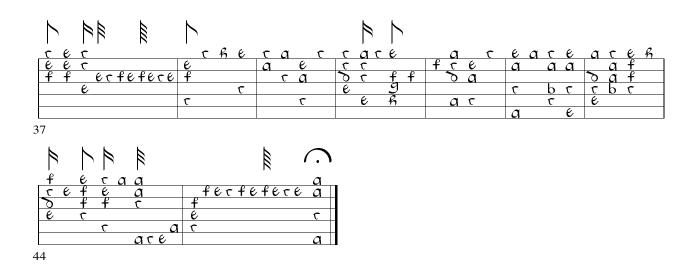

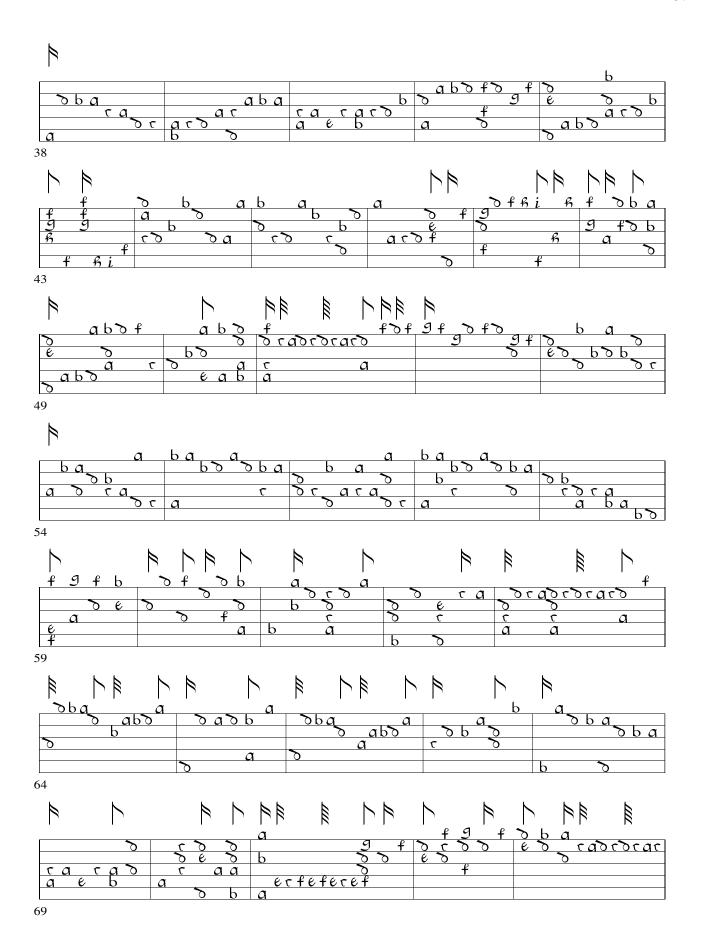

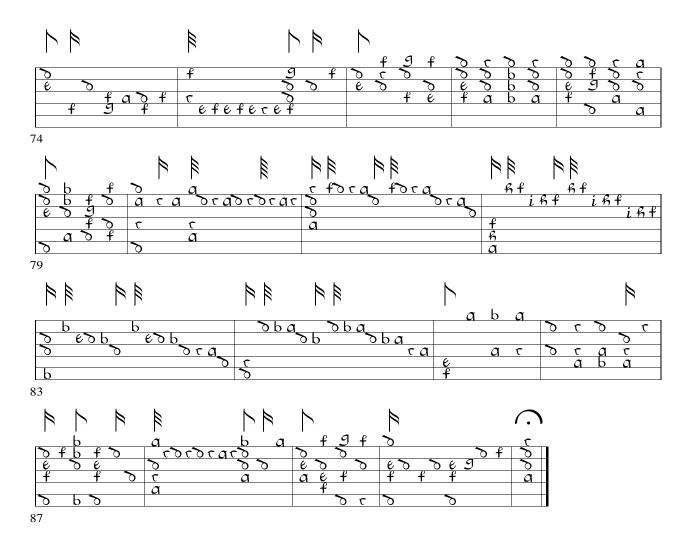

## Introduction

Around 30 of the 150 or so books of renaissance lute music published in the sixteenth century were notated in German lute tablature. Of these, nine include fantasias and recercars for solo lute. All thirty six of these are transcribed into French tablature in this edition. An appendix of eight more associated with one of the publishers brings the total to forty-four in all.<sup>1</sup>

The nine prints represented here were all published in Frankfurt an der Oder or Strasbourg (German, Strassburg), and then mainly from the presses of just two printers. Johann and later Andreas Eichorn in Frankfurt an der Oder published the prints of Benedict de Drusina (1556 and 1573) and Matthäus Waissel (1573 and 1592), and Bernhard Jobin in Strasbourg published lute books for Melchior Neusidler (1574) and Sixt Kargel (1586), as well as a print by an unknown editor (1572). In addition, the duet books of Wolff Heckel were published in Strasbourg by Urban Wyss in 1556 and reprinted by Christian Müller in 1562. The appendix of this edition includes a further eight fantasias associated with Sixt Kargel, four found in a print in Italian tablature published by Bernhard Jobin in Strasburg 1574, possibly based on an earlier German tablature print from 1569, and four more in French tablature published in Antwerp in 1571 by Pierre Phalèse and Joan Bellère, possibly also from a now lost Kargel print in German tablature.

### German tablature

The music in the prints represented here is notated in German tablature, which, quite unlike French and Italian lute tablature, uses different ciphers for each fret and string intersection.<sup>2</sup> For the upper five strings or courses Arabic numerals represent open strings and letters for each fret up to the fifth, the last two using

ciphers resembling 7 and 9 as abbreviations for *et* and *con* (see table below). The ciphers for frets 1-5 are then duplicated but with a straight or curved bar above them for frets six to ten. The ciphers used by different printers differed in minor details, and sometimes alternative forms of the same cipher was used by the same printer.<sup>3</sup> However, there were at least five conventions for notating the sixth course,<sup>4</sup> developed in different geographic centres of printing.

course	5	4	3	2	1
open	1	2	3	4	5
fret 1	а	b	С	d	е
fret 2	f	g	h	i	k
fret 3	- 1	m	n	0	р
fret 4	q	r	S	t	V
fret 5	Х	У	Z	7	9

Table of ciphers

The earliest was that used in music treatises and the first lute print in German tablature. The open sixth course is indicated by an Arabic number one with a bar above it, and the first five frets by A, F, L, Q and X and then AA and

The titles fantasia, recercar, prelude, preludium, priambel[n] and fuga are often used interchangeably for different versions of the same music. For example, in his Eyn Newes sehr Künstlichs Lautenbuch of 1552, Hans Gerle transcribed thirty-one fantasias and recercars from Italian prints and titled them all 'Priambel'. Also the title page of Hans Neusidler's Ein Newgeordent Künstliche Lautenbuch of 1536 refers to the inclusion of 'Fantaseyen' but none of the music is so titled. Only pieces called fantasia or recercar (with the exception of n° 5) in German tablature prints are included in this edition.

<sup>&</sup>lt;sup>2</sup> Discussed in detail in Wolf, pp. 35-50, and summarised in English in Apel, pp. 72-81.

<sup>&</sup>lt;sup>3</sup> For example, in Sixt Kargel's 1586 print, Jobin's typesetter used two distinct forms of the cipher 'k' (second fret on the first course), and two for the cipher 'f' (second fret on the fifth course). For even a single page of music, a large number of each cipher is required, 40 'k' and 22 'f' on one page counted, and over 50 different ciphers are used to notate music on a 6-course lute, each course either unstopped or with up to ten frets. Ciphers were cast in metal from a punched-out matrix by a type foundry and presumably the matrix was periodically replaced so that batches of ciphers would vary in form. Also a stock of mixed batches would likely be recycled from previous print runs. So different forms of a particular cipher would be used indiscriminately when setting a new page. It is also possible to explain the commonest form of error in typesetting, in which ciphers without a bar above were used in place of ones with a bar, either through carelessness, or because the stock of a particular cipher had run out and it was more convenient to make the substitution than wait for ciphers to be recycled from a different print run.

<sup>&</sup>lt;sup>4</sup> Apel, pp. 75-76 describes these five ways of notating the sixth course, and Table I in Wolf, p. 40 further segregates these into twenty variants found in lute prints and manuscripts. All but one of the prints of Hans Neusidler include a chart of the ciphers on the lute neck up to the eighth fret, alongside which are three alternative ways of notating the sixth course. A version of the same chart, together with a description of German tablature, is also found in Ernst Gottlieb Baron's historical study of the lute published over a century later (Baron 1727, pp. 57-60).

FF for the sixth and seventh frets, thus capitalizing the letters used for the fifth course. This was used for the only lute tablature example in Sebastian Virdung's *Musica getutscht* of 1511 printed in Basel, probably by Michael Furter.<sup>5</sup> The same style, but with a hatched number one, '4', was used by Peter Schöffern for the tablature in Arnolt Schlick's *Tabulaturen Etlicher lobgesang und lidlein uff die orgeln und lauten*, printed in Mainz in 1512.<sup>6</sup> A similar style was also used in Martin Agricola's treatise *Musica Instrumentalis Deudsch*, based on Virdung's *Musica getutscht* and printed in Wittenburg by George Rhaw in several editions from 1528.<sup>7</sup>

A different way of notating the sixth course emerged in Nürnberg employing a hatched number one, '4' for the open sixth course as above but numbers '2', '3', '4' either hatched or with a bar over the top, for the first, second and third frets, etc. This form was used by the Nürnberg printer Hieronymus Formschneider for the lute books of Hans Gerle: *Musica Teutsch* in 1532, reprinted in 1537 and revised with the title *Musica und Tabulatur* in 1546, as well as *Tabulatur auff die Laudten* in 1533 and *Eyn Newes sehr Künstliches Lautenbuch* in 1552. The same style was used by the printers of the same name in Zurich for Rudolph Wyssenbach's *Tabulaturbuch uff die Lutten* of 1550,8 as well as by Johan

<sup>5</sup> Facsimile: Documenta Musicologica I:XXXI, Kassel, Barenreiter, 1970. An English translation of the treatise on the lute can be found in Uta Henning 'The lute made easy: A chapter from Virdung's Musica Getutscht (1511)' *The Lute Society Journal* xv (1973), pp. 20-36.

Kholen in Heidelberg for Sebastian Ochsenkhun's *Tabulaturbuch auff die Lauten* of 1558.<sup>9</sup>

A more common form of notation for the sixth course used upper case letters, 'A' for the open course, then 'B', 'C' and 'D' etc. for first, second, third, and up to tenth frets. It was first used by the printer Hans Singriener in Wien for the lute books of Hans Judenkünig, Utilis & compendiaria introductio published c.1515-1519 and Ain schone from 1523<sup>10</sup> and was later adopted for Hans Jacob Wecker's lute duet book Tenor Lautenbuch, printed by Ludwig Lück in Basel in 1552. This style continued in use between 1556 and 1592 in Frankfurt an der Oder by the prolific printers Johann, and later Andreas, Eichorn for all the lute books of Benedict de Drusina and Matthäus Waissel (see below), as well as for Gregorius Krengel's Tabulatura Nova of 1584.<sup>11</sup>

A variant of the latter two used the hatched number one '4' for the open sixth course but then 'A', 'B' and 'C' for first, second and third frets, etc. This form of notation was used in Nürnberg from 1536 for the lute books published by Hans Neusidler, <sup>12</sup> as well as later in Strasbourg by Bernhard Jobin for the lute books of Sixt Kargel and Melchior Neusidler. <sup>13</sup>

However, Jobin did not use this latter type for the lute books he published in 1572 and 1573. For these he used yet another form of notation, first seen in Strasbourg in Wolff Heckel's duet books printed first by Urban Wyss in 1556 and then again by Christian Müller in 1562. In common with some of the above, a hatched number one '4' is used for the open sixth course. Then frets 1-5 are indicated by the lower case letters as for frets of the fifth course ('a', 'f', 'l', 'q' and 'x'), but with the addition of a bar above them. For the sixth to tenth frets on the sixth course, the letters are doubled thus: 'aa', 'ff', 'll', 'qq' and 'xx' again with the addition of a bar above them. But this creates potential confusion, because the sixth to tenth frets of the fifth course are also notated as 'a', 'f', 'l', 'q' and

<sup>&</sup>lt;sup>6</sup> Facsimilies: Leipzig, Zentralantiquariat der DDR, 1977; and of the copy in Leipzig: Lübeck, Tree Edition, 2004.

<sup>&</sup>lt;sup>7</sup> Facsimiles: Münich copy of 1528 edition, Hildesheim, Georg Olms, 1985; Leipzig copy of 1529 edition, Lübeck, Tree Edition, 2003. The same German tablature example was also reprinted in the editions in 1529, 1530, 1532 and 1542 as well as the Latin translation by Ottomar Lucinius, Musurgia seu proxis Musicae published by Johan Schott in Strasbourg in 1536 and 1542. It was omitted in Agricola's revised edition in 1545, which did retain the diagram of the same ciphers on a lute neck. Agricola claims that German lute tablature was invented by the blind organist Conrad Paumann (1410-1473); as a possible alternative, in the preface to Musica Teutsch of 1532, and the revised instructions in Tabulatur auff die Laudten in 1533, Hans Gerle refers to imitating the notation of 'Adolff blyndhamers / Adolff Plindthamer,' lutenist to Maximillian I, although there is no reason to assume that Blindhamer invented German tablature; see Apel, p. 72, Rudolf Henning 'German Lute Tablature and Conrad Paumann' The Lute Society Journal xv (1973), pp. 7-10, and Crawford Young and Martin Kirnbauer, Early Lute Tablatures in Facsimile (Winterthur-Schweiz, Amadeus, 2003), pp. 242-253.

<sup>8</sup> Facsimile of the Leipzig copy: Lübeck, Tree Edition,

<sup>1999.</sup> 

<sup>&</sup>lt;sup>9</sup> Facsimile of the Wolfenbüttel copy: Stuttgart, Cornetto, 2001.

Facsimile of the Wien copies of both prints, Köln, Bernhard Christian Becker, 1996.

<sup>&</sup>lt;sup>11</sup> Krengel also employs a 7th course, the frets notated using Arabic numerals.

<sup>&</sup>lt;sup>12</sup> See footnote 42.

<sup>&</sup>lt;sup>13</sup> Melchior's print also employed a 7th course, notated with a double-hatched 1 for the open string and alphabetical capital letters with a bar above for the frets.

'x' with the addition of a bar above them so that the sixth to tenth frets of the fifth course use exactly the same ciphers as the first five frets of the sixth course. However, in the few cases where these ciphers are used in the music transcribed here, there is no doubt which string and fret are intended, although the printer's typesetters seem to have been confused at times and used the wrong cipher for fifth or sixth strings – see the editorial corrections in the commentary.

French and Italian tablature commonly includes dots under tablature letters or numbers to indicate right hand fingering, especially a single dot to indicate the use of the index finger on weak beats in alternating thumb-index finger sequences. German tablature often also includes dots, either above or below ciphers to indicate right hand fingering.14 However, the prints in German tablature represented in this edition do not include any fingering dots (but see below). An alternative convention is found in some German tablature sources in which hooked rhythm signs are used to indicate use of the right hand index finger. The earliest examples are found in Hans Judenkünig's Utilis & compendiaria introductio of c.1515-1519 and Ain schone of 1523. The discant and tenor duet books of Heckel use a variant form of this notation by adding curved vertical strokes in alternating 'gridiron' rhythm signs to indicate right hand fingering (and included as dots under tablature letters in n° 5-9 here), also seen in at least two manuscripts that predate Heckel's Lautten Buchs of 1556.15 Some two decades later, Bernhard Jobin adopted the same notation for right hand fingering, possibly learning it from the workshop of Urban Wyss or Christian Müller in Strasbourg where Heckel's books were printed. Jobin used this notational device in the two lute books of 1572 and 1573 as well as for the prints for Melchior Neusidler in 1574 and Sixt Kargel in 1586. However,

14 The tablature in the prints of Hans Neusidler in some sections includes dots above ciphers to indicate right hand fingering, and Hans Jacob Wecker's *Tenor Lautenbuch* of 1552 includes dots below ciphers throughout. Right hand fingering is also notated with dots in the two German tablature lute books of Ludwig Iselin, both *α*.1575: CH-Bu MS F.IX.23 uses dots below ciphers, whereas CH-Bu MS F.X.11 uses alternating dots above and below ciphers in melodic passages. Some sections of Hans Neusidlers 1536 prints also include dots above ciphers to indicate left hand fingering.

despite explaining their use in the prefatory text of the 1572 print, they occur in all his prints indiscriminately on nearly all off beats whether single notes or chords. The typesetter also introduces another type of error by occasionally inverting pairs of 'gridiron' rhythm signs so the curved vertical is mistakenly to the left of a pair of verticals indicating the thumb stroke. Right hand fingering has been omitted from n° 10-13 and 24-32 here.

### Benedict de Drusina

Benedict de Drusina was a lutenist born around 1520-1525 in the Drużno (German: Drausensee) region, near the Hanseatic city of Elbing in East Prussia, now Elblag in Poland.<sup>16</sup> He published two lute books, both printed by Johann Eichorn in Frankfurt an der Oder. In the preface to the Tabulatura of 1556 he refers to his extensive travels in Italy while studying the lute, as well as quoting an epigram in praise of the lute by Christoph Pannonius, professor at the University of Frankfurt an der Oder. Thus he may have spent some time in Frankfurt an der Oder and had links with the university, although his matriculation is not recorded.<sup>17</sup> The Tabulatura of 1556<sup>18</sup> was dedicated to crown prince Eric Gustavus who became King Eric XIV of Sweden in 1560, and Swedish court records show that Benedict received 50 dalers in payment for the dedication. This would suggest that he had some connection with the court in Stockholm, although he need not have collected the payment in person and he is not recorded as a court lutenist. He may have been resident in Denmark around this time, because a 'Master Benedictus' is referred to as 'luthenslaaer' on the payroll at the Danish court of Christian III (1534-1559) in 1557 and 1559. 19 A 'Benedictus Drusin' is also recorded as inn-keeper at the

<sup>&</sup>lt;sup>15</sup> D-Mbs Mus.1512, copied in Bavaria ε.1540-50, and CH-SAM M 2, copied ε.1550.

<sup>&</sup>lt;sup>16</sup> E. Fred Flindell 'Drusina, Benedict de' New Grove 2 vii 618

<sup>&</sup>lt;sup>17</sup> Matthäus Waissel matriculated at Frankfurt in 1553 and so may have known Benedict, which might explain the inclusion of a setting of Sermisy's Le content est riche in Waissel's *Tabulatura* of 1573, sig. B4v, ascribed B[enedict?]. D[e?]. D[rusina?]., as well as concordant versions of two fantasias from Benedict de Drusina's *Tabulatura* of 1556.

<sup>&</sup>lt;sup>18</sup> Tabulatura continens insignes et selectissimas quasdam fantasias: cantiones Germanicas, Italicas, ac Gallicas: Passomezo: Choreas: Mutetas, iam primum in lucem aeditas. Per Benedictum de Drusina Elbigensem. Quarum ordinem ac numerum sequens pagina indicabit 1556. Francoforti ad viadrum in officina Joan Eichorn (Drusina 1556).

<sup>&</sup>lt;sup>19</sup> Kenneth Sparr 'Lutenists at the royal court of King Gustavus I of Sweden' *The Lute* xxv/2 (1985), pp. 69-80.

Royal castle of Frederiksborg, north of København, and was granted a license to trade in hops, steel and other merchandise in 1561, which could well have been royal privileges granted to a court lutenist.<sup>20</sup> He also seems to have lived in the German town of Meissen, referred to by Christoph Hunichius in his dedicatory poem for Johan Rude's lute book of 1600.<sup>21</sup> Erst Gottlieb Baron quotes the poem in full adding that 'In Meissen, however, the masters Drusina admirably excelled during their days.'22 In 1570, Benedict was registered at the University of Leipzig and became a citizen there in 1577.23 During this period, his second print was published in 1573 in Frankfurt an der Oder, 24 with a dedication to Elector August Duke of Saxony, apparently while he was staying at the University of Wittenberg. He died sometime before 1582, leaving a son Petrus who was organist and composer at the Marienkirche in Elbing and died in May 1611.

The *Tabulatura* of 1556 includes four fantasias (n° 1-4 here) as well as vocal intabulations and dances. The fourth is a parody of the motet 'Verbum Iniquum et dolosum' by Cristóbal Morales. As all but three of the lute settings are unascribed, it is not clear whether Benedict composed or just collected the fantasias. However, he may have made the arrangements of the vocal and dance music himself, especially as three, *Quando io pens al martire* [Verdelot] *Ex Gallico transl: V: B:*, Wer walt ihr in ehren nicht sein holt. H: Hofman and

<sup>20</sup> According to recent research by Ole Kongsted, of the Royal Library in Copenhagen, Denmark; see Arne Keller's website: http://www.daw.dk/drusbio.htm Domine Miserere. 4. Vocum. H. W.,<sup>27</sup> are ascribed to others, suggesting that Benedict intabulated the remainder himself. His second book is a complete transcription from Italian into German lute tablature of the entire contents of Melchior Neusidler's two Venetian prints of 1566, comprising intabulations of Motets, madrigals and chansons, as well as passomezo-saltarello settings and the eight recercars, transcribed as no 14-21 here (described below).

### Wolff Heckel

The title pages and prefatory text of the Discant and Tenor lute books published by Wolff Heckel<sup>28</sup> reveal that he was born in Munich around 1515, and was a citizen of Strasbourg by 1556 when the first edition was printed there by Urban Wyss.<sup>29</sup> There is no record of when Heckel died, but he was presumably still alive in 1562 when the second edition of his duet books were printed by Christian Müller, also in Strasbourg. The second edition was dedicated to Johan, Graven of Nassau, Heinrich von Eyssenburg, Graven of Budingen, and Philip, Graven of Hanaw, but who they are and what his connections to them were has not yet been researched.

W

<sup>&</sup>lt;sup>21</sup> Johann Rude, *Flores Musicae* (Heidelburg, Voegel, 1600). Facsimile: Stuttgart, Cornetto, 2005. Line six of the poem reads 'Drusinosque vehat Misnis [Misnense, *Meissen*] ad astra suos'.

<sup>&</sup>lt;sup>22</sup> Baron 1727, p. 55 reads 'In Meissen aber haben die Drusini ben ihrer zeit sich vortrefflich hervor gethan', kindly translated by Mathias Rösel. The pleural form of Drusina presumably refers to Benedict and son Petrus.

<sup>&</sup>lt;sup>23</sup> Mirko Arnone 'Drusina, Benedict de' MGG v 1452-4.

<sup>&</sup>lt;sup>29</sup> Wolfgang Boetticher and Hans Radke 'Heckel, Wolff [Wolf]' *New Grove 2* xi 308; Mirko Arnone and Wolfgang Boetticher 'Heckel Wolff, Wolf *MGG* viii 1140-1.

Despite Boetticher and Radke describing Heckel as 'lutenist and composer', there is no reason to assume that he was a professional lutenist, nor that he composed any of the music in his duet books. He may only have made the and duet intabulations and arrangements.<sup>30</sup> It seems more likely that he was a collector, as twenty of the duets in his prints are concordant with Hans Jacob Wecker's Tenor Lautenbuch published in 1552, four years before his own first edition. Some of the solos are also quite similar to music from the lute books of Hans Neusidler published in Nürnberg in the previous two decades. Thus, it is unlikely that Heckel composed any of the five fantasias found in his prints. The first in the tenor book (n° 6) is not found in any other source but bears the title Recercari de milla new and Recercari de milane in the index, suggesting the original is by Francesco da Milano (Ness n° 6). The fourth (n° 9) is titled 'a very lovely Fantasy by Wolff Heckel', but is in fact a cognate for a fantasia by Francesco da Milano (Ness nº 9) and so the ascription to Heckel can at best only refer his own arrangement of an existing work. However, an identical version of no 8 is ascribed to Wolff Heckels' in a manuscript from around 1575, but it is likely the ascription merely refers to it having been copied from one of the editions of his prints. Also, the triple time section has cognates in other manuscripts, one from the 1540s. N° 7 is titled Ein Fantasey mit fugen, although it is not clear to which part 'fugen' refers. Interestingly, the final lute solo in Heckel's discant book bears the curious title 'Al[l]de' (= old?) but is in fact an embellished but otherwise concordant version of yet another fantasia by Francesco da Milano (Ness nº 5), also found in a cognate setting by Giovanni Maria da Crema, and so is included here (n° 5).

### Bernhard Jobin

Bernhard Jobin was a printer of music and other books and not a lutenist or even a musician as far as we know. He was born in Porrentruy in Switzerland, probably in the 1530s. At some stage he moved to Strasbourg some 150 km north, becoming a citizen there in 1560 and learning the printing trade while working as an engraver.<sup>31</sup> It is possible he was

<sup>30</sup> Lynda Sayce (ed.) Wolf Heckel: Lute Duets (Albury: Lute Society Editions, 1992), 12 of the 40 duets.

associated with the publishers of Wolff Heckel's lute books because of the similarity of certain features of their prints (see above). In 1567 he married Anna Fischart, sister of the prolific writer Johann Fischart, the majority of whose works he published beginning in 1570. Jobin died in Strasbourg around 1594. His sons, particularly Tobias, continued to publish for a few years, but the business was sold in 1605 when Tobias died.

Bernhard Jobin published thirteen tablatures that we know of, six for lute, four for cittern and three for keyboard (one now lost).<sup>32</sup> He also published multiple editions of five books of hymns and psalms between 1573 and 1593. He published two books of lute music, Das Erste Buch in 1572 and Das Ander Buch in 1573 for which the editor is not known, so it is possible he edited or even arranged the music for them himself. He also published lute books for Sixt Kargel in 1574 and 1586 and Melchior Neusidler in 1574 (described below) as well as Giulio Cesare Barbetta's Novae Tabulae Musicae Testudinariae in 1582.33

Jobin's Das Erste Buch of 1572<sup>34</sup> is dedicated to the famous artist Tobias Stimmer von Schaffhausen (1539-1584), whose engravings Jobin probably published, and includes a poem by Johann Fischart in praise of the lute. The music mainly comprises vocal intabulations, plus three passamezo-saltarello pairs and the four fantasias transcribed here. Das Ander Buch of 1573 is dedicated to Samson Liechtensteigern and is devoted to dances. The four fantasias in Das Erste Buch of 1572 (n° 10-13 here) are unusual and varied in style and standard of accomplishment. The first is improvisatory and in common and triple time sections, the third characterised by the repetition of a highly chromatic theme, and the fourth a close

concordance for a recercar by Melchior Neusidler from one of his Italian prints of 1566 (and n° 14 here). The fantasias contain quite a few errors, mostly corrected editorially – but the occasional dissonances have been left as in the original.

Portrait of Sixt Kargel from Novae, Elegantissimae 1574 and Lautenbuch 1586

### Sixt Kargel

Sixt Kargel was a professional lutenist born around 1540 in Zabern (now Saverne) in Alsace, 30 km northwest of Strasbourg (see portrait, above). A lutenist named Sixt is recorded as living in Mainz in 1568, which is about 130 km to the North of Saverne. This is probably Sixt Kargel since a bibliography published in 1611 records three books by him published in Mainz in 1569, one for lute and two for cittern but all three unfortunately now lost. From 1574 he had several music books published by the printer Bernhard Jobin: lute books in 1574 and 1586, and a number of editions of two books for solo cittern. One of the cittern books is titled *Toppel Cythar* and editions were published

<sup>35</sup> Wolfgang Boetticher and Hans Radke 'Kargel [Kärgel, Kargl, Kärgl], Sixt [Sixtus]' New Grove 2 xiii 376-7; Christian Bettels 'Kargel, Kargel, Kärgel, Kärgel, Kargel, Kargel, Sixt' MGG ix 1498-9.

by Jobin in 1575 and 1578, in collaboration with the lutenist Johan Dominico Lais. The other, titled Renovata Cithara, was published in 1575, 1578 and 1580, and one of the Mainz cittern books also had the same title and may have been a prototype. Kargel refers to himself as Lautenisten or similar on the title page of all the lute and cittern books, and became one of the best-known lutenists in Alsace. According to the dedications of the 1574 and 1586 prints he was a lutenist in the service at Strasbourg of Prince-Bishop Johann of Manderscheid-Blankenheim, Landgrave of Alsace and also of Cardinal Charles of Lorraine. In 1593 he was lutenist to the prince-bishop at Zabern and became a member of the St Michael brotherhood in Zabern in 1594. He is not heard of after this so it is not known when he died. Hans Kaspar Kärgel, a lutenist recorded at the Württemberg court between 1606 and 1610, was probably Sixt's son.

Kargel's *Novae*, *Elegantissimae* of 1574<sup>37</sup> includes intabulations mainly of vocal works by Orlando di Lasso as well as three passamezosaltarello pairs and four fantasias (n° 41-44 here). The *Lautenbuch* of 1586<sup>38</sup> also comprises mainly vocal intabulations, together with three passomezos, two saltarellos and six fantasias (n° 27-32 here). It has been assumed that Kargel composed the music in his prints, but none of it bears his name or initials and he is nowhere referred to as a composer. It is more likely that he was a collector of music that he performed and published, although it is possible he arranged existing music. The ascription 'Kargl'

Sixtum Kargil Lautenisten, allen diser edlen kunst liebhabenden zu ehren und gefallen, in truck gegeben. Getrucht zu Strassburg durch Bernhard Johin. Anno 1574 (Kargel 1574).

<sup>38</sup> Lautenbuch, viler Newerlessnerfleissiger, schöner Lautenstück von artlichen Fantaseien, künstlichen Musicartlichen Lateinischen Muteten, mit fünff und sechs stimmen allerhand lieblichen Teutschen, Frantzösischen und Italienischen Liedern, auch lustigen Passomezen in die Teutschen Tabulaturn, zu nutz und gefallen aller diser Kunst lehrbegirigen, und besonders denen, so der Italienischen und Frantzösischen Tabulaturn unerfaren, auffs verständlichst und richtigst zusammen getragen und geordnet, Auff sechs und siben Chorseiten gericht, Durch Sixtum Kargel, Fürstlichen Bischofflichen, Strassburgischen Lautenisten. Getrucht zu Strassburg, bey Bernhart Johin, Anno M. D. LXXXVI. (Kargel 1586).

to the first of four sequentially-numbered fantasias in the third edition of Pierre Phalèse and Jean Bellère's anthology *Theatrum Musicum* of 1571<sup>39</sup> probably only indicates that their source was a Kargel print, possibly the lost Mainz lute print of 1569, although one of the fantasias is found in Kargel's later print of 1574. Phalèse & Bellère's print of 1571 is in French tablature and Kargel's 1574 print in Italian tablature, but both sets of four fantasias are included in this edition in an appendix (n° 37-44).

Four fantasias associated with Kargel are arrangements of known works of Francesco da Milano. One from Kargel 1574 (n° 42) is based on Ness nº 66 (Ness App. 9), and another three are in Kargel 1586. No 27 is a close concordance for Ness n° 30, n° 29 follows Ness n° 5 quite closely except that the first four bars are different, and n° 30 is quite closely related to Ness n° 3. Also, n° 39 from Phalèse and Bellère 1571 is a more elaborate setting of a fantasia ascribed to Ortenzio in the lute book of Ernst Schele (D-Hs M B/2768), presumably from an original composition by Hortense Perla of Padua. 40 In addition, no 32 from Kargel 1586 is a nearly exact transposition of a fantasia in Waissel's earlier print of 1573 (n° 22), and n° 28, also from Kargel 1586, is a reworking of a fantasia from his earlier print of 1574 (n° 41). The remaining fantasias (n° 31, 37-38, 40-41, 43-44) are of a similarly high standard, although it seems unlikely that Kargel composed any of them. He has nevertheless preserved for us a valuable collection of fourteen renaissance fantasias for the intermediate to advanced player. The most accomplished is no 38, which can only be marvelled at for its sublime

<sup>39</sup> Theatrum Musicum, Longe amplissimum cui (demptis quae vetustate vilverant) authorem praestantiss. tum veterum, tum recentiorum carmina selectissima sunt inserta, maiori quam ante hac fide et diligentia in usum publicum comparata. Portrait of Melchior Neusidler aged 43 from *Teutsch Lautenbuch* 1574, probably engraved by Tobias Stimmer

### Melchior Neusidler

Melchior Neusidler was born to a musical family in Nürnberg in the early 1530s (see portrait above).<sup>41</sup> He was the eldest son of Hans Neusidler the lutenist, editor and publisher of six lute books between 1536 and 1549.<sup>42</sup> The

most prolific of Renaissance lutenist-composers, around 150 pieces ascribed to Melchior survive. In fact, Hans and Melchior were the leading figures in renaissance lute music in Germany, the father for music of the first half and Melchior for the second half of the sixteenth century. Melchior's brother Conrad (1541-1604) was also a lutenist and composer.<sup>43</sup>

In 1551, Melchior applied to Charles V, the

German emperor (1520-1558), for a ten-year privilege for the printing of his music, but no prints by him are known from this period. He relinquished his Nürnberg citizenship in 1552, following a move to Augsburg where he acquired citizenship and married. Although only nineteen when he left Nuremberg, within a few years of his arrival in Augsburg Melchior had gained an impressive position as leader of a group of chamber musicians called 'Die stille Musica.' 'Meine stillen Musica,' as he proudly described it, rehearsed three times per week and performed 'bey der Tafel' at banquets and weddings, in the private homes of patricians including the Fuggers, the leading Augsburg family, and in the semi-public halls of the merchants' guild. The group usually consisted of four master musicians and a few apprentices who played wind instruments, lute and regal, with a youth who sang. They were especially admired for their impressive performances when princes and ecclesiastical luminaries visited Augsburg during the many Reichstagen. In total he spent three decades in Augsburg, with interruptions. An eighteenth century Augsburg chronicler described him as 'a famous composer and lutenist from here, who earned through [his] art the applause and goodwill of all the noble and wealthy'.44 In October 1561 he visited Nürnberg and undertook to bring up his three youngest brothers as a result of his father's financial difficulties.

Melchior went to Italy in 1563, probably to avoid an outbreak of plague in Augsburg. He traveled with Luther's friend and colleague, Philippe Camerarius, who had just been released by the Inquisition. They returned to Germany crossing the Alps in a blizzard. Melchior was in Venezia in 1566 to supervise the publication of his first two lute books, Il Primo and Il Secondo Libro Intabolatura di Liuto di Melchior Neysidler Alemano, Sonatore di Liuto in Augusta, published by Antonio Gardane and printed in Italian tablature. The two lute books were dedicated to Johannes Langnauer and Melchior Linck who were prominent Augsburg merchants with offices in the Fondaco dei Tedeschi, the palatial trading house for German merchants on the Grand Canal. He returned to Germany in the same year.

By 1574 Melchior was in Strasbourg, where he edited music for Bernhard Jobin, including a untraceable book of hymns, 45

<sup>45</sup> Psalmen, Geistlich Lieder und Kirchengesang, 1573?

<sup>&</sup>lt;sup>44</sup> Smith, pp. 173-178.

supervised the printing in German tablature of his *Teütsch Lautenbuch*. He dedicated the latter to Dorothea, Countess of Palatine and Duchess of Bavaria, widow of Sebastian Ochsenkhun's patron Count Ottheinrich, Elector of Heidelberg.<sup>46</sup>

Melchior applied unsuccessfully for a post at the Württemberg court in Stuttgart in 1576. For a number of years, he sent New Year's gifts to Duke Wilhelm V (1548-1626) in Munich, including lute compositions recorded in December 1577. From September 1580, aged around fifty, he finally secured a post as a lutenist in Innsbruck at the court of Archduke Ferdinand II (1529-1595), brother of Emperor Maximilian II. However, he was dismissed in May 1581 for eating meat during lent. He suffered from gout in his later years and received a pension from his patron Octavian Fugger II. He is recorded playing frequently in Octavian's house, including during sleigh rides. He died in his sixties sometime before 1597, as he is referred to as deceased in a lost print of that year recorded by Jobin in a catalogue for the Leipzig book fair of 1597.47 Tomaso Garzoni mentioned him as a famous lutenist in his Piazza universale (1587). 48 In the preface to his Teutsch Lautenbuch of 1574,49 Melchior described the six-course lute as inadequate, for 'now that music has risen to such heights of artistic beauty [one] cannot achieve the full range of pleasing harmonies or fingerings on such a lute'. Instead, he recommended a seven-course instrument, and Baron was aware of this apparent innovation more than a century later.<sup>50</sup>

<sup>46</sup> Kindly translated by Mathias Rösel.

The eleven fantasias and recercars by Melchior Neusider, together with those of Francesco da Milano of course, are the most accomplished in this edition, consistent with Melchior being the only confirmed composer of editors and publishers represented. However, his frequent use of high barré positions and left hand fingering up to the tenth fret or even higher, renders the majority of the music difficult to play all the way through, which must attest to Melchior's own virtuosity on his instrument. Eight of the fantasias (n° 14-21) are from Benedict's transcriptions in the Tabulatura continens of 1573,51 one of them also used in Jobin's Das Erste Buch of 1572. The remaining three, one a parody of Cipriano de Rore's madrigal 'Anchor che col partire', are from Melchior's Teutsch Lautenbuch (n° 24-26), published by Bernhard Jobin in 1574. N° 24 is related to a fantasia in Benedict Drusina's Tabulatura of 1556 (n° 3).

### Matthäus Waissel

Matthäus Waissel was born around 1540 in Bartenstein in East Prussia (today Bartoszyce in Poland).<sup>52</sup> He matriculated at the University of Frankfurt an der Oder in 1553, and in 1561 at Königsberg, where he studied theology. He was a schoolmaster at Schippenbeil, about 20 km east of Bartoszyce, from around 1570 until 1573. He was later a priest at Langheim (today probably Kloster Langheim, part of Lichtenfels in Bavaria). However he lost his post following a dispute with his patron in 1587 after which he settled in Königsberg where he died aged about 60, probably in 1602. In the preface to his Tabulatura continens of 1573 he claims he was taught by lutenists in Italy and Germany, but he is nowhere recorded as being a performing lutenist. However, he published four books of music, three containing lute

\_

<sup>&</sup>lt;sup>47</sup> Teutsch Lautenbuch schöner neuer Lautenmusik etc., so mitt Fleiss zusam. getragen d. Weylandt M. N. fol. Strassb. Gedr. B. Jobin [in Verl. Tobias Lutzen] 1597'. Thank you to Arthur Ness for this information.

<sup>&</sup>lt;sup>48</sup> Garzoni, Tomaso La piazza universale di tutte le professioni de mondo (Venetia, Gio. Battista Somasco, 1587), 34th discourse.

<sup>&</sup>lt;sup>49</sup> Teutsch Lautenbuch Darinnenn kunstliche Muteten, liebliche Italienische, Fratzösische, Teütsche Stuck, fröliche Teütsche Täntz, Passo e mezo, Saltarelle, und drei Fantaseien Alles mit fleiss aussgesetzt, auch artlich und zierlich Coloriert, durch Melchior Newsidler, Burger und Lautenist in Augspurg. Getrucht zü Strassburg, durch Bernhart Jobin, Im Jar. 1574. Mit Röm. Key. May. Freyheit, auff zehen Jar (Neusidler 1574). The GB-Lbl copy has quite a few errors corrected in a contemporary hand.

<sup>&</sup>lt;sup>50</sup> Baron, p. 59: 'Nach diesem ist noch einer seines Nahmens, und vielleicht auch seines Geschlechts Melchior Neusiedler wegen der Lauten beruhmt gewesen. Er lebte Anno 1574. in Augspurg und war der Erste welcher den Bezug noch mit einem Chor vermehrte' kindly translated by Mathias Rösel of

Bremen as 'After him [Hans Neusidler], there was another of the same name, and perhaps of the same family, Melchior Neusidler, who was famous with the lute. In 1574 he lived in Augsburg, and he was the first to increase the stringing by another course.'

<sup>&</sup>lt;sup>51</sup> Benedict or his typesetter introduced many errors whilst transcribing from Italian to German tablature, mostly interchanging ciphers with and without bars above them.

<sup>&</sup>lt;sup>52</sup> Peter Király 'Biographical sketches of Bakfark and Waissel' Lute News 49 (March 1999), pp. 17-18; Hans Radke, Wolfgang Boetticher and Christian Meyer 'Waissel [Waisselius], Matthäus' New Grove 2 xxvii 3-4; Josef Klima and Hans Radke 'Waissel, Waisselius, Mathäus' MGG xvii 386-7. Bartoszyce is about 100 km east of Elblag, where Benedict de Drusina was born.

Tabulatura in 1573,53 another Tabulatura in 1591 (reprinted in 1592) and a Lautenbuch in 1592,54 the latter also including instructions for playing the lute.<sup>55</sup> The fourth was again called *Tabulatura* but this time a slim volume of eight paired dances for two lutes. He must have maintained his links with Frankfurt an der Oder as all his prints came from the presses of Johann or Andreas Eichorn there. He also authored two non-musical works, Summa doctrinae sacrae, a biblical history in verse, and Chronica alter preusischer ... Historien, a collection of ancient local stories, published in Königsberg, in 1596 and 1599, respectively. The Tabulatura continens of 1573 is dedicated to Albert Friedrich, Margrave of Brandenburg, and the music is equally divided between vocal intabulations and dances, apart from two preambulum and the two phantasias (n° 22 & 23). The Lautenbuch of 1592 is dedicated to Lords, Mayors, Aldermen Justices and Lay Judges of the three towns of Königsberg.<sup>56</sup> The contents include rather more dances than vocal intabulations in addition to the four Phantasias (n° 33-36), the latter being the last of the genre printed in German tablature, and in the last book printed in German tablature.

In his *Tabulatura continens* of 1573 Waissel acknowledges taking some of the music from other sources and notating only some himself. Thus, although concordant versions of music from his prints are found in manuscript sources where they bear his name, it seems likely he arranged existing dances and vocal music rather than composing any himself. Of the two fantasias in the 1573 print (n° 22-23) and four in

53 Tabulatura continens insignes et selectissimas quasque antiones, quatuor, quinque, et sex vocum, testudini aptatas, ut sunt: praeambula: phantasiae: cantiones Germanucae, Italicae, Gallicae, & Latinae: passemesi: gagliardae: & choreae. In lucem aedita per Matthaeum Waisselium Bartsteinensem Borussum. Francofordiae ad viadrum in officina Ioannis Eichorn. Anno M. D. LXX. III. (1573). Cum gratia, & privilegio Caesarae Maiestatis (Waissel 1573).

the *Lautenbuch* of 1592 (n° 33-36), three are found in earlier prints of others, two in Benedict de Drusina's *Tabulatura continens* of 1556 (see n° 1 & 2) and one in Phalèse and Bellère's anthology of 1571. Interestingly, Matthew Holmes copied one of the fantasias (n° 22) in the 1590s into his first solo lute manuscript, GB-Cu Dd.2.11, and it also appeared in Kargel's *Lautenbuch* of 1586 (see n° 32).

### This edition

All the named fantasias and recercars from surviving prints in German tablature, all for 6course renaissance (viel ton) tuning, are reproduced here with the consequence that the standard of composition as well as the level of difficulty varies considerably. However, the genre is ever popular with modern lutenists, and this collection includes fine examples for those of intermediate (e.g. n° 2, 22, 33, 35, 36) to advanced (e.g. 31, 38, 39, 44) ability, as well as virtuosi (e.g. all those by Melchior Neusidler the most manageable is n° 21 and the most difficult n° 20 which includes unusual chords that are not easy to articulate). Only twenty of the forty four can be ascribed to a composer with any certainty, twelve of these are by Melchior Neusidler (one in two versions), seven are versions of compositions of Francesco da Milano, and one is likely to be by Hortense Perla. It is particularly illuminating to find here seven collected or arranged fantasias by Francesco da Milano, which tell us something about how they may have been transmitted and played for more around half a century after he died. Benedict de Drusina, Melchior Neusidler and Sixt Kargel were clearly performing lutenists. However, apart from Melchior Neusidler, the remaining publishers probably be viewed only as collectors or at best intabulators arrangers and rather composers. Although some of the fantasias reproduced here occur in more than one source,<sup>57</sup> the versions differ in details such as figuration, the degree of embellishment, and sometimes key. All versions have been included, and a comparison of the duplicated items is informative of the processes of transmission and arrangement in the later sixteenth century.

John H. Robinson Newcastle University, June 2008

# Acknowledgements

The author gratefully acknowledges Wayne Cripps' for permission to use his tablature-setting programme TAB version 4.3.39 running OSX Leopard 10.5.3 on an Apple iMac. Arne Keller, Kenneth Sparr and especially Arthur Ness, for valuable comments on the introduction and to Denys Stephens for the loan of his copy of Douglas Smith's translation of Baron (see Baron 1727).

Copies of primary sources used Zentralantiquariat der DDR facsimile of the unique copy of Drusina 1556 in D-LEm (kindly loaned Stewart McCoy); Microfilms of copies of the Heckel 1556 Discant book and 1562 Tenor Book both now in PL-Ki (kindly loaned by Tim Crawford); Minkoff facsimile of the D-KA copy of Jobin 1572; Microfilm of the copy of Drusina 1573 in B-Br; Cornetto facsimile of the D-W copy of Waissel 1573; Microfilm of the GB-Lbl copy (with some annotations in a contemporary hand) and the Cornetto facsimile of the D-HEu copy (clearly a different and corrupt print run as a number of the ciphers are different and incorrect) of Neusidler 1574; Becker facsimile of the A-Wn copy of Kargel 1586; LSA microfilm of Waissel 1592 from the unique copy in D-W; Minkoff facsimile of the D-Mbs copy of Phalèse & Bellère 1571; and Minkoff facsimile of the D-Mbs copy of Kargel 1574.

# **Bibliography**

Sources are for solo lute unless otherwise indicated.
