

THE PUZZLER

Each clue answer in this puzzle is to be entered with its first letter in the appropriately numbered square and the rest of its letters sequentially forming a right triangle with one horizontal side, one vertical side, and one diagonal side. (Some examples are illustrated above.) The numbered square always represents a corner of a triangle whose first leg proceeds in the compass direction given next to the clue's number; the orientation of the other two legs must be deduced. Letters in the shaded squares form a triangle of their own. Answers include four capitalized words, one of them foreign.
