Notes:

1. A Lumenfacade Inground fixture includes one optical chamber (LOIC), one power and control box (PACBOX) and one recessed blackout (RBO). The LOIC, PACBOX and RBO are provided according to the output/color, length and control configuration.

2. ASHRAE version not available for 12 in fixture lengths.

3. Consult factory for products that are BAA-approved (Buy American Act).

4. Consult the installation instructions to plan all aspects of the fixture installation.

5. Power consumption is typically 20% higher for 12 in fixture lengths.

6. Consult factory for availability of static Royal Blue, 6500K and 90+ CRI.

7. Static colors made to order 8-10 weeks.

8. 8x8, 10x10, 10x30, 10x60, 10x90, 15x25 and WW distributions come with a half-frosted lens to bring light low on the wall for grazing applications. Clear lens also available, consult factory.
9. For best results use with HO fixtures at a 6 in setback from surface. Contact factory for application support.

10. Do not specify a tilt setting for the asymmetric wallwash option. The asymmetric wallwash optic is factory set with a 2.5 degree tilt.

11. Tilt setting is factory set and cannot be adjusted in the field.

12. The addition of an internal louver will affect beam distribution. Consult factory for application support.

13. A Lumentranslator 2 (LTL2) and LumenID (LID) must be specified for Lumentalk applications. Consult Lumentranslator 2 and Lumentalk pages and specification sheets for details.

14. A control box (CBX) and LumenID (LID) must be specified.

15. Consult European specification sheet and installation instructions for CE wiring information.
