

PRODUCTS & SERVICES

▶ SIMUL8 CONSULTING

Do you require quick answers to a plant-design project? Need a simulation model of a production process but don't have the time to build it? Then talk to one of our consultants and make use of their extensive SIMUL8 modeling experience to build you a simulation quickly and professionally.

You will be amazed at how rapidly a simulation model can be developed. This includes user-friendly dialogs to allow you to change model parameters; comprehensive output reports to help you evaluate important project options; advanced graphics to let you present your simulation using the latest SIMUL8 graphic animation; and much more.

Simulation models can be developed in a matter of days for just a few thousand dollars and we can provide you with a free run-time version of the SIMUL8 software. Call us to learn more about this service and discuss your potential simulation application with one of our professional simulation consultants – all client information is strictly held as private and confidential.

To learn more about our consulting services visit www.visual8.com/consulting.html

▶ SIMUL8 COACHING

If you are in need of help using SIMUL8 features or require some assistance in structuring a model we offer remote coaching. This service provides you with a professional simulation consultant who can help you design your model and make the best use of SIMUL8 features.

Our consultants are available by phone and web-conferencing to help you for as much or as little time you require – at any stage of your model development. This service is provided by the hour or you can purchase a block of time at a discounted rate. This service typically involves model review via e-mail, telephone calls and web meeting to reduce support costs. All communication is treated as private and confidential and your models and data are returned to you at the end of the session.

You can get coaching assistance for as little as \$145 per hour or \$950 per day. To find out more about this growing service and to see what people have to say about it, visit www.visual8.com/coaching.html

▶ SIMUL8 TRAINING

▶ Two-day Introductory Course (\$995 per person)

A first-class introduction to the use of SIMUL8 for a variety of business applications including process design, capacity planning, line balancing, production modeling, and setting of performance targets. Extensive training materials provide practical advice in building simulation models. Attendees also leave with our latest simulation book, "[Simulation Modeling with SIMUL8](#)", a Solutions Pack CD of worked assignments and examples at the end of the course.

▶ Two-day Advanced Course (\$995 per person)

An in-depth course that introduces the use of Excel, SQL links, and Visual Logic, SIMUL8's programming language. The course covers some of the more complex functionality within SIMUL8 such as Information Store variables, Jobs Matrix, and advanced Visual Logic calls. The textbook, "[Simulation Modeling with SIMUL8](#)", and a Solutions Pack CD with course materials is provided.

▶ Optional Third Day (\$500 per person)

For both courses, a third training day is offered to let you spend time with our trainers to learn how SIMUL8 can be applied to your specific problem and to review the course materials in more depth.

► On-site Training Courses

Significant savings can be earned by requesting an on-site SIMUL8 training course. This is very cost-effective if there are a number of individuals within your organization that want to learn about SIMUL8. On-site course eliminates the need for staff to travel to remote city locations and increase the potential number of people within the company that are then able to attend the course – at no extra cost!

On-site courses are priced at the flat fee of \$3,750 plus the Instructors out-of-pocket expenses. You may have up to six people attend these courses which includes a 2-day introductory session and a special one-day of coaching. Attendees can benefit from the expertise of the Instructor to address potential simulation applications within the Company which can be freely discussed amongst the group confident in the knowledge that this information is private and confidential.

For more details on these courses and available dates visit – www.visual8.com/training.html

► SIMUL8 SOFTWARE OPTIONS

We also provide the SIMUL8 software which is used to simulate manufacturing, distribution, and business processes to help identify and resolve bottleneck operations increasing system throughput and efficiency.

Type of SIMUL8 License	Version ¹	Description	Price
Single User License	Standard 2006	1 Standalone Std. license	\$1,495
Single User License	Professional 2006	1 Standalone Pro. license	\$4,995
Concurrent Network License	Standard 2006	5 Pack Network license	\$8,970
Concurrent Network License	Professional 2006	5 Pack Network license	\$29,970

¹ For a detailed explanation of these options please visit - www.visual8.com/simul8.html
When purchased with training a 20% discount may apply to the cost of the course - a \$200 value.

► CLIENTS & TESTIMONIALS

Visual8 is the principal support agent for SIMUL8 in North America. Our consultants have many years of SIMUL8 training and consulting with clients such as Ford, Kodak, Knoll Group, GM, Best Foods, U.S. Army, UASF, Disney, HP, Fidelity, Nibco, American Standard, Magna, Visteon, BNSF, Union Pacific, OPG, McDonalds, Husky, Cardinal Health, Johnson Controls, Children's Welfare League of America, Moen, Corning, Kelly Services, CIBC, Capital One, Doerun, 3M, Quad Graphics, StorageTek, TRW, CEMEX, Ontario Hydro, Ispat Steel, The Children's Hospital of Philadelphia, Novartis, Boeing, Dell, etc.

"I wanted to let you know how much me and PJ enjoyed your class. The individual attention we received helped us apply the simulations to real world situations." **Rich Muckey, IBP**

"The class was essential to our success at quickly understanding and applying the SIMUL8 tool to our needs." **Robert Shaw, Kelly Services Inc.**

"The "hands-on" part of the course allowed me to build a simulation model that I found immediately useful for improving operations back in our company's repair shop" **Brad Smythe, Romac Engineering.**

"The course booklet became a great reference after class. The instructors were not just reading from the book, they are real consultants who use the software. They could answer real questions about simulating the real world. I would quickly recommend these courses/software to my colleagues." **Susan Lackey, Moen Corporation**

"Thank you very much for the training. It was very helpful and I am excited about us deploying the tool on many of our projects. From one instructor to another, thank you for being patient with us." **C.J. Renegar, Burlington Northern Santa Fe Railway**

► SIMUL8 SUPPORT

For more details on the different levels of product support we offer visit - www.visual8.com/support.html

All prices are stated in US dollars and are subject to change without notice.
