Program Review

- What went well:
 - Eye-opening
 - Holiday preparedness – making soups in advance, freezing
 - Batter/Breading waste reduction goal; lessons about minimum acceptable product
- Challenges:
 - Targeting trim waste – affected by number of salad bar prep days, product seasonality
 - “Uncharacterized” auto-submissions
- How does your team define success with your LeanPath program?

Program Review

- What went well:
 - Met a spring challenge to increase transactions to 50 – even with increased transactions, weight totals were less

Program Review

- What went well:

- Challenges:
 - Not capturing as much FOH leftover waste as the other schools

Food Waste Alerts Feature

- Alerts are instant notifications sent via email that are triggered based on specific parameters that you choose.
- Pair your food waste reduction goal with an alert

Current Alert:

- Any waste transaction more than 30 lbs.

The screenshot shows a 'FOOD WASTE ALERT' notification from LeanPath. It includes a small image of bananas, a list of details, a login button, and contact information.

Next Steps

- Review and update LeanPath food items
- Plan for refresher training in the fall – emphasis on Front-of-House waste capture
- Confirm Champions
