

## W2 Control Drivers for Home Automation Control System

The following Home Automation drivers have been updated to support the KEF W2 wireless platform. These W2 Control Drivers support LS60 Wireless, LS50 Wireless II, LSX II and LSX II LT providing basic control functionality, such as play/pause, volume control, source switching and power off/on.

They are available to download from our partner page Intrinsic Dev <https://www.intrinsicdev.com/brands/kef/>.

The drivers for all control platforms will require a certified installer/integrator to add them to the homeowner's system. Intrinsic Dev provides full support to dealers, installers, and integrators, and have a dedicated online support platform that can be accessed here: <https://www.intrinsicdev.com/support/>

They also have a dedicated YouTube channel with integration tutorials for installers/integrators: <https://www.youtube.com/c/IntrinsicDev>

## W2 Media Drivers for Home Automation Control System

Content navigation function has been added to
