DOWNLIGHTING BY
LUMENWERX

Designed From The Ground Up. The Sky's The Limit.

Introducing LumenWerx point source family:
a new class of downlights and cylinders built with
the singular innovation, impeccable optics and
precision craftsmanship you've come to expect.

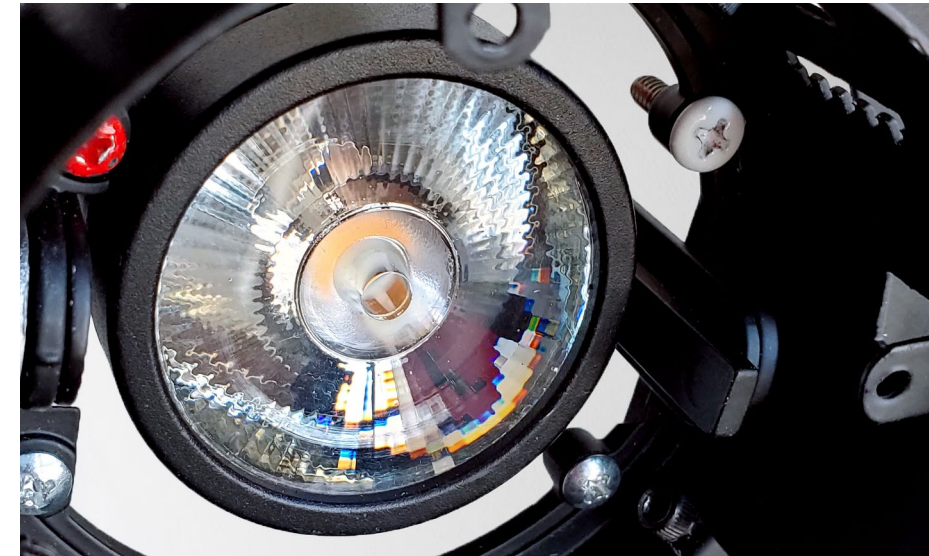

Proprietary HyFlex™ Optics.

A unique quad-tiered optical
system enables ultimate beam
control, multiple beam patterns
and complete field adjustability,
all from a single luminaire.

Proven Performance.

With industry-leading LEDs tested
to guarantee optimal chromatic
consistency and sterling reliability,
Voilà delivers stunning color, with
custom modules and color tuning
available as needed.

For Any Application.

Whether in a corporate office, a private residence, a school, a hospital, a store, a restaurant, or a gallery, Voilà provides the flexibility and precision to successfully address any lighting application.

The Spotlight It Deserves.

The natural choice for lighting artwork in a residence or gallery, Voilà allows for precise beam angle control and uniform illumination. Used alone or in combination with natural light, our HyFlex™ optics provide flexible control of contrast, brightness, and color alike.

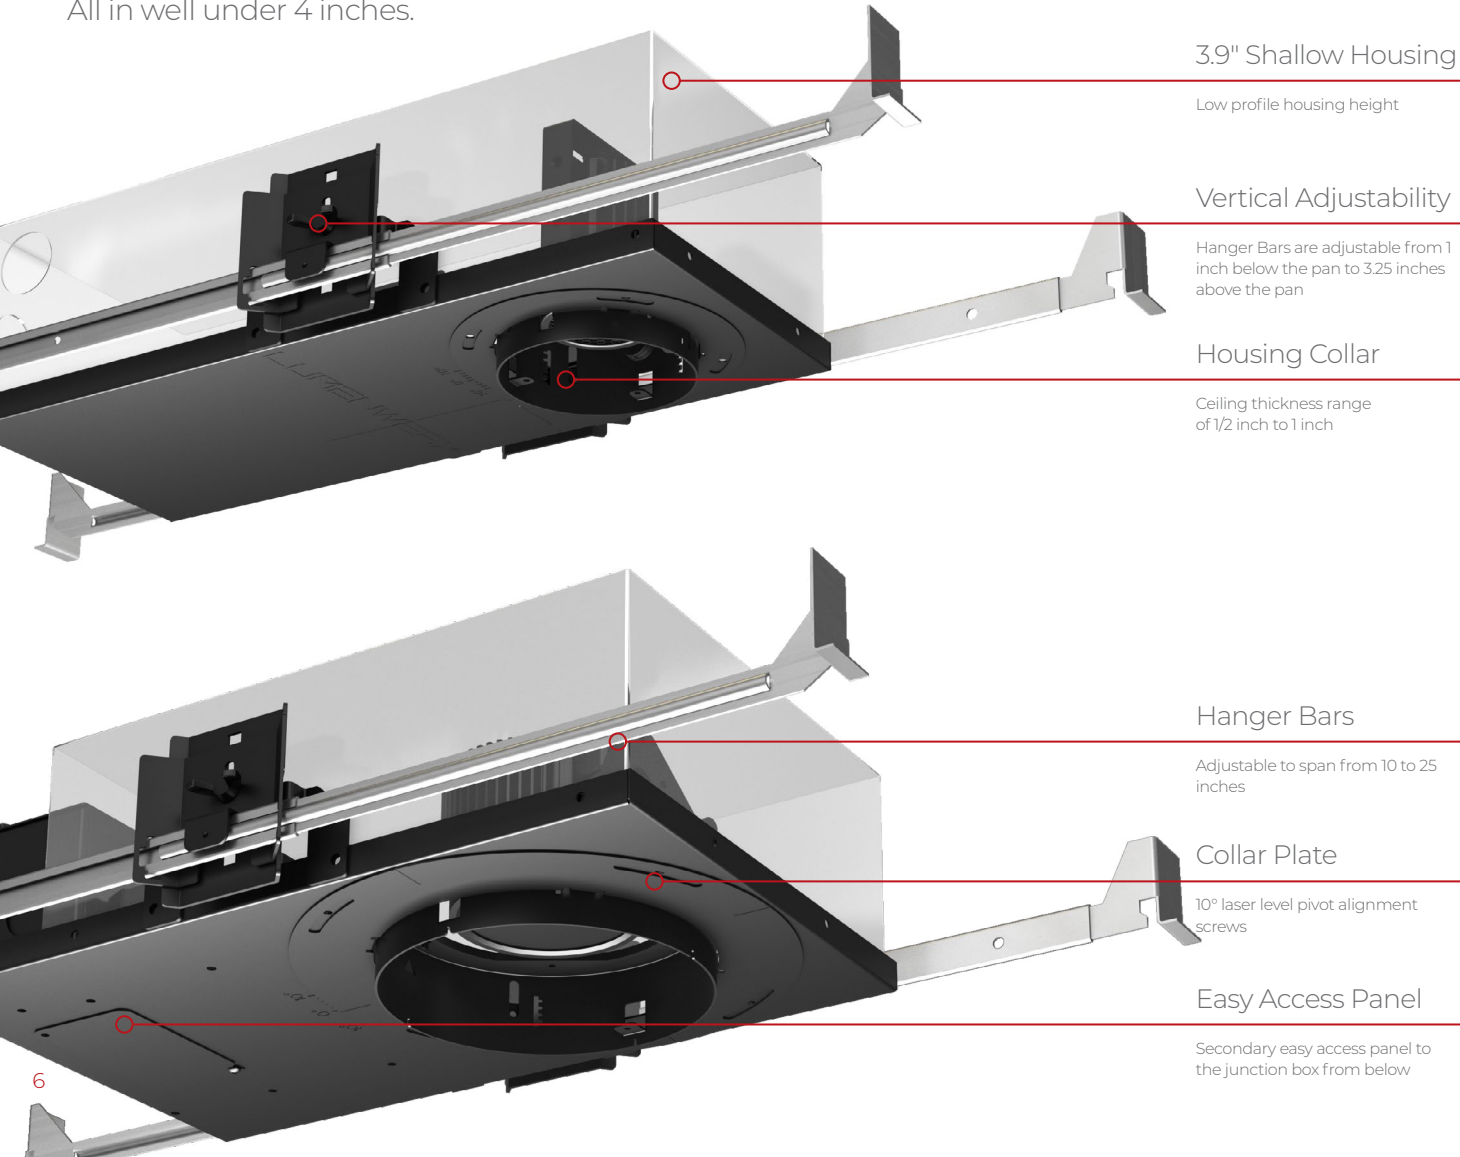

Beautiful On The Ceiling. Just As Exceptional Above.

Solve any challenge above the ceiling with Type IC, Chicago Plenum and Open Frame housings. Manage heat and ensure reliability with a cold-forged static aluminum assembly that lasts a lifetime. Customize lumen output with our programmable, proprietary LumenWerx Light Engine. All in well under 4 inches.

3.9"

Recessed
Depth

3.9" Shallow Housing

Low profile housing height

Vertical Adjustability

Hanger Bars are adjustable from 1 inch below the pan to 3.25 inches above the pan

A Full Spectrum of Drivers.

With the flexibility you've come to expect from LumenWerx, Voilà is supported by a full range of set and programmable drivers for any electrical system as well as Lutron and Emergency configurations.

0.1%

Dimming
Available

1.0%

Standard

Impeccably Smooth Precision Control.

Dim to 1% with our standard driver and to just 0.1% for specialized applications, maintaining color rendering and consistent control across the complete illumination range.

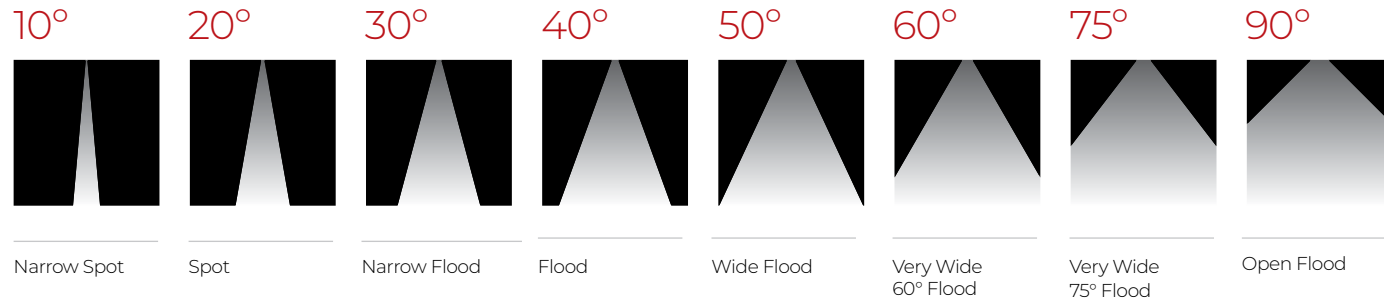

HyFlex™ Optics: The Full Range.

Designed and built in-house from start to finish, Voilà combines refraction, reflection, diffusion, and shielding in a single optic. Combining the TIR module with a diffuser and optional smoothing lens, beam interchange can be easily performed on site.

Field Changeable Beam Angles

 10° - 90° Beam Angles
Available in Fixed, Adjustable

Wall Wash

Optional optical accessories
Linear spread lens, Hex Louver & Color Filters

Color Control - Chromawerx
Dim to Warm Sola & Tunable White Duo

Square The Circle.

Voilà is also available in pendant and ceiling-mounted configurations with flush, deep, or shallow regressed lenses in black, white or custom finishes. 2 inches diameter round luminaires available in 9" height and 4" in 9" height, all with the same great optics.

ChromaWerx. A Whole New World of Color.

Whatever the application, our one- and two-channel solutions allow simple, reliable, complete color control, making LumenWerx your choice for delivering luminaire design, performance quality, and color brilliance.

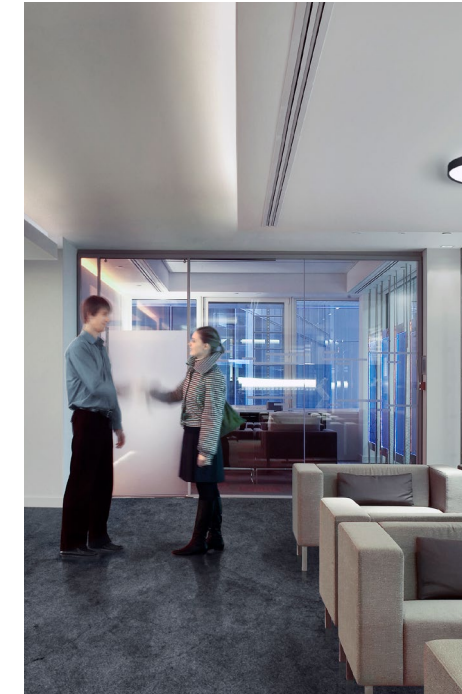

85+
Maintained CRI

Dim to Warm with Sola.

ChromaWerx Sola provides one-channel control to keep spaces warm and welcoming. Mirroring the effect of traditional incandescent, Sola dims from 3500K to 2200K letting you transition any space from corporate to cozy.

Tuneable White with Duo.

ChromaWerx Duo's two-channel control balances interior light with natural light as it changes hue over the course of the day, optimizing comfort from day to night.

Ranging from 2700K to 6500K Duo adapts to meet your unique requirements. Studies show; ChromaWerx Duo can improve health and well-being by improving sleep quality and boosting productivity, all while reducing energy costs in the worlds of business, education, healthcare, and beyond.

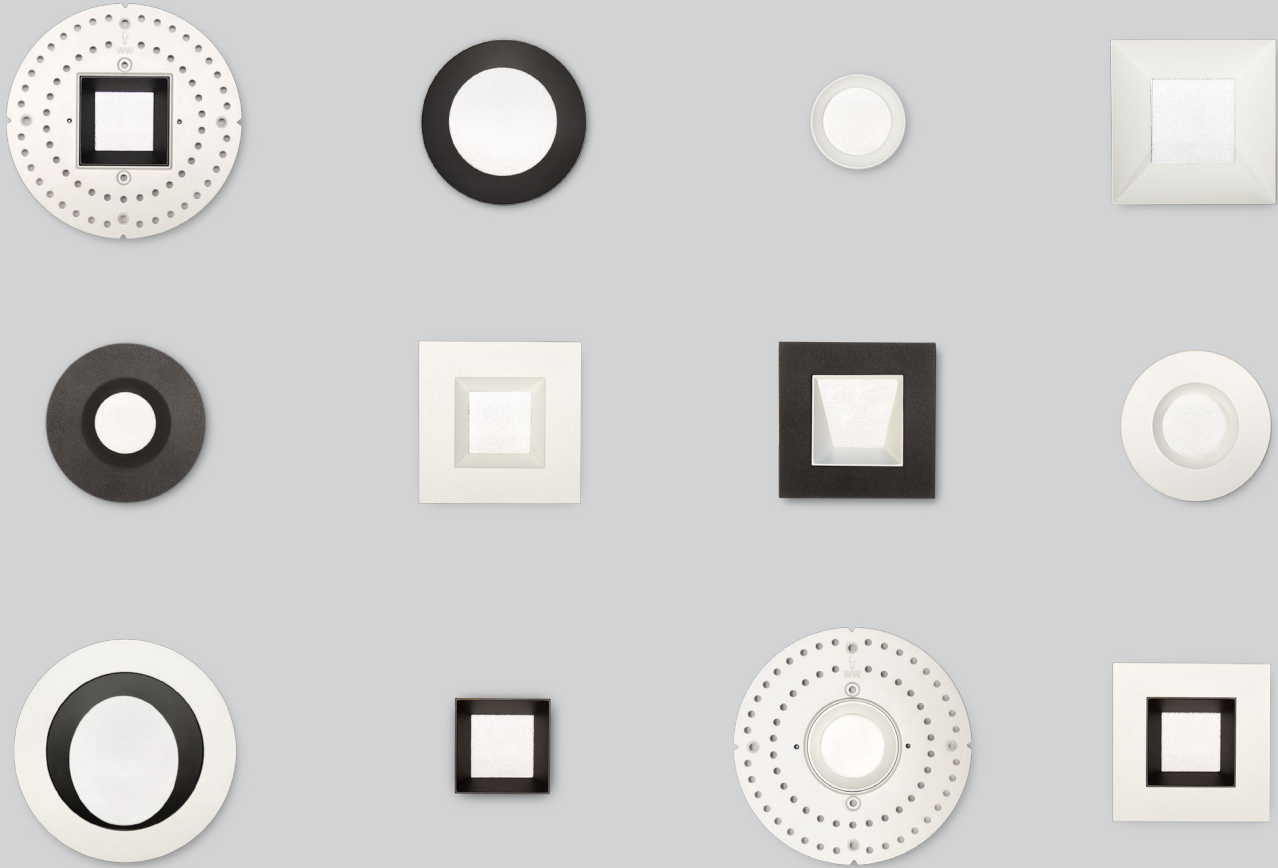

For Every Luminaire.

With more options for LED sources, consistency across different luminaires and luminaire types is increasingly critical and challenging. At LumenWerx we have standardized consistent color points for the LED emitters we use in Voila and those in the rest of our Luminaire portfolio.

And More.

Rely on LumenWerx's unrivaled expertise, innovation, quality and artistry for every one of your lighting needs. Without compromise. At a price point you'll be surprised by. Voilà.

A One Of A Kind Combination:
Unrivaled Craftsmanship & Innovation Beyond Compare.

Proud to be North America's fastest-growing lighting company, our versatile and varied luminaires are designed to meet your every need. Have a custom request? With R&D laboratories and manufacturing in-house, every product is built to order with rapid turnaround, supporting you every step of the way.
