# Voilà Cylinders & Cuboids

To offer you variety and versatility, we have added two new sizes to the cylinder and cuboid groups of our highly coveted Voilà family. At 4.5-inch and 6-inch heights, these fixtures provide the same exemplary design elements for which Voilà has been recognized and celebrated since its launch. These new sizes, along with our popular 9-inch cylinder, allow for more design options.

- **2" and 4" diameter**
- **128 lm/W**
- **3 heights**

# Optical Flexibility

With eight beam angle options, ranging from 10 to 90 degrees, Voilà is the ideal choice for various applications. Featuring our unique HyFlex™ quad-tiered optical system that combines both a reflector and refractor, Voilà enables beam smoothing and spreading without compromising performance, which is second to none.

Mix and match the cylinder heights and size within the same space to create visual appeal.

# Performance

Compact yet powerful, our Voilà 2-inch and 4-inch cylinders outshine other leading competitors with 30% more performance. Voilà also leads in efficacy with an industry best 107 lm/W. Voilà offers an impressive UGR rating of <10 on beam angles of 40 degrees or less. Voilà provides a powerful low glare downlight that is the sensible choice for many projects.

Max lumen output:  
2078 lm\*

## WELL™

### WELL building

The Voilà family meets the WELL building standard for UGR of <19 in all available lumen packages.

# Elegant form meets everyday function

**Voilà cuboids:** 4.5" surface mounted and 6" pendant mounted.

# Mounting and Control options

With several mounting options to choose from, Voilà cylinders are suitable for any installation, from an integral driver canopy to a standard one. Voilà also offers a conduit feed for ceilings that are difficult to puncture, like those made of wood or concrete.

When it comes to control, Voilà cylinders have multiple options to suit your needs. Voilà can work with all systems in both integral and remote mounting installations.

## **Control protocols**

0-10V, TRIAC, ELV, eldoLED, Lutron, DMX, DALI

**Regular Canopy\***

Integral (9" only)  
or remote driver (4.5", 6" and 9").

**Conduit Feed Canopy\***

Integral (9" only) or  
remote driver (4.5", 6" and 9").  
For surface mounted J-box.

**Integral Driver Canopy\***

Integral driver only.

\* Please consult specification sheets for canopy details and limitations.

# Voilà family design solutions

Lighting options are plentiful with the Voilà suite of downlights, cylinders, and cuboids, from industry-leading wall wash optics to full downlight adjustability to beam angles ranging from 10° to 90° to pendants as focal points or props in your lighting story. Plus, applications abound with Sola, Duo, and Bios LED. Shape up your space with variety, style, and performance – Voilà!
