The Ribbon Collection

About

An award-winning trio of touch-free fixtures that offers a modern, intuitive solution to the flow of the restroom experience.

- A sleek, minimalist design created for high-traffic environments.
- Integrated anti-splash and touch-free technology that simplifies maintenance.
- Designed to keep water in the sink, supporting cleaner and safer restrooms.

WHY

The Ribbon Collection

Streamlined User Flow

In a typical restroom experience:

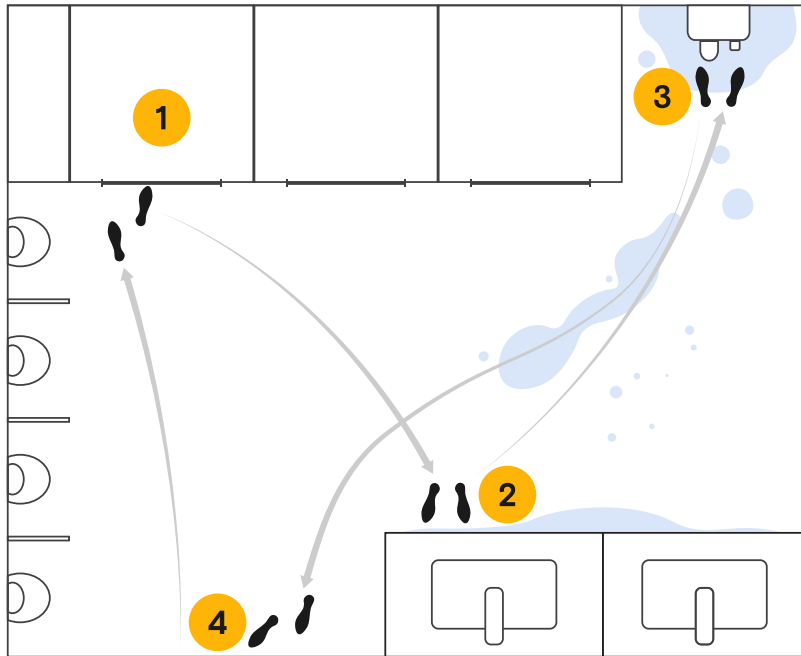

1. Users enter and use facilities
2. Wash hands
3. Walk to dryer with dripping wet hands
4. Exit

As users travel between key areas, water is trailed across the restroom floor. Furthermore, excess water from the hands is blown to the floor by a separate hand drying unit, creating an ever-increasing puddle throughout the day that will require constant monitoring and maintenance.

The Ribbon Collection's beautifully designed set of fixtures with an over-the-sink hand dryer, minimizes mess and streamlines the user experience.

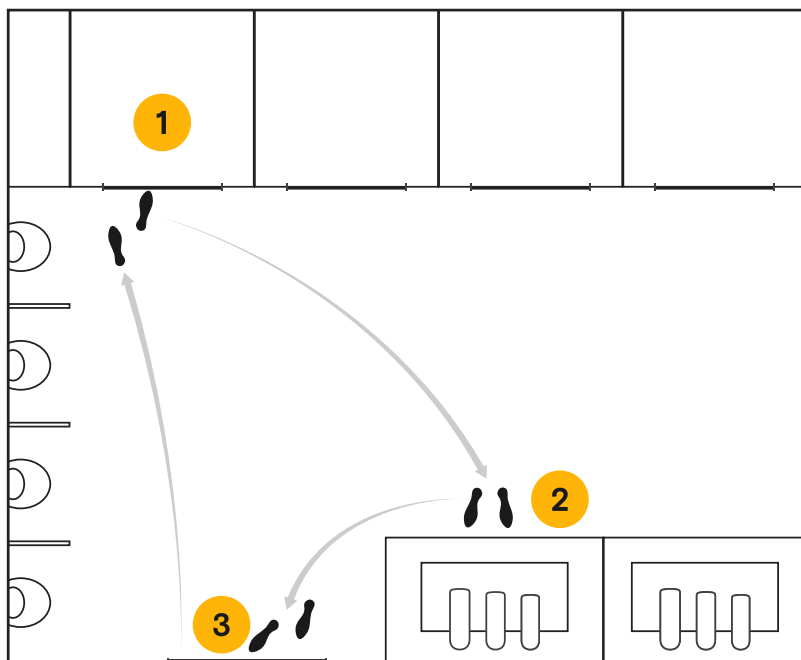

Typical restroom scenario

- ✗ Water trailing on floors
- ✗ Water is blown on the floor by hand dryer
- ✗ Inefficient use of space

Ribbon-enabled restroom scenario

- ✓ Streamlined process
- ✓ No safety hazard on floors
- ✓ Less maintenance required

WHY

The Ribbon Collection

Flexibility in Specifying

Each fixture in the Ribbon Collection was designed to function optimally either as a standalone product or arranged together according to the needs of any space.

The specifier chooses how much, or how little, serves the visual and practical needs of their project. Fixtures are easily configurable to best fit the environment and user behavior. The Ribbon fixtures seamlessly retrofit into any modern sink.

- + Specified in pieces
- + Custom finishes available
- + Fits any modern sink for an easy upgrade

WHY

The Ribbon Collection

Functional &
Design Benefits

**A Smarter System That Saves
Time and Eliminates Mess**

Sanitary

Customizable

Touch-free

Streamlined User Flow

Easy to Maintain

Durable

The Ribbon Faucet

Effortlessly Efficient

- + **Flow Rates**
Available in 0.35 or 0.5 GPM to meet sustainability standards.
- + **Cascade Aerator**
Minimizes splashing, keeping water contained within the sink.
- + **Easily Configurable**
Programmable to run for up to 20 seconds, it helps you meet CDC-recommended handwashing times effortlessly.

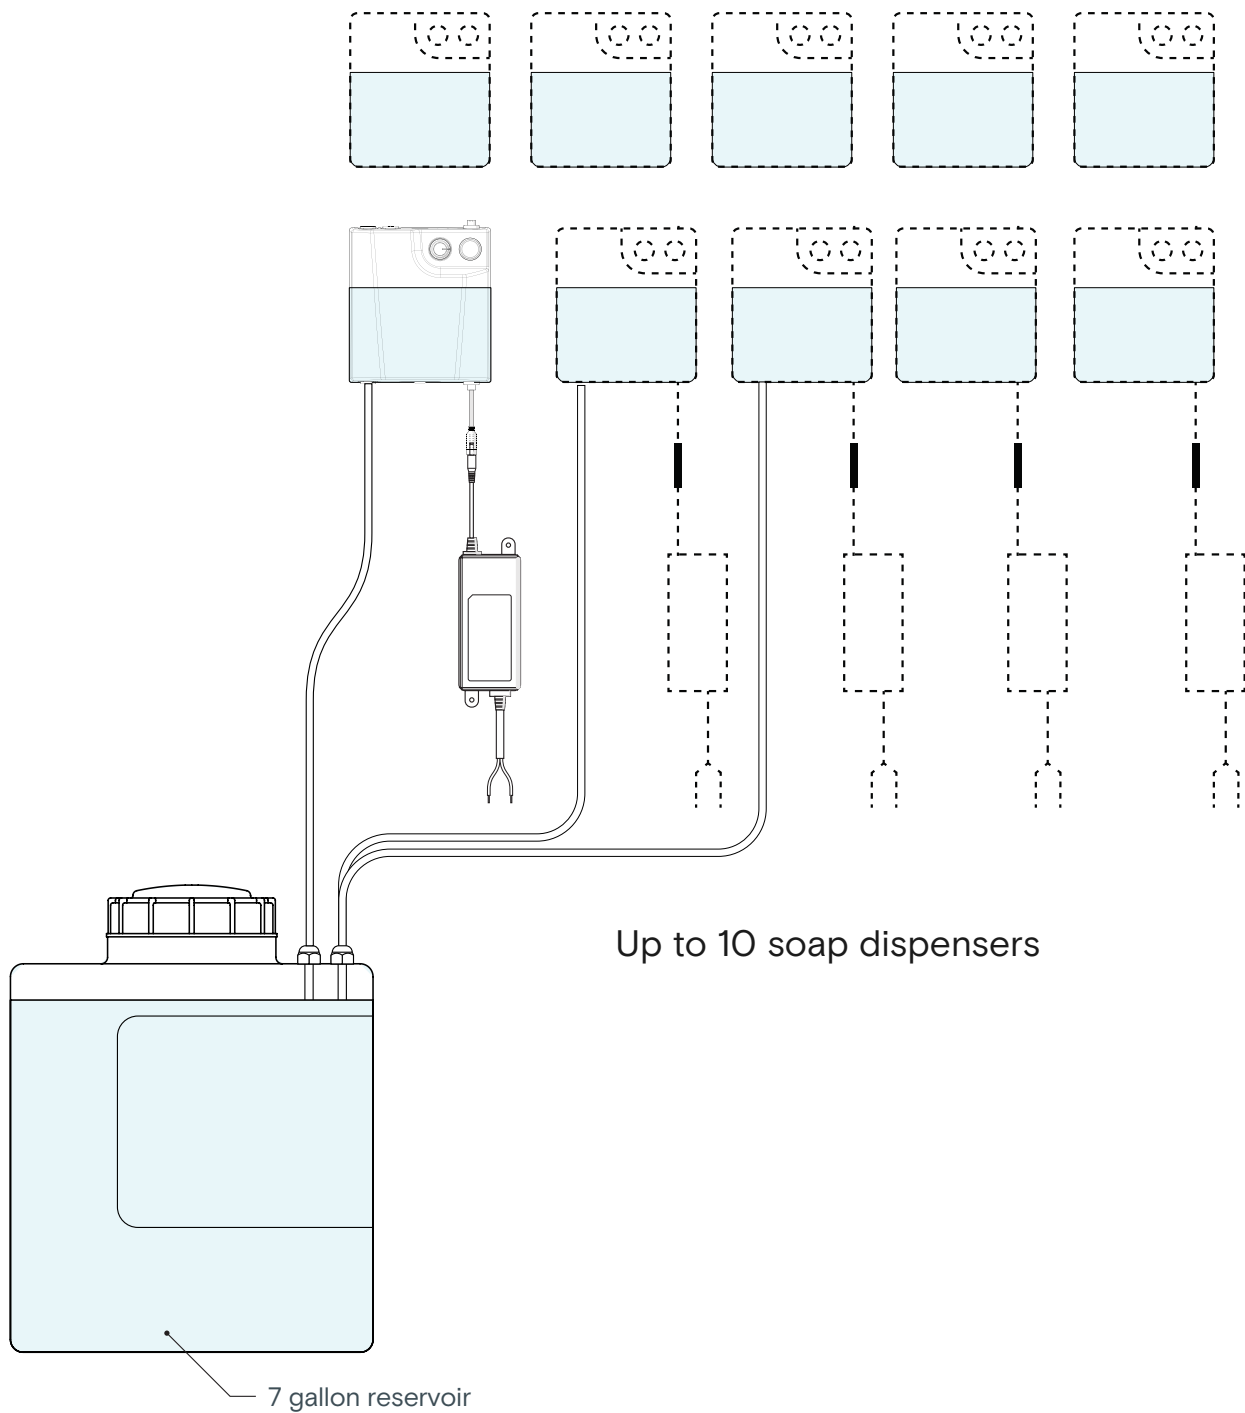

The Ribbon Soap Dispenser

Clean, Efficient, Reliable

- + **Foam Soap Efficiency**
Calibrated for foam soap, which feels luxurious and reduces overuse.
- + **Multi-Feed Capability**
Connects up to six dispensers to a single reservoir, simplifying maintenance in high-traffic restrooms.
- + **Smart Soap System**
Available with SMART technology, the soap system senses low soap levels and alerts maintenance staff.

SMART Soap System

Conventional soap dispensers require refilling over 100 times per week in high volume areas, such as airports.

With our Soap Systems, as many as ten stations are filled uniformly from a single 7-gallon reservoir, reducing the refill rate to once a week.

Available with SMART technology, the soap system senses low soap levels and alerts maintenance staff to keep soap running without interruption – relieving pressure on facility maintenance workers and promoting greater accuracy in supply procurement.

The Ribbon Hand Dryer

Sanitary, Quiet, Efficient

- + **Over-Sink Design**
Keeps water in the sink, preventing wet floors.
- + **Quiet Operation**
With a 71 dB output, it's the quietest commercial hand dryer.
- + **HEPA Filter Option**
Improves air quality, ideal for spaces focused on high hygiene standards.

The Project

TSL supplied soap dispensers and faucets in Black PVD from The Ribbon Collection, Monolith A Series basins in a dark gray aggregate finish, and black powder coated pipe skirts to fit under the sinks.

- + Low-profile fixtures for minimalist design
- + Anti-corrosion PVD finishes
- + Sensor faucets and soap dispensers
- + Modular ADA-compliant Monolith basins

Products

- + The Ribbon soap dispenser and faucet in black PVD
- + The Monolith A Series sink in Corian Carbon Concrete
- + Angled pipe skirts in matte black
