

The classic

– in
a new
light

Light and energy
are now integral
components
of USM Haller,
illuminating the
path to your
creative potential.

See the things you love
in a new light.

Light brightens, gives warmth
and sharpens our perception.
It inherently changes how we
respond to our environment.

Watch and get inspired by the light:
www.usm.com

The power supply now available to USM Haller is revolutionary: It is cable-free. Thanks to refinements of the iconic USM Haller ball, connector and tube, power flow is integrated into the very structure of the furniture. Light and USB inserts, which are snapped into place flush with the tube, are practically invisible when turned off.

The light inserts can be adapted to illuminate the furniture itself, its contents or the room it is in, while the practical USB charger powers mobile devices.

The innovative e-Elements cast the classic in a brand-new light.

Light
creates
atmosphere

Lamps directed backwards create unique moods, especially on textured surfaces – their reflection bathes favorite pieces in soft light. It's barely perceptible to the eye, but its function is indispensable: easily connectable USB chargers transform the design classic into a charging station for mobile devices.

Light
reveals
the invisible

USM Haller in its purest form, equipped with only glass shelves and doors. Rear-facing lights draw attention to the setting; discreetly placed exhibit lighting provides selective accents. From illuminating an esteemed museum to a family home to a bar – the integrated lighting gives the seemingly familiar an unimagined air of poetry.

Light
shows true
beauty

A seamless light fixture plus a timeless storage space:
The integrated light perfectly combines beauty and
practicality. Sensor-controlled lights in drawers and
compartments turn on automatically when opened.

Light

puts things
in focus

Independently controlled circuits open unlimited possibilities in lighting design: Gently dimmable from full brightness – for brilliantly orchestrated elegance.

Light

helps you find
what you're
looking for

The design options with USM Haller and its modular light components are as individual as your wardrobe. Whether a walk-in closet, a standalone piece in your bedroom or shop, filing, storing or presentation, USM Haller can be fully customised to your personal needs with e-Elements.

Light
creates
desire

The beauty of things can be revealed with the right light. In showcases or extension doors or angled shelves, light provides the flattering highlights in showrooms, museums, concept stores or shop-in-shop concepts – anywhere that storage and perfect product presentation are required.

Light
fuels
creativity

Boost the energy in your home office. Barely visible lights embedded in the tubes of new USM Haller e-Elements infuse warm light into your everyday life. USB chargers ensure that all mobile devices can be powered 24 hours a day. Lights and USB chargers can be disconnected and moved at any time. The interior can be evenly illuminated as the compartments and drop-down doors are opened.

Light
guides and
welcomes you

Used to welcome visitors in a retail space or work-space, USM Haller creates a handsome reception area. From the back, it reveals a working area and storage space. Integrated light through the use of e-Elements is where creativity starts for newly conceived direction and signage concepts.

Light and energy
at day
and night

Top – Warm white 2700 Kelvin
Middle – Cold white 5700 Kelvin
Bottom – Unilluminated

Product details

A modular structure of your design, either completely or partially equipped with e-Balls and e-Tubes, is connected to a source of electricity. The structure itself conducts the low voltage electricity to the desired location using the e-Balls, e-Connectors and e-Tubes to form a circuit. USB chargers or light sources can be snapped into place in pre-cut recesses. The power supply is drawn from any point near the ground. The power supply cable is attached to a Haller e-Ball, and the power adapter is subsequently tucked underneath the furniture until only the operating switch remains visible. From this point the power supply requires no further cables but rather is integrated into the structure of the furniture.

Application options

- 1

Glass panel
Glass elements can be illuminated throughout.
- 2

Without metal paneling
Compartments without metal paneling can be completely illuminated.
- 3

With metal paneling
Compartments with metal paneling can be illuminated from the front.
- 4

Compartment with an extension shelf
The entire compartment with an extension shelf can be illuminated.
- 5

Drop-down and extension door
Via the "Light When Compartment Is Open" function, the light automatically turns on when the door is opened.
- 6

Angled shelf
The presentation space is illuminated from the front.
- 7

Floor lighting
With floor lighting, the light shines at a 25-degree angle under the furniture.
- 8

Ambient lighting
The light is directed vertically towards the back, illuminating the surroundings with a warm glow.
- 9

e-USB charger
It can be integrated in the same places as the e-Lights.

e-Elements

- 1

e-Lights
Dimmable, available in
– Warm white 2700 Kelvin
– Cool white 5700 Kelvin
Both with or without the "light at compartment opening" function.
- 2

e-USB charger
Provides a voltage of 5 volts to the connected device. (Capacity: 6.5 W)
- 3

e-Dummy
Sleek, black e-Dummy element, closes recesses that are unutilised. Can be changed for additional e-Lights or e-USB charger later.
- 4

e-Tube (power outlet)
Tubes with recesses for e-Lights, e-USB chargers or e-Dummy elements that can be easily snapped into place or replaced.

L 350, 1 recess
L 500, 2 recesses
L 750, 3 recesses
- 5

e-Tube (conductive)
The conductive e-Tube serves to conduct the electricity if no inserts are desired in this location. It is available in lengths of 750, 500, 395, 350, 250 and 175 mm.
- 6

e-Ball, e-Connector
To enable the flow of electricity, the ball and connector were refined. The exterior dimensions remain unchanged. The distinguishing feature of the ball is the black insulation ring.
- 7

e-Power supply
Includes dimmer at the operating switch. Transforms the power supply voltage to 24 volts. (Capacity: 60 W)

CE

Engineered & Made in Switzerland.

Only available in certain countries. Please contact USM Switzerland for availability in your country.

Dimensions

The USM Haller system provides a wide variety of elements in standard sizes. Widths, depths and heights are indicated below. All measurements refer to the distance between axes.

All measurements in mm.

e-Tube (power outlet) with recesses for e-Lights, e-USB chargers or e-Dummy elements.

- L 350, 1 recess
- L 500, 2 recesses
- L 750, 3 recesses

			29 USM Inos, drawer set, open
			30 USM Inos, drawer set, closed
			31 USM Inos drawer organiser set

Your advantages at a glance

Turning the supporting structure into a power source opens up new possibilities for the USM Haller design classic:

Power supply

USB charger for charging mobile devices

Atmospheric light

Indirect room illumination

Object light

Direct illumination of objects in the furniture

Light when compartment is opened

Behind drop down doors, in extension shelves and in drawers

Energy-efficient

24 volts (low voltage) to efficiently provide electricity to the energy-saving, long-lasting LED lights and USB chargers.

Infinitely adjustable dimming

The extra-flat transformer is an on-off switch and a dimmer in one; it is located under the piece of furniture.

Two light temperatures

Warm light and cold light – depending on purpose and preference, which can be easily switched at any time.

Modular and future-oriented

Just like everything else about USM Modular Furniture Haller, the placement of light sources and chargers is modular – you can turn any desired part of the furniture into a power source. All elements can easily be exchanged. Trained USM sales partners can easily help plan and expand furniture supplied with electricity.

This innovation represents only the start of a highly complex development process: USM will soon unveil creative solutions in many promising fields of research.

Join the trend.
