MOSQUE

FEATURES

For the buyer:

- Manufactured in high quality, easy to clean porcelain or sanitary grade acrylic

For the contractor:

- Easy to install
- 'Water-in' and 'waste-out' through either the floor or rear of the unit; negating the need for sub-floor access

For the employer:

- Supports Corporate Social Responsibility (CSR), equality and diversity policies
- Mitigates health & safety risks and Disabled Discrimination Act (DDA) compliance risks

For the user:

- Safe, comfortable and dignified wudu appliance
- Designed together with numerous WuduMate taps to ensure that the spouts are in the most comfortable position for wudu and at the right angle to minimise splashing
- The chromed steel stool can be moved to provide a comfortable wudu position for adults, children and wheelchair users, and stored neatly over the unit when not being used
- Accommodates children and adults
- The optional seat handles are a benefit to older and less mobile users

WuduMate® MODULAR

DESIGNED FOR HIGH USAGE,
COMMUNAL ABLUTION
ENVIRONMENTS

+ Optional add-on

MATERIAL	DIMENSIONS
ACRYLIC	L948 x W698 x H1140mm

FEATURES

For the buyer:

- Manufactured in high quality, easy to clean sanitary grade acrylic
- Can accommodate users wanting to perform wudu whilst seated, standing or in their wheelchairs
- Individual drainage outlets improve hygiene and help reduce unpleasant odours
- The avoidance of grout reduces maintenance, facilitates reduction of bacteria and extends the life of the ablution area

For the contractor:

- Easy to install
- Can be installed at ground level to allow wheelchair access onto the unit provided no seat pole is installed
- Can be joined neatly together with other WuduMate Modulares to provide as many wudu stations as required

For the employer:

- Supports Corporate Social Responsibility (CSR), equality and diversity policies
- Mitigates health & safety risks and Disabled Discrimination Act (DDA) compliance risks

For the user:

- Safe, comfortable and dignified wudu appliance
- The stainless steel pole can be installed with the seat closer or further away from the tap to accommodate for children and adults
- Designed together with numerous WuduMate taps to ensure that the spouts are in the most comfortable position for wudu and at the right angle to minimise splashing

BEING WHEELED

FEATURES

For the employer:

- Supports Corporate Social Responsibility (CSR), equality and diversity policies
- Mitigates health & safety risks and Disabled Discrimination Act (DDA) compliance risks

For the building owner (hotels, prisons, police stations, university halls of residence, etc):

- A moveable wudu unit that can be wheeled to individuals rooms for ritual washing

For the user:

- Safe, comfortable and dignified personal wudu appliance
- Compact, moveable WuduMate with handle and wheels for moving from one location to another
- Manufactured with integral clean and grey water reservoirs in HDPE Plastic
- Can be wheeled and stored until required
- Retractable stool and bowl which can be pulled out for use, and discreetly stowed for storage or for wheeling elsewhere
- A 14 litre upper reservoir which can either be removed, taken to a water source for filling or wheeled to a water source and filled with a hose
- A 14 litre lower reservoir which can either be removed and carried to a basin/drain for emptying, or wheeled to a basin/drain and emptied with the optional internal pump and hose
- A tap with a c.1 litre per minute flow rate giving approximately 14 minutes running water for wudu before emptying/refilling
- The chromed steel stool can be moved to provide a comfortable wudu position for adults, children and wheelchair users and stored neatly inside the unit when not being used

DESIGNED FOR DOMESTIC BATHROOMS AND OTHER LOCATIONS WHERE THERE IS INSUFFICIENT SPACE FOR A BASIN AND SEPARATE FOOTBATH

FEATURES

For the buyer:

- Made of high-quality, easy-to-clean porcelain
- Wall-hung, facilitating cleaning underneath
- Provides both a hand washing and foot rinsing facility in one unit within a 600mm wall space
- Optional WuduMate stool, grab bars and non-slip matting available
- Choice of WuduMate taps

For the contractor

- Easy to install
- Water-in and waste-out through the rear of the unit

For the employer:

- The WuduBasin provides a compact facility for hand and foot washing
- Supports Corporate Social Responsibility (CSR), equality and diversity policies
- Health and Safety risks and Disabled Discrimination Act (DDA) compliance risks are mitigated when the WuduBasin is used with a stool

For user:

- Makes performing wudu easier without taking up extra space
- For improved comfort, can be paired with the WuduMate Mobile Stool, which fits neatly underneath when not in use
- Accessible for wheelchair users

ACCESSIBILITY

ALL WUDUMATE MODELS CAN BE CONFIGURED WITH SOME LEVEL OF ACCESSIBILITY FOR DISABLED PEOPLE

WuduMate® COMPACT

CSA CERT. NO: 301439

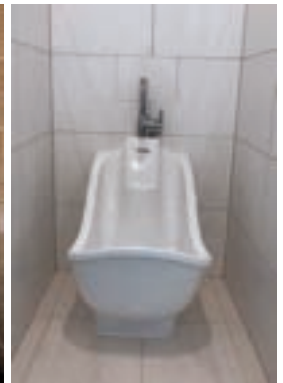

The WuduMate Compact's stool can be pushed aside to provide wheelchair access, with grab bars being provided for support, and taps with wrist blades or sensors for ease of use for arthritic users. WuduMate uniquely offers optional handles to the stool, providing extra stability and ease of access for an older or less mobile user.

WM COMPACT WITH STOOL WHICH CAN EASILY BE PUSHED ASIDE FOR WHEELCHAIR ACCESS

WM COMPACT WITH GRAB BARS

WM COMPACT WITH STOOL REMOVED FOR WHEELCHAIR ACCESS

WuduMate® CLASSIC

CSA CERT. NO: 301439

The WuduMate Classic relies on wheelchair users dismounting from the wheelchair to the WuduMate as one would a DOC M toilet, with grab bars being provided for support, and taps with wrist blades or sensors for ease of use for arthritic users.

WM CLASSIC WITH GRAB BARS AND ROOM FOR WHEELCHAIR ACCESS

WM MODULAR DISABLED WITH SENSOR TAP

WuduMate® MODULAR

The WuduMate Modular Disabled is specifically designed to be installed without a seat enabling wheelchairs to be wheeled onto the unit, with grab bars being provided for support, and taps with wrist blades or sensors for ease of use for arthritic users.

TOILETS & BIDETS

TURKISH STYLE TOILET WITH INTEGRAL BIDET SPRAY

In many countries it is customary to have a bidet spray inside the bowl of the toilet, which is operated by an on/off isolator valve located conveniently to hand on the wall.

Having the bidet spray nozzle located within the toilet bowl has a number of benefits:

- It keeps the water inside the bowl, thus reducing water splashing on the floor, which could be unpleasant for other users and a potential slipping hazard
- The inbuilt nozzle is more reliable than a handheld spray
- The inbuilt nozzle, unlike a handheld spray, cannot be stolen

BACK FLOW PREVENTER

In some countries, including the UK (Category 3, 4 and 5 UK plumbing regulations), regulations exist which stipulate that a back flow preventer is installed in line to the bidet nozzle, in conjunction with a separate header tank, to avoid the possibility of germs flowing back to the main water supply.

HYBRID TOILET

The new WuduMate Hybrid Toilet, featuring both a rim with two foot positions, and a seat, can be used as an Eastern-style squat toilet as well as a seated Western-style toilet. It is now simple to replace a Western-style toilet with the Hybrid toilet, as the outlet pipe for the new model connects to a P trap fitting.

WuduMate® PERSONAL

FOLDABLE, POCKET-SIZED 'LOTA' FOR PERSONAL WASHING (ISTINJA), IDEAL FOR USE WHEN TRAVELLING AWAY FROM HOME (E.G. SCHOOL, UNIVERSITY, WORK, UMRAH, HAJJ ETC.)

- Hygienic, discreet and dignified alternative to using bottles and cup
- Folds neatly into a compact, self-sealing pouch
- Holds 0.6L of water
- Must-have product for your customer's pocket, bag or car

WuduMate® MOBILE BIDET

DESIGNED FOR ANY SETTING WHERE A TEMPORARY BIDET FACILITY IS APPROPRIATE

FEATURES

For the building owner (hotels, hospitals, university halls of residence, corporate buildings, rented housing etc.):

- Self-contained, battery-powered bidet
- Requires no installation
- An innovative and convenient alternative to a hand-held, plumbed in shattaf (douche)
- Can operate completely without a plumbing supply
- If connected to mains water, acts as an isolating header tank, removing the risk of cross contamination of the water supply, thereby complying with Category 3, 4 and 5 plumbing regulations
- Combines superior hygiene and safety with the convenience of not needing traditional plumbing infrastructure

For the employer:

- Whenever necessary, provides Muslim staff and visitors with a personal washing facility, supporting Corporate Social Responsibility (CSR), equality and diversity policies

For the user:

- Muslim tenant, hotel guest, patient, prisoner, employee – all can benefit from the provision of the WuduMate Mobile Bidet

TOILETS & BIDETS

BIDET SPRAYS/SHATTAFS

A Shattaf is a handheld bidet spray which can be fitted alongside squat or Western-style toilets. It offers a hygienic and compact alternative to traditional methods of cleansing (e.g. lota) after using the toilet, which allows users to deliver a controlled spray of water.

- Available in brass (premium) or chromed plastic (regular)
- Includes flexible hose and wall bracket
- Supplied with on/off valve
- Shattaf Premium Douche Set includes premium chromed brass spray, hanger, hose and stop valve
- Shattaf can be installed with a Retail Bathroom Mixer (TMV) so the water used for washing can be set at an ambient temperature

- Shattaf Regular Douche Set comes in three colourways: Chrome, Black, and Black Trim, and includes regular adjustable spray, hanger, hose and on/off valve
- Optional time delay valve available. This prolongs the life of the spray, prevents both potential drips and floods if the douche gets damaged or removed, and reduces excessive water usage

BIOZONE

Does your ablution area suffer from unpleasant odours emanating from adjacent toilets?

Biozone is a unique, wall-mounted air purifier which kills the bacteria responsible for these odours and destroys viruses INCLUDING COVID 19, both in the air and on surfaces.

WASHROOM ACCESSORIES

ANTI-SLIP MATTING

WuduMat by Heronrib gives you added safety, slip resistance, multi-directional drainage and maximum hygiene.

Made from strong, non-porous PVC sections with channelled underbars, our matting will automatically self-drain even the largest amounts of water. Therefore, its design provides superior performance in wudu areas and helps prevent water from entering the prayer hall.

WuduMat by Heronrib is available in 10m rolls in widths of 500mm, 1m or 1.2m or cut to specific lengths with a slight surcharge. WuduMat is also available shaped to fit the WuduMate Compact and Classic.

Available in a range of colours.
