

SkLO:LIT

SkLO

SkLO : LIT

The desire to bring light to glass is irresistible. It is precisely this unique relationship with light that makes handblown glass so magical. To bring control to this light, this relationship is what we explore in SkLO : LIT.

Our process of design and development is painstaking. We bring metal to the glass, to give structure and scale. Rather than an afterthought, it is the relationship between metal and glass that drives the SkLO : LIT design process. Our designs seek to achieve a harmony and balance between these two materials, to give beautiful light. We add technology and complexity, but the light must seem natural and effortless.

In SkLO : LIT, our commitment to craft and handmade quality go beyond handblown glass. Our metals are substantial and solid. Exposed fasteners and expressed joints mark our work. Traditional metalsmithing, custom machining, hand-applied finishes, and a careful attention to detail are the hallmarks of SkLO : LIT.

SkLO is a design and manufacturing company with locations in both California (SkLO US) and the Czech Republic (SkLO EU). We produce lighting to serve global markets, with certifications such as UL listing and CE marking available.

balance pendant

balance pendant shown with opaque white glass and brushed brass metal finish
(north american canopy shown in photo)

balance pendant
CE ENEC CB

The *balance* pendant is a minimal, sculptural suspended light composed of a larger lit 18cm diameter sphere on a short horizontal stem balanced by a smaller lit 11cm diameter sphere on a longer, downward arcing stem. The spherical glass diffusers feature the signature SkLO double-dipped, fire-polished mouths which show where the glass is broken from the blower's pipe, making each unique.

Sockets: 220-240V G9 3W Max
Canopy: Brass canopy with exposed fasteners
Pendant suspended from canopy on rigid brass stem (not field adjustable)
Specify overall drop length
Minimum overall drop length is 90cm. Lengths over 152cm available at additional cost
Bulbs included

Standard metal finishes: dark oxidized / brushed brass (other finishes available on request)
Five glass colors available (including clear)

dew pendant

dew pendants shown with brushed brass metal finish

dew pendant
CE EAC CB

The *dew* pendant is an intense expression of the molten nature of handblown glass. For a diffuser, the *dew* pendant features a solid sculpted glass shape composed of layers of glass applied while hot, giving it a "dripping" appearance. The glass is permanently attached to the solid brass armature, which is hidden behind a brass cylinder. The light bulb is changed by simply lifting the brass cylinder upwards to access the socket. Note that the fixture also "uplights" slightly through the open top of the cylinder. The glass diffuser element is available in either clear glass or sandblasted glass, for two very different effects.

push table

push table light shown with brushed brass hardware – inset shows "push" detail at top of the glass

push table
CE ENEC CB

The *push* table light is a minimal, curving, tapered cylinder of handblown opaque white glass, transformed into a compelling table light with the addition of a clever brass armature. A brass ring slides over the top of the glass and supports a brass tube which bends into a depression in the top lip of the glass, produced while hot on the glass blower's pipe. A fabric-wrapped electrical cord suspends a brass socket and light bulb from the tube down within the glass diffuser. The detail in the glass evokes the molten origins of the handblown glass, and the interaction between brass and glass make for a sophisticated light.

Socket: 220-240V G9 3W Max

reflect pendant

from left: shape 1, shape 2 and shape 3
(north american canopies shown in photo)

reflect pendant
CE ENEC CB

The SkLO *reflect* pendants are a series of mirror plated glass pendants in different geometric shapes. The glass is mirrored using a unique process that produces an opaque mirror appearance when the light is off but allows light to pass through when on. Each shape has an open mouth at the bottom – the holes are ground flat and polished. The mirrored glass shades rest atop a disc at the end of the rigid brass stem (not field adjustable). The mirrored glass shades rest atop a disc at the end of the rigid brass stem – light bulbs are accessed by either reaching through the open hole or by carefully raising the glass up over the bulb.

Socket: 220-240V E27 40W Max
Canopy: Brass canopy with exposed fasteners
Pendant suspended from canopy on rigid brass stem (not field adjustable)
Specify overall drop length, see drawing for minimum lengths

twice light

twice light shown with opaque white glass and brushed brass metal finish

twice light
CE ENEC CB

Twice consists of two lit spheres of handblown Czech glass connected by a cylindrical brass armature. Two different diameter spheres make for an asymmetrical light: one sphere is 11cm diameter, the other is 25cm diameter. An 11cm diameter brass ring is included with the light and can be used under the larger sphere to stabilize the light – use of the ring is optional. The glass spheres each feature an off-center double-dipped fire-polished mouth where the piece is broken from the blower’s pipe, making each unique. The central cylinder houses the sockets, with the bulbs accessible by unthreading the glass from the socket.

Sockets: 220-240V G9 3W Max
180cm black fabric-wrapped cord with in-line switch
Bulbs included

Standard metal finishes: dark oxidized / brushed brass (other finishes available on request)
Available in two glass color combinations: all white / two color transparent smoke palette
All glass dimensions are approximate – handblown glass dimensions vary by nature and intent

top: twin 2.0 shown on ceiling with white palette glass and brushed brass metal finish
bottom: twin 2.0 shown on wall with blue palette glass and brushed brass metal finish

twin 2.0 sconce
CE ENEC CB

The twin 2.0 sconce/ceiling is suitable for both wall and ceiling mounting. Featuring a diffuser of handblown Czech glass made up of two flattened spherical shapes, each in a slightly different color, which are melded together while still molten during the glass blowing process. The canopy consists of two rounded solid brass plates layered slightly apart for a dynamic look. The glass is held flush to the outer brass plate by a brass band that sits between the two spheres at the "waist" and fastens to the plate. Each sphere is lit from within by its own light source.

Sockets: 220-240V G9 3W Max
Canopy: Brass canopy
Bulbs included

Standard metal finishes: dark oxidized / brushed brass (other finishes available on request)
Two glass color palettes available
