LYTRO

Lytro Light Field Digital Camera

A new kind of camera, a new kind of creativity

Lytro Looks like no other camera, does what no other camera does. Capture and share what you see in a whole new way. Lytro records the entire light field — all the rays of light traveling in every direction through a scene — instead of a flat 2D image. And that changes everything. By capturing the light field, you can do incredible things. Like refocus pictures after you take them. Tap the touchscreen on whatever part of the picture you want to bring into focus — or, once a picture is imported into your computer, click to refocus. Refocus to discover new elements within the scene and move the picture in any direction to change your perspective. Use Living Filters to create a unique look. Now every picture you take is a chance to tell a new kind of story.

- Import your living pictures to your computer. Then, easily share them to the web, Facebook, Twitter, and more, so your friends can refocus and shift perspective with the pictures.
- Make the impossible possible. Lytro's Perspective Shift allows you to interactively change your point of view in a picture, after you've taken the picture. On a computer or mobile device, you can shift the living picture in any direction; left, right, up, down and all around. Perspective Shift works on light field pictures you've previously taken and with any new pictures you take.
- The anodized aluminum housing makes the camera strong yet lightweight. Easy to hold, precision-tooled silicone enables you to effortlessly shoot with one hand or with two.
- No autofocus means none of the shutter delay that comes with it. Instantly capture a shot before the moment is gone.
- Control most the camera functions with a tap or a swipe. Backlit display lets you compose, review, and refocus your pictures
- 8x optical zoom lens with a constant f/2 aperture offers a wide range of creative shots.
- Manual shutter speed and ISO, lock exposure and ND control. Capture pictures like light painting shots with dramatic refocus and living pictures in motion.
- In Creative Mode, you control the blur in the scene with just a tap. Create amazing pictures like those with refocus between a small flower and a mountain range or along the legs of an ant crawling on the lens. You can also capture high zoom shots and compose dramatic portraits. You'll never look at pictures the same way.
- Play with living pictures with nine interactive filters. Living Filters responds to every click to show off your unique style and imagination. Give an evening shot more drama with the Film Noir filter. Or, use the Carnival filter to let friends twist the scene.
- Free Lytro Mobile App, combined with your camera's Wi-Fi capabilities, makes it possible to share your living pictures directly to Lytro.com and Facebook from your iPhone or iPod touch. DP1 ◆ DP2 ◆ DP3 MERRILL

46-Megapixel Compact Digital Cameras

The Foveon X3 Direct Image Sensor uniquely captures all red, green, and blue (RGB) color information in each pixel location, with three layers. This provides accurately colored and incredibly detailed imagery, with greater three-dimensional depth. Manual Focus is available and nine diaphragm blades provide excellent blurring effects to out-of-focus areas (bokeh) in photographs for a very pleasing aesthetic and style. 3.0" high resolution (921k pixels) LCD lets you quickly change menu options, or review photos after they're taken. Complete manual focus is also available via a focus ring on the lens, just like an SLR camera. They offer up to 4 fps continuous shooting. Otherwise the same, the DP1 offers a 28mm equivalent lens on a 35mm camera, the DP2 a 45mm lens, the DP3 a 75mm lens.

Df DSLR Camera

The Df revolves around a unique manual and mechanical design that champions a simple and intuitive method of working, while offering the highest imaging quality and functionality available. Featuring a full-frame, FX-format 16.3MP CMOS sensor and EXPEED 3 image processor, the Df produces high-resolution, well-detailed still images with exceptional color rendition, tonal gradation, and highlight and shadow detail. ISO 100-12800 can be further expanded to ISO 50-204800 for challenging lighting conditions and a top continuous shooting rate of 5.5 fps aids in working with fast-moving subjects.
The manually-configurable design of the Df blends a timeless control scheme with contemporary precision to enable simple and direct handling of all exposure features of the camera. Utilizing dedicated shutter speed, exposure compensation, ISO sensitivity, exposure mode, and release mode dials, efficient control is possible without needing to delve into a complex menu structure. For viewing, an optical viewfinder and 3.2" 921k-dot LCD monitor are housed within the magnesium alloy body design. When using the LCD for live view shooting, the image can be magnified up to 19x for critical focus and a fast contrast-detection focusing method is used. Both a hot shoe and flash sync terminal are integrated into the body's design, too, as well as a unique mount system that employs a metering coupling lever to enable the use of both AI and non-AI lenses for extensive support of NIKKOR lenses from the past and present.
Accurate exposure metering is done using a 2,016-pixel RGB sensor and Nikon's Scene Recognition System. White balance, autofocus, and i-TTL flash metering also use this system. Additionally, Spot White Balance feature can be used in live view for pin-point selection of a white area within the scene to deliver true color balance. Built-in HDR and Active D-Lighting can be used to extend the dynamic range of a scene and Picture Control settings can be applied to refine the overall look and feel of colors and contrast in-camera.

PENTAX

K-5 IIs Digital SLR Camera

Rugged and durable, yet compact with a magnesium alloy and steel chassis body, the K-5 IIs has a 16.3MP CMOS sensor, 3" LCD (921,000 dots), unique camera controls, and Full HD 1920 x 1080 video at 25 fps with HDMI out. Compatible with every Pentax lens, it features Shake Reduction (SR) stabilization, sensitivity up to ISO 51200 and high-speed shooting up to 7 fps. Weather-sealed and coldproof, it also features 1/8000 sec. shutter speed, in-camera HDR capture, customizable RAW/Fx button and built-in electronic level with tilt scale display. It offers multi-exposure and interval shooting for effects and time-lapse photography as well as image processing and special effects filters. No anti-aliasing filter makes it ideal for photographers who shoot in RAW. **K-5 IIs Body Only** *(PEK5IIS)* **696.95**

K-3

Advanced DSLR featuring a 23.35MP CMOS sensor and PRIME III image processor to produce high-resolution images and full HD 1080i/p video with low-light sensitivity to ISO 51200 and 8.3 fps full-resolution continuous shooting. Anti-aliasing filter can be turned on or off to either garner the highest resolution and sharpness possible or for enhanced protection against moiré. In-camera Shake Reduction image stabilization renders any K-mount lens stabilized and helps to minimize camera shake when working with greater shutter speeds or longer focal lengths. The body incorporates 92 special seals to render it cold, dust, and weather-resistant and the magnesium alloy cover with stainless steel chassis contribute to overall durability and ruggedness. It has a 0.95x optical viewfinder as well as a 3.2" 1,037k-dot LCD monitor. Dual SD card slots e and FLU memory card support enables wireless image transferring and remote camera control possibilities when in use.

Canon

50mm f/1.2L USM

Ideal for low-light photography, the high-performance EF 50mm f/1.2L USM is a standard focal length optic featuring an ultra-large aperture for a narrow depth of field that produces a soft background blur. Its weather-resistant with lens coating and construction that are designed to minimize the ghosting and flare that frequently occur with DSLRs, to deliver superb image resolution and contrast.

CA5012LEF.....**1619.00**

8-15mm f/4.0 L USM Fisheye

Delivers 180° diagonal angle of view images for all EOS SLRs. When used with full-frame cameras you can choose between a circular fisheye image or full-frame image by using the zoom. When used with EOS bodies featuring APS-C or APS-H sensors, the lens produces a more traditional, full frame fisheye view. A zoom-lock mechanism on the lens body allows the range to be limited to the focal length that ensures the best possible full-frame view without unsightly vignetting around the edge. *(CA8154L)*.....**1499.00**

24-70mm f/2.8L II USM

Super UD and two UD lens elements minimize chromatic aberration in the periphery at wide-angle, as well as reducing color blurring around the edges of the subject. Dust sealed and water resistantant, while fluorine coatings on the front and rear lens reduce fingerprints and smearing. A circular 9-blade diaphragm gives beautiful, soft backgrounds. A zoom lock lever locks the zoom position at the wide end for safe transporting while attached to an EOS DSLR camera over the shoulder.

CA247028LII.....**2299.00**

200-400mm f/4L IS USM

High-performance super-telephoto zoom lens with a built-in 1.4x extender. Image Stabilization system offers up to four shutter speed stops of compensation against camera movement. Three IS modes are available, each optimized for your shooting subject. Features fast, quiet AF provided by a ring-type Ultra-Sonic Motor (USM), an internal focusing system and a high-speed CPU.

#CA2004004IS.....**11799.00**

100mm f/2.8L Macro IS USM

Held to a higher level of resolving power and overall construction, this lens eatures Optical Image Stabilization with up to 4-stops of shake control, and a refined Ultrasonic Motor (USM) for quicker and quieter auto-focusing with full-time manual override. It allows for a comfortable, shadow-free shooting distance between the front of the lens barrel and the subject with life-size (1:1) magnification. Optional extension tubes increase this magnification for exceptional close-up detail.

CA10028LMIS.....**1049.00**

17-40mm f/4L USM

Delivers optical performance equal to similar fixed focal length lenses, with silent, high-speed focusing. High-precision molded glass aspherical lens and two replica aspherical lenses achieve the extended zoom range, while also correcting for aberrations that arise during zooming. Super UD (ultra-low dispersion) glass element help eliminate color bleed along the edges of the subject and achieve high image contrast and resolution.

CA17404LEF.....**839.00**

70-200mm f/2.8L IS II USM

Incorporating Canon's second generation two-stage Image Stabilization technology, this telephoto zoom responds in as little as 0.5 seconds, while providing up to three stops of correction for camera shake. Its AF system has been refined for better response time and tracking speed. And even the new 8-blade circular aperture offers a more pleasing out-of-focus image. Constructed to pro standards, this fast zoom is also highly resistant to dust and moisture.

D4s

Full-frame, FX-format 16.2MP CMOS sensor and EXPEED 4 image processor to produce high-resolution stills and full HD 1080p movies. The D4S features ISO 100-25600, that is further expandable to an equivalent ISO 409,600 to benefit working in difficult lighting conditions. It offers full-resolution continuous shooting up to 11 fps for up to 200 frames with maintained auto-exposure and autofocus. Complementing a fast, time-sensitive workflow, the camera also employs numerous strategies designed to benefit fast offloading and transferring of files. Support is available for a 1000 Base-T (Gigabit) wired LAN connection and file recording is possible in a 12-bit RAW SIZE S file size to help expedite post-production. When recording movies or time lapse imagery, optional external recorders can be used to record uncompressed movie files, with simultaneous recording to memory cards and live view monitoring possible.

Records full HD 1080p video at frame rates up to 60 fps. The D4S offers selection from three image area options that respond to imaging intent—FX-based movie format, DX-based movie format, and 1920 x 1080 crop. With recording at a setting of 1920 x 1080 crop, 1920 x 1080p full-HD movies are generated without resizing for stunningly sharp movies. ISO Auto Control is available when working in manual exposure mode as well as real-time adjustable audio settings with enhanced wind noise reduction and selectable frequency ranges such as Wide Range and Voice Range. Record uncompressed video via HDMI to an optional external recorder, plus you can record to memory cards and an external recorder for instant backing up. *(NID4S)*.....**6496.95**

SLT-A58

The SLT-A58 achieves the highest-level of auto focus speed for both still image and movie shooting. Unlike ordinary DSLR cameras, SLT cameras by Sony use Translucent Mirror technology that directs light onto the main image sensor as well as a separate autofocus sensor. This means that subjects stay sharply focused at all times as you compose scenes with the tilt-angle 2.7" 460k-dot Clear Photo LCD or through the high-resolution, high-contrast OLED Tru-Finder (EVF) with 1,440k-dot resolution. And with no moving mirror to slow you down, you'll enjoy non-stop live image preview during speedy burst shooting or while you're recording Full HD video. SLT-A58 features a 20.1 MP Exmor HD APS CMOS sensor, BIONZ processor and wide sensitivity range of ISO 100 to 16000. Record Full HD 1920 x 1080 at 60i and 24p in the AVCHD v2.0 format or at 1080/30p in the MP4 format for uploading to the web.

- Tele-zoom Continuous Advance Priority AE mode with a high-speed burst of 8 fps.
- SteadyShot INSIDE is in-camera, so any compatible A-mount lens can be used in conjunction with the A58 to receive image stabilization benefits.
- Multi Frame noise reduction and Hand-held Twilight mode
- Pick from a palette of 15 artistic 'in-camera' treatments, like Toy Camera, Mono and Partial Color.
- Auto Object Framing judges what's in the scene – one person, two people, even moving objects or macro subjects – tracking, framing and cropping the shot to create powerful, professionally-framed compositions.

SLT-A65V

Steps up from the SLT-A58 with a 24.3MP APS-C sensor, giving you the ability to make huge prints and to experience detail that's absolutely outstanding. It also features an OLED viewfinder, can shoot at 10 fps and records HD movies with full manual control. Built-in flash allows for spur of the moment or snapshot capture, while the integrated hot shoe lets you add on flashes or other flash accessories. Dual media slots help you to shoot longer and provide you with the option of storing two different cards at once. Fill one with Memory Stick media perhaps and the other with SD/SDHC/SDXC cards if you feel like it.

Tilt it up or down to frame high- and low-angle shots, or tilt and swivel over the camera for self-portraits. You can even tilt it up and down when you hold the camera in vertical mode. The monitor folds flush to the camera with the LCD exposed for shooting or protected for travel. In addition to status displays on the LCD monitor and electronic viewfinder, the camera offers a top-mounted LCD with exposure information.

SLT-A99 Full-Frame 24.3MP Camera

35mm full frame camera equipped with Sony's translucent mirror technology, the SLT-A99 can shoot without the delay of a reflex mirror, plus its Dual Autofocus System continuously monitors and alters its focus in real time. 24.3MP full-frame Exmor CMOS sensor lets you capture high quality images in low-light. ISO range of 100 to 25600 with area-specific noise reduction lets you shoot at the higher end of that sensitivity range. 3.0" TruBlack LCD (1,228,000-dots) features Shot Result Preview, for previewing the effects of your camera's settings before the exposure is even captured. It is also able to tilt up to 180° vertically and can rotate up to 270° horizontally. Tru-Finder Electronic Viewfinder features a 1,440K-dot resolution, 100% field of view, and a wide 31.9° viewing angle. Using sensor-shift image stabilization, Sony's SteadyShot technology takes place inside the camera rather than in the lenses you attach. Achieve shake reduction of up to 2.5 to 4.5 stops. Record Full HD 1080p and 24p video while making use of the high-speed Translucent Mirror technology for continuous autofocus, even while using Live View to monitor your shooting.

SIGMA

DG Models ***Optimized for Digital SLR's***

These are large aperture, wide angle lenses with short minimum focusing distances and an abundance of peripheral illumination. While they are ideal lenses for digital SLR cameras, they are also suitable for traditional 35mm SLR's.

DC Models ***For Digital SLR's Only***

These lenses feature an image circle matched to the small sensor found in digital SLR cameras. This method results in a lens ideally suited to digital reproduction with the added bonus of reduced weight.

Tokina

11-16mm f/2.8 AT-X116 Pro DX II

Digital Zoom Lens

Ultra-wide angle lens with a fast f/2.8 aperture for better photography in low-light situations. The lens has a slightly shorter zoom range to maintain optical quality at wide apertures. Tokina's One-touch Focus Clutch Mechanism allows you to switch between AF and MF simply by snapping the focus ring. Water repellent optical coating protects the lens during inclement weather.

LensCoat Lens Covers

Manufactured from 100% closed-cell neoprene, offering protection from bumps, jars, and nicks, with a camouflage-pattern fabric cover. Lens Covers also provide a thermal barrier, protecting your hands from cold lenses in lower temperatures. They are easy to install and remove, leaving no residue on the lens. Moving a big white (or black) lens near skittish wildlife is like waving your arms – a sure way to flush your subject and ruin what could be a once-in-a-lifetime photo opportunity.

M-E Digital Rangefinder Camera

The M-E is a full frame, interchangeable lens camera that embodies the notion that less is more. The camera houses an 18MP full frame (36 x 24 mm) CCD sensor but retains a compact, durable and well-designed form. The sensor matches well with the compact M-system and M-series lenses, giving uniform exposure across the entire sensor. Fast and accurate manual focusing is achieved via the optical viewfinder/rangefinder and the smooth, exact focusing ring of a Leica lens. A 2.5" LCD screen offers clear image playback and menu control. The camera body itself is an all-metal casing made of die-cast magnesium with an attractive anthracite-gray finish and a real leather wrap which provides a good grip as well as good looks. A hot shoe mount is available for optional flash attachment. Body Only *(LEME)* **5450.00**

M7 Series
35mm Rangefinder Camera

Classics are works that clash with the present. They are never modified – instead they are re-interpreted on the basis of a changed world. With the M7, a classic camera has been infused with modern electronic advantages that results in a camera that is faster than ever while still having the soul of a Leica.

- Choose between three viewfinder magnifications: the standard 0.72x, an 0.85x viewfinder magnification for longer focal lengths, and an 0.58x viewfinder magnification for wide-angle.

M Monochrom Digital Camera

A black-and-white version of its M9 full-frame rangefinder, the M-Monochrom has no color filter array in front of the sensor, meaning it captures more of the available light but cannot perceive color. It also means there is no need for demosaicing (the process of combining color information from adjacent pixels), so higher levels of detail are retained. In most other respects, the M-Monochrom is similar to the M9.The camera can add three toning colors to its monchrome output or its uncompressed DNG files can be edited using the included copy of Photoshop Lightroom. A full version of the mono processing software Silver Efex 2 is also included. Body Only *(LEMM)* **7950.00**

M Digital Rangefinder Camera

Compact full-frame (24 x 36mm sensor) digital camera compatible with M-series lenses. 24MP CMOS sensor and Leica Maestro processor produce richly detailed, low-noise images. The M offers rangefinder focusing through the optical viewfinder and Live View focusing and preview on the 3.0" 920,00-dot LCD or an optional electronic viewfinder. The M also records Full HD 1080p video with the "Leica Look" using any Leica M or R mount lens. Shoot your videos in Live View mode to see them exactly as they will appear. A dedicated button will activate video mode in just one touch and manual exposure control allows for custom video capture. Body only In Black *(LEM24B)* or Silver *(LEM24S)* **6950.00**

HASSELBLAD

H5D-40 40-Megapixel Medium Format DSLR Camera

Delivers unsurpassed image quality via powerful features and precision optics. True Focus technology with Absolute Position Lock (APL) allows you to capture close distance shots with a unique yaw sensor to measure angular velocity. The low noise color filter of the H5D-40's sensor provides for increased clarity and increased depth of field. The Natural Color Solution (HNCS) achieves consistent color reproduction using a single color profile, and digital lens correction perfects each image captured through HC/HCD lenses by removing any trace of distortion, vignetting, or chromatic aberrations.

FORMATT HITECH Blender Filters

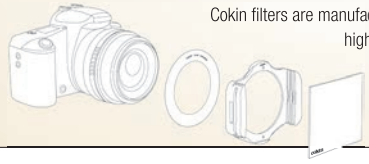

Whether trying to affect color change or enhance a mood, Blenders give you the edge you need. Ideal for outdoor, scenic or architectural photography, Blenders resemble traditional graduated filters except that they are colored on top with a gradual transition to more subtle at the bottom. Graduated filters transition somewhere in the middle of the filter.
Neutral Density filters have several uses and offer the possibility to achieve otherwise unachievable results. They enable the shooter to adjust exposure without affecting color balance.
Available in 77mm-95mm in 0.3, 0.6, 0.9 and 1.2 densities.
Starting at.....**72.00**

cokin

Cokin universal filter holder system allows you to use one of 160 different filters on many different-sized lenses. The filter holder is the key to the system. It is attached to the lens by the adapter ring and takes specially designed round or square filters. There are 4 different series in the Cokin System:

- "A" Series for lens diameters from 36mm to 62mm
- "P" Series for 48mm to 82mm
- "Z-PRO" Series for 49mm to 96mm
- X-PRO Series for up 118mm

Cokin filters are manufactured from CR-39 organic glass which are extra lightweight. They are also highly resistant to shocks, meaning that photographers, videographers and cameramen can handle them in complete confidence and safety. Excellent optical transmission and high compatibility to coloring, make Cokin filters the proven choice of photographers worldwide.

FORMATT HITECH Cool Day For Night Filter

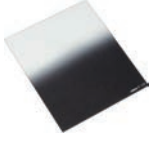

Achieve an evening effect without the added expense of shooting at night. It adds a bluish/lavender effect of low contrast quality.
This filter can be a real time and money-saver since it negates having to retain an entire crew on overtime when the sun is down. It also creates an unusual effect slightly different from traditional filming at night. Some detail will be obscured but the overall night effect is quite pleasing and effective.

Available in 37mm-105mm in 1, 2 or 3 densities.
Starting at.....**67.50**

cokin 121 Graduated ND G2

Often it is necessary or desirable to balance the light intensity in one part of a scene with another. Cokin graduated gray ND filters are part clear, part neutral density. They allow the transition to be lended into the scene, often imperceptibly.

Available in 5 variations of graduation:

Cokin 121 - 2 stop Graduated ND
Cokin 121S - 3 stop Graduated ND (Soft)
Cokin 121F - 3 stop Graduated ND (Full)
Cokin 121L - 2x Graduated ND (Light) (+1-stop)
Cokin 121M - 4x stop Graduated ND (Medium) (+2-stops)

cokin 120 Graduated ND G1

Graduated neutral density filter helps to specifically darken skies and other bright areas of the image. The filter is densest at the edge and tapers to clear by the middle, with a hard-edged line of transition between the density and clear areas. Neutral density filters do not affect the coloration of the image and the 0.5 density provides a 1.6 stop reduction in light from entering the lens.

FORMATT HITECH Multistop Fader Filter

High quality, cost-effective and efficient way to control neutral density effects. This filter is effective when shooting under bright light conditions when you are using high speed ISOs. By rotating the ring on the filter, you can control your exposure up to 8 stops.
Neutral density filters appear gray and have no effect on color although Formatt does not recommend using it above 5 stops where some color cast may be present. This filter is especially valuable to nature and portrait photographers who need control over their depth of field.

Available from 58mm to 82mm, starting at.....**158.50**

cokin 164 Circular Polarizer

A polarizer helps make a blue sky bluer as well as making clouds stand out. It can remove unwanted reflections from non-metallic surfaces such as water or glass and also saturate colors providing better contrast. The effect can be seen through the viewfinder and changed by rotating the filter. The filter factor varies according to how the filter is rotated and its orientation to the sun.

cokin Graduated ND Filter Kit for "P" Series

Consists of three filters: 121L (1 stop), 121M (2 stops) and 121S (3 stops) and a P-Series holder. This kit allows you to slow shutter speeds to record movement in subjects such as waterfalls, clouds, or cars
Decrease depth of field by allowing wider apertures to be used, which helps separate subjects from their background. Allow cine and video cameras (which have fixed shutter speeds) to film subjects such as snow, sand or other bright scenes which could cause overexposure. *(COGNDKP)*.....**82.40**

FORMATT HITECH Graduated ND HD Filters

Formatt Graduated Neutral Density HD filters enable you to adjust exposure without affecting color balance. Exposure can be increased by 1 (ND.3), 2 (ND.6), 3 (ND.6) or 4 (ND1.2) stops to suit individual situations. Also comes in soft or hard edges.
Soft Edge -half clear, half colored with a smooth transition to full density. Generally used with medium to wide angle lenses
Hard Edge - half clear, half colored with a definite less subtle transition. For use with long focal length lenses.

Available in 72mm-105mm in 4 stops, starting at.....**72.00**

Singh-Ray Filters Galen Rowell Soft-Edge Graduated ND Filters

The filter is densest at the edge and tapers to clear by the middle, with a soft-edged transition line between the density and clear areas. By having only a portion of neutral density on the filter, you can selectively darken areas of an image while allowing the portion of the image within the clear section to receive the normal amount of exposure.
Measures 100 x 150mm and is compatible with the Cokin Z-Pro filter holder.
Available in 0.3, 0.6 and 0.9 densities.....**160.00**

Singh-Ray Filters Daryl Benson Reverse Graduated ND Filters

Unique compared to other graduated ND filters in that the density begins in the middle of the filter and tapers off toward the edge of the filter. The density is placed in the middle of the filter in order to help compensate for bright horizons or other circumstances when the brightest part of the image is located in the middle of the frame. Measures 100 x 150mm and is compatible with the Cokin Z-Pro filter holder.

B+W Circular Polarizer MRC Filter

Polarizing filters block the bluish gray veil from the diffusely polarized light of the sky. This results in a noticeable reduction of glare and reflections from non-metallic surfaces and an increase in the saturation of skies and foliage.
Differs from a linear polarizer in that it contains a quarter wave plane in addition to the linear polarizing filter. This addition is to circularly polarize the linearly polarized light for the use of auto focus and exposure functions. Brushed chrome brass filter ring helps to prevent jamming and provides additional strength.

B+W UV Black (403) Filter

Specialized filter used to block visible light while allowing UV A radiation (320-385nm) to pass through. This filter differs significantly to the more well known UV filter, which does the opposite by blocking UV radiation. The filter visibly appears completely black and is used in for applications such as forensic photography, material research, and fluorescence photography. Depending on the illumination and materials being used, the filter factor ranges from 8 to 20 (3 to 4.3 stops).

Available in 37-77mm filter sizes, starting at.....**64.95**

B+W UV 415 Strong Absorbing Filter

Specialized filter for blocking UV radiation up to the limit of visible light. Prevents unsharpness during photography caused by chromatic aberrations due to intense UV lighting situations. Also compensates for the bluish cast of daylight like clear UV filters. It has a filter factor of 1 and requires no additional exposure compensation for normal results.

Available in 37 to 77mm filter sizes, starting at **42.95**

B+W IR Dark Red (092) Filter

Used for infrared photography, this nearly opaque filter blocks all visible light up to 650nm, lets 50% of radiation pass between 650 and 700nm, and more than 90% of radiation pass between 730 and 2000nm. Infrared film sensitivity is rarely greater than 1000nm, so this filter essentially allows most perceivable infrared radiation to be transmitted. The filter factor for this filter is highly variable and depends largely on film sensitivity and lighting conditions.

Available in 30.5 to 77mm, starting at.....**55.95**

B+W 093 (87C) Infrared Filter

Blocks the entire visible spectrum, so to your eyes it looks completely opaque. Unlike the B&W 092 infrared filter, it makes pure infrared photographs possible without the visible red component. This filter uses B+W's F-Pro mount. It also uses an enhanced retaining ring that holds the filter in place from the rear of the filter. This eliminates any chance of damaging the filter from a tight lens hood or additional filter.

Available in 30.5mm to 77mm filter sizes, starting at **55.95**

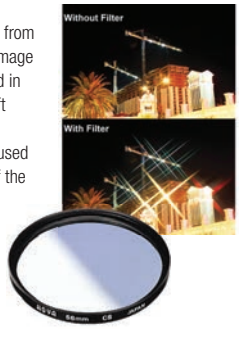

B+W Close-up Lenses

Close-up lenses let you decrease the minimum focus distance on any lens, in turn increasing the effective maximum reproduction ratio of your lens. You can also combine close-up lenses to increase their strength and to fine tune your close-up settings.
Compared to extension tubes, close-up lenses are lighter, smaller and less expensive. They also offer clearly better image quality that can be achieved at reproduction ratios of up to 1:2.5.

B+W Cross Screen 4x, 6x or 8x

These filters provide 4, b or 8 reflected light points stemming from specular highlights within the image frame. When the filter is rotated in front of the lens, the points shift in direction but always reflect symmetrically. This effect is caused by thinly etched lines on one of the planes of the filter. Filters are constructed from optical-grade acrylic and features a brass filter ring for durability as well as jamming prevention.

From 49mm to 77mm in 4x, 6x or 8x, starting at.....**28.00**

B+W Soft Pro Filter

Helps soften and diffuse subject matter while still maintaining a semblance of sharp focus and detail. By combining elements of both sharp and soft focus together the image holds on to its clarity while still providing an ethereal quality. This filter is ideal for use with portraiture, especially in backlit situations or other scenes with lighting present in the image frame.

Available in 37 to 82mm, starting at.....**56.00**

B+W #8 Yellow (022) Filter

TIFFEN Deluxe Enhancing Kit

Contains everything you need to get that special image.
• Ultra Clear is a general purpose, high-quality filter.
• Enhancing Filter improves the color saturation of reds, oranges, and earth-tone colors such as rust, brown and amber.
• Circular Polarizer remove unwanted reflections from non-metallic surfaces such as water or glass, and also saturate colors providing better contrast.
• 812 Filter improves skin tones. Ideal for portraits taken on a cloudy day or outdoors in shade on a sunny day.

Available from 37mm to 82mm, starting at.....**41.95**

TIFFEN 0.9 ND Filter

Solid neutral density filter providing a 3 stop exposure reduction. This 0.9 density creates a darkening of the entire image, allowing you to photograph with a wider aperture or slower shutter speed than normally required. By slowing your exposure time or increasing your aperture, you control depth of field and convey movement more easily.

Available from 37mm to 138mm, starting at.....**9.95**

TIFFEN Graduated 0.6ND Filter

Graduated neutral density filter helps to specifically darken skies and other bright areas of the image. The filter is densest at the edge and tapers to clear by the middle, with a feathered line between the density and clear areas. Neutral density filters do not affect the coloration of the image and the 0.6 density provides a 2 stop reduction in light from entering the lens.

Available from 49mm to 82mm, starting at.....**25.99**

ZEISS Carl Zeiss T* UV Filter

General use, clear filter helps to absorb ultraviolet light and reduce the bluish cast of daylight. No additional coloration or contrast effects are provided, rendering a clean and natural appearance.
The T* anti-reflective coating helps to reduce reflections on the filter's surface and promote a better light transmission for high quality imagery.
The filter ring is designed with a slim profile to allow its use on wide angle lenses, but front filter threads are still available for the use of additional filters.

Available from 49mm to 95mm, starting at.....**44.00**

AFINIA H480 3D Printer

Ready to print out of the box, the H480 comes fully assembled with easy to install software for both the PC and Mac. It can prototype a part or model that is up to 5 inches cubed in dimensions. The output is accurate to within .15mm (6 thousandths of an inch), and has 30% of the strength of injection molded parts. Easy to transport (under 11 lbs), it can also be operated in standalone mode. Once the file is downloaded to the device, the USB connection between the 3D printer and computer can be disconnected – even while printing. The bundled software features an easy-to-use interface for laying out, orienting, duplicating, and scaling parts. The printer uses inexpensive, high-quality ABS plastic filament for 3D printing. *(AFH480)*.....**1599.00**

PIXMA PRO-10 • PIXMA PRO-100

13 x 19" Professional Inkjet Photo Printers

They produce brilliant, gallery-quality prints up to 13 x 19" on a variety of specialty media and fine art papers. They use long-lasting pigment-based or dye-based inks, bringing all the benefits of the commercial print studio to your workspace. Optimum Image Generating System (OIG) analyzes each area of the print and chooses the best ink mixture so you see the colors they way you envisioned. Print Studio Pro2 plug-in software makes it easy to get amazing results from your favorite photo applications. Connections include Wi-Fi, Ethernet, USB. PictBridge and AirPrint. For media support, they feature two paper trays. A rear tray for a variety of fine art and glossy photo papers, and a manual slot for thicker media to meet your printing needs. Last, they can also print onto your printable CD, DVD or Blu-ray Discs and jackets.

Pro-10 (10-Color)

Utilizes a 10-ink tank system with LUCIA pigment-based inks to produce a wide color gamut and exceptional print longevity on fine art and glossy paper. The printer employs three monochrome inks, including Matte Black, to generate deep, dark blacks when using fine art paper. The addition of Chroma Optimizer to the ink system further improves print quality by enhancing the black density when printing on glossy media types.

#CAPP10 ..... **699.00**

Pro-100 (8-Color)

The eight-color, PIXMA PRO-100 utilizes the ChromaLife 100+ dye-based ink system to produce vibrant, saturated colors on fine art and glossy papers. Eight separate ink channels offer a level of color fidelity rivaling that of positive filme. Subtle areas– particularly in areas of low chromaticity– are reproduced with proof-standard accuracy. Three monochrome inks are included to enhance black density and produce accurate prints with smooth tonal gradations.

Hahnemühle
FINEART

The Hahnemuhle paper mill has been producing quality mould made artists papers for over 400 years. Now that tradition of excellence in art materials have been brought to the digital age. The result is the Hahnemuhle collection of Digital Fine Art papers. Designed for discerning users, these grades of Digital Fine Art paper can be used to create limited editions, giclees, original digital art, traditional output, photographic and historic photographs on a choice of paper textures, multiple colors and a huge variety of sheet sizes and weights. These are available in cut sheet sizes of A4, A3, A2 and are compatible with all inkjet printers up to a resolution of 1440 dpi, while printers that feed flat from the bottom and bending the paper up round only being recommended up to 210 gsm. The papers work equally well with both dye and pigmented based inks on a wide variety of printers providing a color intensity and crispness not possible with non-coated art papers. The Hahnemuhle collection is manufactured in the traditional mould-made and fourdrinier techniques that artists value for its unique rich look, feel and texture. Surface coating in combination with the traditional paper base and the right inks will produce sharp, high resolution output with the warmth and quality of the hand generated artwork. In many cases it is difficult to identify the original with the copy.
