

Slim Super Zoom with GPS and high-end picture quality

With a 12.5x zoom lens and a 24-300mm range, this is the perfect camera for those seeking powerful zoom capability in a small high performance compact camera. Featuring the new iHS technology for significantly improved picture quality, super-fast autofocus and camera responsiveness, the SH-25MR further features unique Multi-Recording technology and a GPS facility for geo-located photography.

Features

- Powerful 12.5x super wide-angle to super-telephoto zoom lens**
 With a 24-300mm zoom range, shoot very-wide landscapes or interiors, as well as travel, wildlife or sport action with the same lens. Professional-grade ED (Extra-low Dispersion) glass and proprietary Dual-Sided Aspherical lens elements are utilised in its sophisticated optical design to assure sharp and clear pictures throughout the zoom range.
- New 16MP BSI-CMOS Sensor**
 The new 16MP BSI-CMOS (backside-illuminated CMOS) sensor captures more light with a higher efficiency light path. This means that compared to conventional image sensors, your pictures will have richer colour and detail, with significantly reduced picture noise, even at high ISO settings.
- Super fast autofocus and enhanced camera responsiveness**
 New iHS technology enables a much quicker autofocus with improved accuracy in low-light shooting. Camera responsiveness has been dramatically improved with a rapid start-up speed and quickfire shot to shot speeds. Up to 60* frames per second shooting is possible.
- Twin Image Processors for Multi-Recording capability**
 Capture two image data streams simultaneously from the 16 megapixel sensor. Simultaneously capture a Full HD movie and take full-resolution photos, or two movies simultaneously (e.g., capture wide and close-up views of the same scene), or two still images with different framing, resolutions or properties at the same time.
- 1080P Full-HD video recording in stereo sound with Multi-Motion IS**
 Crystal clear Full HD video recording is enhanced with Multi-motion digital IS that provides for powerful stabilisation that makes stable, handheld movie-capture whilst walking possible. The SH-25MR uses Dual Image Stabilisation (IS) technology (digital stabilisation and ISO enhancement) in stills-shooting to effectively reduce camera-shake even at the full 600mm* zoom setting.
- 3" Touchscreen with 460,000 dot resolution**
 The SH-25MR brings touch-screen convenience with many powerful options. In normal shooting mode, a simple tap of the high-resolution screen focuses the lens at the chosen point in the scene and takes the shot almost immediately. Other applications include LiveGuide touch control and touch-enabled picture playback.

traveller series SH-25MR

Available colours

V107020BA000
BLACK

In the box

SH-25MR Digital Camera
 USB Cable & Charger (F-2AC)
 Audio/Video Cable
 Lithium-Ion Battery (LI-50B)
 Instruction Manual & Software CD
 Strap
 Warranty Card

GPS technology with Electronic Compass

- Fast-response GPS technology with satellite lock in as quick as 10 secs
- Names of 700,000 landmarks in 180 countries around the world are pre-programmed into the camera and are automatically displayed onscreen as you frame your shot.
- A built-in Electronic Compass makes geo-located photography even more precise.

traveller series SH-25MR

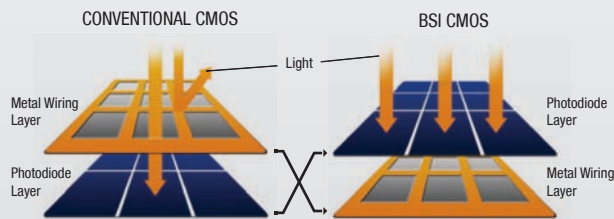

Features

Intelligent High-Speed / High-Sensitivity Technology

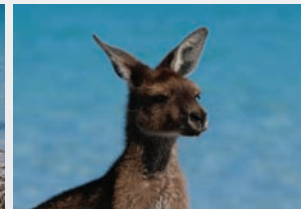

This technology utilises the high drive speed and improved light capture capability of the latest BSI-CMOS sensor to enable much faster auto focusing, data transfer speeds, and high ISO photography with lower noise and enhanced picture quality.

Compared to conventional CMOS, Back Side Illuminated (BSI) sensors capture light more efficiently as light-blocking componentry is removed from the light path. The improved signal levels lead to significant improvements in image quality. Autofocus accuracy is further improved for low light shooting.

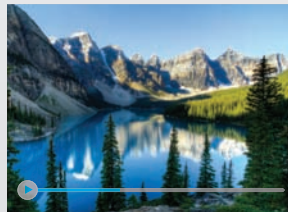

FAST AF

BSI CMOS sensors have twice the refresh rate or drive speed of previous generation sensors enabling the autofocus system to operate much faster, improving overall AF acquisition speed.

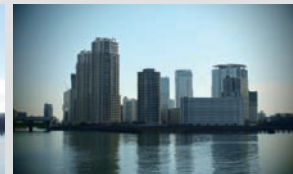

12.5x Ultra-Zoom Wide Angle (24mm equivalent)

The compact large-ratio zoom lens utilises high performance ED glass (Extra-low Dispersion glass) with Olympus' proprietary double-sided aspherical lens technology to enable a stunning zoom range of 24-300mm.

Full HD Movie. A simple, one-touch button allows you to record movies with amazing clarity.

Original ————— Pinhole

Magic Filter Still & Movie. Add style and artistic flair to your photos with 12 Magic Filter effects. Pop Art, Pin Hole, Fisheye, Drawing, Soft Focus, Punk, Sparkle*, Water Colour, Reflection, Miniature, Fragmented*, Dramatic instantly transform ordinary scenes into fun and creative ones. (*exception for movie)
