HOW TO USE THE PUMP-KIT FOR A80

If you need to use your A80 for an extended period of time, you can purchase the pump-kit accessorie.
(article number: 800500)

• Use a hose in size ½".
• Squeeze clamp (17,5) on the cooling adapters.

• Squeece clamp (16,5) on the waterpump.

• Press the cooling adapters into the sockets on the back of the machine, then pull on the hoses to check that they are firmly attached.

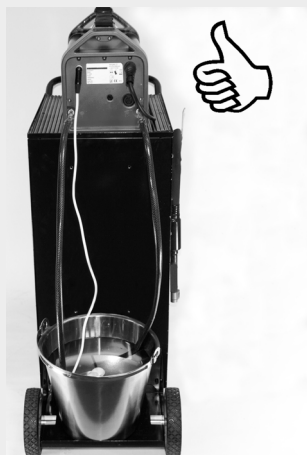

• Plug the connector into the (12V. 0,5A) jack.

• Place the pump in a container of water before the power is switched on.

• Connect A80 to power outlet.

The machine must be on a higher level than the water tank.
