

WORKING SPEEDS

Norton's products are developed and tested for special application areas and working speeds. Select the discs according to the material to be processed. The intended material is evident from the disc's label. Before fitting on machines, check that the machine's speed does not exceed the maximum working speed of the disc.

Disc diameter (mm)	SPEED TABLE ACCORDING TO EN 12413 MAXIMAL WORKING SPEED (RPM)								
	35	40	50	63	80	100	125	140	160
