

## To Remove the Lenses:

**1**

Hold the frame in both hands with the lenses facing out. With thumb on each edge of the frame push the lenses outwards.

**2**

The clips on the bezel of the lenses on either side of the frame should release from the frame.

## To Insert the Lenses:

**1**

Push outside clip on lens bezel into the hole on the frame. Then push the other clip into the corresponding hole on the frame.

**2**

Lenses should fit securely onto frame.
