Parts List		
1	Main Jet	DJ150
1	Main Jet	DJ155
1	Main Jet	DJ160
1	Main Jet	DJ165
1	Main Jet	DJ170
1	Main Jet	DJ175
1	Main Jet	DJ180
1	Main Jet	DJ185
1	Main Jet	DJ190
1	Main Jet	DJ195
1	Fuel Needle	DNO889
1	E-Clip	DE0001
1	Thunder Slide	DTS005
1	Diaphragm Upper Retainer	DTS002
1	Diaphragm Lower Retainer	DTS004
1	Needle Spacer	THNR01
1	Emulsion Tube	DET001
1	Slide Spring	DSP009
1	Plug Drill	DD #5/32
1	Screw	DS0001
1	Diaphragm Instructions	DI8136S

## Installation Instructions

**Dynojet**

**8136.001**

1. Remove the carburetor float bowl. Remove the stock main jet and emulsion tube (Fig. B), sometimes referred to as the main jet holder. Replace the stock emulsion tube with the Dynojet emulsion tube provided (DET001). When the Dynojet tube is fully seated there will still be threads visible. Install the Dynojet main jet provided. Use the DJ160 main jet with a completely stock bike. Use the DJ165 main jet with an aftermarket airbox. With aftermarket airbox and exhaust use the DJ170 main jet. With aftermarket airbox, exhaust and cam use the DJ175 main jet. With extensive engine work ie: cams, pistons, head work, airbox and exhaust, it may be necessary to use the DJ185 main jet.

2. Install the e-clip on groove #6 of the Dynojet needle. Install the Thunderslide, Dynojet needle, needle spacer, white needle retainer and Dynojet slide spring (DSP009) into the carb body (Fig. A).

3. Locate the fuel mixture plug (Fig. B), if you see a screw head at Fig. B proceed to the adjusting procedure. With the 5/32 drill provided, carefully drill through the plug. **NOTE:** The mixture screw is directly underneath this plug, be ready to pull back on the drill the instant you break through. Use screw provided to secure and remove this plug. Carefully turn mixture screw in until lightly seated, then back out 3.5 turns.

# THUNDERSLIDE INSTALLATION INSTRUCTIONS

**DYNOJET**  
D18136S.001

1. Remove the carb top, slide spring, needle retainer, and needle.
2. Carefully remove the original rubber diaphragm from the metal slide by gently pulling at the inner edge of the diaphragm in a circular motion until diaphragm is out of the stock slide retaining groove. The stock rubber diaphragm will be installed on the Thunderslide.
3. To assemble the stock diaphragm on the Thunderslide, first install the larger slide retainer (DTS004) with the radial grooves facing up on to the slide (Fig. A). You will notice that the slide has a collar on the top which you will have to push the larger retainer past.
4. Lay the diaphragm on the lower retainer in the same direction it was on the stock slide.
5. Press the small slide retainer (DTS002) with the grooves facing down, on top of the diaphragm (Fig. A). You should hear a "snap" as it goes together. Make sure it is flat and secure on top of the slide and that the diaphragm is centered.
