

Twin Air Exhaust Plug

NEW
design

Twin Air Exhaust Plug

The newly developed Twin Air Exhaust Plug prevents water and dirt from entering your exhaust during washing and transportation.

Proprietary new softer rubber material featuring fiberglass reinforcement that overlays a durable plastic base. The outer rubber material now floats on the plastic base, allowing you to twist the plug into the exhaust creating a leak proof seal.

Twin Air lanyard attached makes it easy to find and store. Available for 2 or 4 stroke exhaust systems.

Twin Air part numbers:

- 177700NN - Exhaust Plug "Small", Dia 18mm to 40mm
- 177710NN - Exhaust Plug "Large", Dia 27mm to 50mm

How the Twin Air Exhaust Plug works:

1

When inserting the exhaust plug, the black rubber portion will slid towards the handle of the plug creating an air tight seal.

2

When removing the exhaust plug, the black rubber portion will slid towards the smaller end of the plug, making removal easier.
