Help drive the 5G RedCap agenda

Join the GSA 5G RedCap SIG
The benefits of GSA Working Groups

GSA working groups cover Fixed Wireless Access, Spectrum, Standards, Private Networks and 5G RedCap, with new groups agreed on an annual basis.

The GSA 5G RedCap Special Interest Group was established in 2024 to track, report and promote the status of 5G RedCap deployments, devices and service launches globally

Founding members of the 5G RedCap SIG include Ericsson, Huawei, Intel, MediaTek, Qualcomm and VIAVI Solutions and is open to all GSA Executive & Ordinary Members and GSA Associates.

How Working Group membership enhances your organisation

Exclusive insight into 5G RedCap market trends with Member-only research and access to unique resources including the industry's most comprehensive database of RedCap devices and networks.

Collaborate better by working with your industry peers to promote and expand the 5G RedCap ecosystem through events, reports and shared data.

Increase 5G RedCap deployments by sharing best practices in SIG webinars and contributing your insights to GSA publications.

Enquire about joining now

To join the 5G RedCap SIG, companies need to be a GSA Member or Associate subscriber. Cost is £2,950 for the Annual Associate subscription and includes all the benefits as outlined in the GSA Member/Associate benefits document.

For more information on all the GSA SIGs, go to https://gsacom.com/groups/

Access to exclusive 5G RedCap data

34

Operators currently investing in 5G RedCap

24

Modules and end-user devices with 5G RedCap capabilities

6

Chipsets with 5G RedCap capabilities

The new GSA RedCap SIG brings together vendors from across the ecosystem to track and promote the status of RedCap products, features and mobile networks. SIG Partners and Members can promote their RedCap-enabled products via the GSA website and GAMBoD databases, while the GSA Research Team will support the work of the SIG with regular industry reports and webinars on the global status of the technology.

5G RedCap SIG benefits

Track operators' deployment status: Track the latest status of operators' 5G RedCap investments, network deployments and service use cases with the latest data from the GSA Research Team.

Promote your RedCap products and features: Work with the GSA Research Team to have your products included in the GSA's GAMBoD database

Webinars: Participate in SIG events and join operators and industry peers in sharing 5G RedCap network deployment best practices and position your company as a thought leader.

Dedicated Working Groups: Set up and lead working groups to help the SIG deliver against its objectives.

Whitepaper promotion: Promote white papers to the full GSA community of 20,000 subscribers, plus across all GSA social channels.
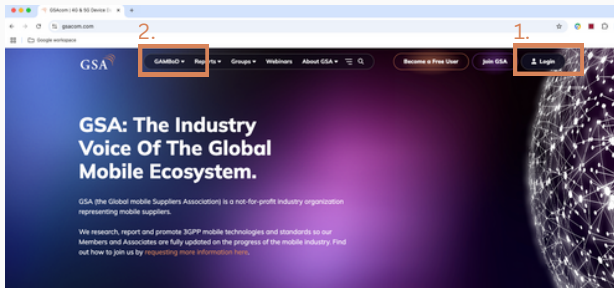

Unlimited access to GAMBoD: To join the 5G RedCap SIG, companies need to be a GSA Member or Associate subscriber, bringing with it unrestricted access to all 7 GAMBoD databases.

GAMBoD 5G RedCap databases

To log into GAMBoD make sure you are first logged in to the GSA website with your business email (1). Then, simply click on the 'GAMBoD' button in the top menu bar to open your dashboard (2).

In your dashboard, you'll see 'Quick start' buttons to launch whichever database you need to use – be it public networks, chipsets or devices (3).

Within each database, you can also save any Searches you make. This means you can easily and quickly see how the global market data is changing direct from your dashboard (4).

Within each database, you see the full dataset and run (and save) your own searches (5).

You can export the results in a table as a .CSV file (6), or download a Pie Chart or Penetration Map of your data as a .PNG file (7).

Include the charts in your own presentations, citing GSA as the source.

Launch GAMBoD now

Simply go to https://gsacom.com/gambod/ and register / login with your pre-authorised business email address.
