AI Scalp & Hair Analysis Solutions

Collaboration partner for skin and scalp analysis and the development of customized cosmetics, with advisory and inspection support from medical experts at **Seoul National University Bundang Hospital**

AISG AI Scalp Grader

Scalp Type / Hair Density / Hair Thickness / Hair Cuticle

AI-powered scalp analysis identifying 10 scalp types and 7 symptoms, with personalized care recommendations. Developed with Seoul National University Bundang Hospital for salons, clinics, and beauty brands.

lilai View

Portable AI Scalp Analyzer

Scalp Type/ Hair Density / Hair Thickness

A compact, portable AI scalp analyzer designed for fast and professional consultations anytime, anywhere.

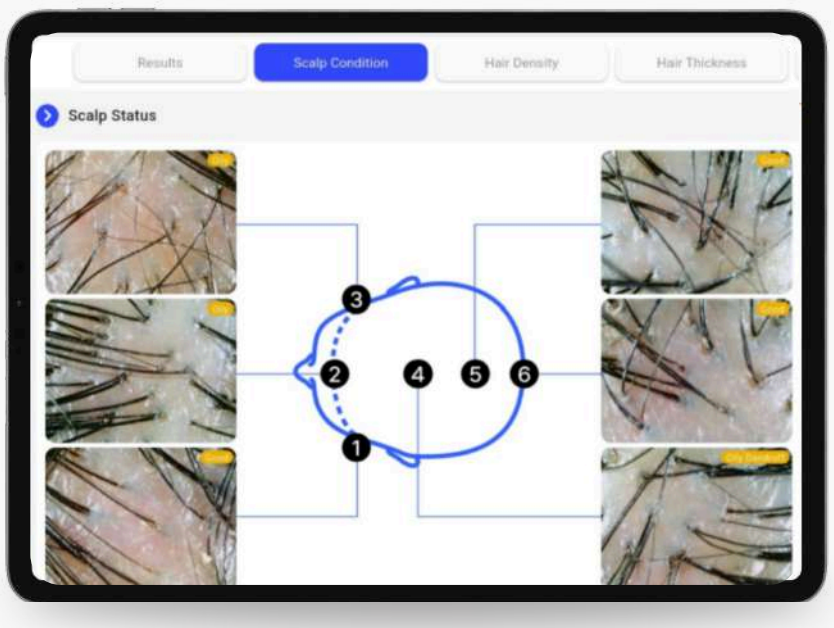

Solutionist Pro

AI Scalp Analysis Software

*Compatible with ASL, API & lilai View

AI-powered scalp analysis software that provides diagnostic results for Scalp Condition, Hair Density, and Hair Thickness, transforming captured images into clear diagnostic insights and personalized care recommendations.

Smart Devices for Every Need

Our Signature Analyzer Series for Skin, Scalp, and Hair Analysis

ASM

An all-in-one Android analyzer with a built-in screen and interchangeable lenses for skin, scalp, hair, and tone analysis. Delivers results in 15–30 seconds with seamless mode switching and screen mirroring.

Moisture & Elasticity/ Sebum(U/T-ZONE)/ Pore/ Melanin/ Acne/ Wrinkle/ Sensitivity

Hair Loss Status / Scalp Status / Hair Density / Keratin of Scalp / Exposure of Scalp's Vessel / Hair Thickness / Hair Pore Status / Hair Cuticle Status

ASL Smart Device

Compatible with Tablet, Mac, and Windows PC

A compact, user-friendly analyzer that connects to smart devices via Wi-Fi. Switchable lenses enable flexible skin, scalp, and hair analysis across multiple devices.

Moisture & Elasticity/ Sebum(U/T-ZONE)/ Pore/ Melanin/ Acne/ Wrinkle/ Sensitivity

Hair Loss Status / Scalp Status / Hair Density / Keratin of Scalp / Exposure of Scalp's Vessel / Hair Thickness / Hair Pore Status / Hair Cuticle Status

API Smart Device

Compatible with Tablet, Mac, and Windows PC

A simple, ergonomic analyzer for professional use, connecting to tablets and PCs via Wi-Fi. Its fixed-magnification lens delivers precise skin, scalp, and hair analysis with easy operation.

Moisture & Elasticity/ Sebum(U/T-ZONE)/ Pore/ Melanin/ Acne/ Wrinkle/ Sensitivity

Hair Loss Status / Scalp Status / Hair Density / Keratin of Scalp / Exposure of Scalp's Vessel / Hair Thickness

APM PRO

Designed for efficient professional consultations, this standalone system combines multi-category analysis, rapid 15–30 second results, and screen mirroring for a streamlined diagnostic workflow.

Moisture & Elasticity/ Sebum(U/T-ZONE)/ Pore/ Melanin/ Acne/ Wrinkle/ Sensitivity

Hair Loss Status / Scalp Status / Hair Density / Keratin of Scalp / Exposure of Scalps' Vessel / Hair Thickness / Hair Pore Status / Hair Cuticle Status

Personalized Beauty Solutions

Personalized beauty solutions combining advanced analysis with customized care, developed with expert support from Seoul National University Bundang Hospital.

lilai Classic

Four Signature Shampoos for Key Scalp Types and a Universal Scalp Serum for All Scalp Types.

Dandruff Type: Effectively removes dandruff while keeping the scalp fresh & clean

Seborrheic Type: Controls excess sebum and helps maintain a non-greasy, balanced scalp condition

Trouble Type: Reduces scalp inflammation to help maintain a smooth and healthy scalp

Hair Loss Type: Enriched with hair growth-boosting ingredients to prevent hair loss and strengthen fine, fragile hair

lilai Solution

Personalized Scalp Care, Made for You

lilai Solution creates personalized shampoo and serum formulas based on a 13-question scalp consultation, complete with a customized product label. No imaging device is required, making it a simple and accessible solution for personalized scalp care.

lilai Pro

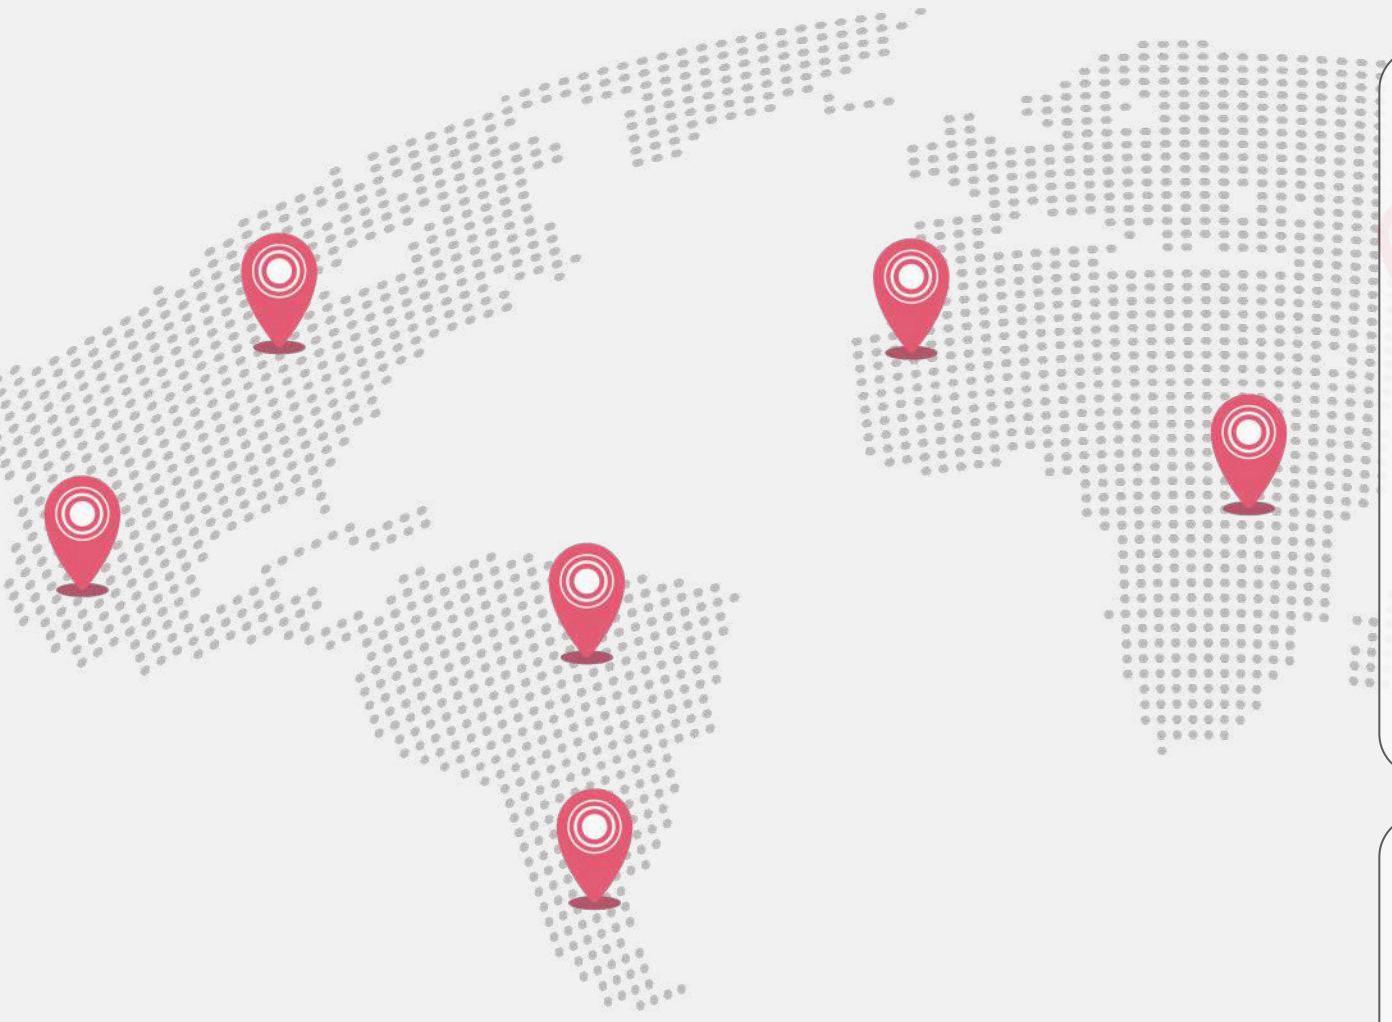

AI-Powered Scalp Care, Precisely Personalized

lilai Pro combines advanced scalp imaging and AI analysis to accurately evaluate scalp conditions and generate a detailed scalp report. Based on the results, it creates highly personalized shampoo and serum formulas with customized product labels for precision scalp care.

Trusted by Experts, Proven by Data
