A Look at TTI's DISC Assessment:
Behavioral Characteristics Page

Behavioral Characteristics

Based on Samuel's responses, the report has selected general statements to provide a broad understanding of his work style. These statements identify the basic natural behavior that he brings to the job. That is, if left on his own, these statements identify HOW HE WOULD CHOOSE TO DO THE JOB. Use the general characteristics to gain a better understanding of Samuel's natural behavior.

Samuel embraces visions not always seen by others. Samuel's creative mind allows him to see the "big picture." He is goal-oriented and driven by results. He is the team member who will try to keep the others on task. Most people see him as a high risk-taker. His view is, "nothing ventured, nothing gained." He prefers an environment with variety and change. He is at his best when many projects are underway at once. Samuel is extremely results-oriented, feeling a sense of urgency to complete projects quickly. He is deadline conscious and becomes irritated if deadlines are delayed or missed. Many people see him as a self-starter dedicated to achieving results. He needs to learn to relax and pace himself. He may expend too much energy trying to control himself and others. Samuel seeks his own solutions to problems. In this way, his independent nature comes into play. He is a goal-oriented individual who believes in harnessing people to achieve goals. He needs people with other strengths on his team.

Samuel will work long hours until a tough problem is solved. After it is solved, Samuel may become bored with any routine work that follows. He likes to make decisions quickly. He is a good problem solver and troubleshooter, always seeking new ways to solve old problems. He prefers authority equal to his responsibility. Samuel is decisive and prefers to work for a decisive manager. He can experience stress if his manager does not possess similar traits. He should realize that at times he needs to think a project through, beginning to end, before starting the project. Sometimes he may be so opinionated about a particular problem that he has difficulty letting others participate in the process. He has the unique ability of tackling tough problems and following them through to a satisfactory conclusion.
