SOLUTION

Common beliefs about
green tech investments
and why they are
misleading

How Green Tech plays a role on our path to zero

Common beliefs about green tech investments

- The considerations and current barriers

ESDs don't
have a
meaningful
impact

ROI is too
long or
doubtful

No/limited
access to
funding

Common beliefs about green tech investments

- The considerations and current barriers

Significant impact
achievable through
ESD combinations

Measurable
ROI's of less
than 2 years

New ways
of funding
on the rise

The background of the image is a dark, swirling green and black pattern, resembling a nebula or a close-up of a planet's surface. On the right side, there is a large, semi-circular graphic element that looks like a stylized 'N' or a globe, with a dark, textured interior and a lighter, swirling green exterior. The NJORD logo is positioned in the upper left corner, rendered in a bold, yellow, sans-serif font.

NJORD

Tailor-made combined
ESD solutions, will
accelerate decarbonisation

www.njordsolution.com

A green tech business, working to accelerate cost-effective greenhouse gas reductions in shipping.

We help owners and charterers across container, bulk, tanker and gas, determine and implement their fleet's saving potential by designing and installing green tech packages.

Extensive knowledge of current and new Energy Saving Devices, and how multiple technologies work in combination with each other.

Powered by:

The way Njord works to help owners and charterers get there...
