Three Leadership questions :

What major changes, if any, has your company made so far to prepare for net zero ? If none or little , how would you explain that to a teenager ?

What are the most inspiring words that you, as a leader of your company, might use today to encourage a new young manager to come into and stay in shipping ?

If you were drafting , for the next incoming chairman of the HKSOA, a 1 minute “elevator pitch” to persuade owners to relocate to Hong Kong what would it be ?

Thank you !
