DNV Revalidation Scheme

After five years, you need to renew your certificate. For this, you will need to follow a refresher training. This includes a theoretical assessment to evaluate your current knowledge. If you pass, your certificate will be extended for another five years.

- To revalidate the DP certificate the DPO will need to:
- 12 months of sea going service in the past 5 years
- Valid STCW certificate
- Minimum 240 DP hours in the past 5 years

Revalidation of an expired DP certificate is possible by completing Start Course Assessment. After this, you will be granted direct access to the Advanced Course
