7.5	Document changes	.12

## 1. Executive Summary

Version 5.3.3 contains improvements to audit logging on referral forms, the addition of a clinical code and comment/note being recorded to the patient record when assigning referral forms, as well as some button removals to tidy up the toolbar.

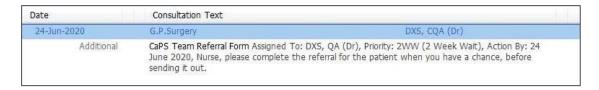

Below you will find a more comprehensive breakdown of the new functionality and fixes introduced by this version.

When a user assigns a referral form to a staff member or staff group, the comment/note
added as well as a clinical code will be recorded to the patient record. This functionality is
available to the user, but it is not compulsory.

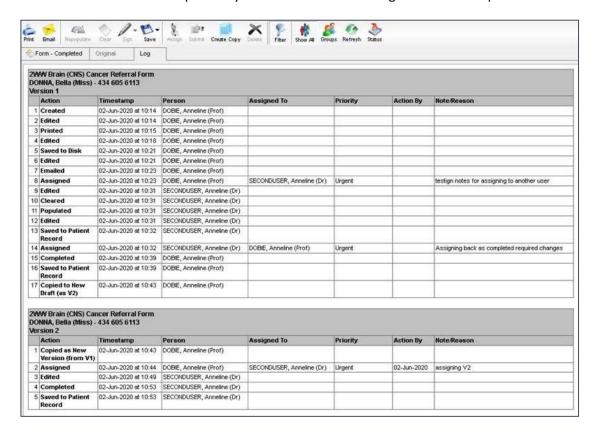

The code that will be recorded to the patient record will be:

- READ2 8W... Referral Statuses (EMIS)
- READ3 XaBhQ Referral Statuses (SystmOne)

 Actions taken on forms are audited and can be viewed by clicking on the 'Log' tab in the 'Forms' section. This will present you with a table containing all actions completed.

 When a form is assigned to a user, the 'Professional' icon on the toolbar will no longer be visible. Instead, a bell icon will appear to indicate that a new form has been assigned to you. This has been changed to align with other notification mechanisms.

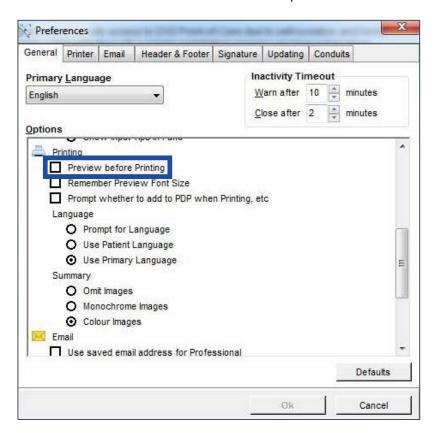

- Some buttons have been removed to tidy up the toolbar and improve overall usability of the
  product. The below screenshots will indicate which buttons have been removed amongst
  other changes.
  - The 'Tools' button has been removed.

- The 'Complete' button has been removed. The button can be added again by ticking the box shown below in the 'Preferences' window.

- 'Print Preview' has been turned off by default; however, it can be turned back on by ticking the box shown below in the 'Preferences' window. This change has been made to reduce the time it takes and the number of clicks to print a referral form.

## 2. Product Description

The DXS Point-of-Care™ product is a content aggregator, which integrates with Electronic Patient Record (EPR) software, ensuring a prime position on the healthcare professional's desktop. This allows content providers to have a direct channel to the healthcare provider during the patient consultations. The DXS product enriches the content with its own relationship-linking process, part of which incorporates the appropriate country-specific diagnostic coding system.

The diagnosis is entered into the EPR and information in DXS Point-of-Care™ relating to that diagnosis is automatically populated for the healthcare provider. The healthcare provider is presented with the specific information related to the patient he or she is consulting, without having to search different databases, which expedites the review.

The DXS Point-of-Care™ product contains clinical data on diseases and procedures as well as patient information on drugs and diseases.

### 3. Releases

Status	Version	Release Date	Database Schema
<b>Current Release</b>	5.3.3	29 June 2020	Version 8 Revision 14
Previous Release	5.3.2.69	24 April 2020	Version 8 Revision 14

### 4. Notes on Deployment

The upgraded files will be released electronically and will be downloaded with the daily content update. Version 5.1.5 onwards has the functionality to automatically update when the clinical system is closed and reopened after receiving the files.

## 5. System Requirements

## 5.1 Recommended Specification

DXS Point-of-Care	Recommended Requirements
Processor	Intel i3 or better
RAM	2GB RAM
Workstation – HDD – Free Space	200MB
Server – HDD – Free Space	4GB (Growth detailed in Operating Environment Guidance document, paragraph 2.5)
Resolution	1280 × 720
Display	32-bit Colour
Operating System	Windows 7, 8, 8.1, 10 supported
Internet Connectivity	Required (HTTP access to uk.dxs- systems.com. HTTP GET and POST Methods allowed)
Internet Speed	5MB (Download), 2MB (Upload) – Please see below for practices that have branch sites

## 5.2 Remote Database Server Specification

The below Internet speeds are our minimum requirements if a branch site connects remotely via a WAN to the same database as the main site.

DXS Point-of-Care	Recommended Requirements
Processor	Intel i3 or better
RAM	2GB RAM
Workstation – HDD – Free Space	200MB
Server – HDD – Free Space	4GB (Growth detailed in Operating Environment Guidance document, paragraph 2.5)
Resolution	1280 × 720
Display	16-bit Colour
Operating System	Windows 7, 8, 8.1, 10 supported
Internet Connectivity	Required (HTTP access to uk.dxs- systems.com. HTTP GET and POST Methods allowed)
Internet Speed	10MB (Download), 10MB (Upload)

# 6. PoC 5.3.3 – General Release

#### 6.1 Introduction

This version contains improvements to audit logging on referral forms, recording all actions done and details thereof. Other minor feature changes and bug fixes have also been made. DXS ExpertCare is supported by this version.

#### 6.2 Enhancements

- 1. A Comment/Note and Clinical Code are now attached to the patient record for associated Form User Assignments.
- 2. The +1 symbol on the Toolbar for newly assigned Forms has been changed to a Bell icon.
- 3. Audit logging has been added to the Log tab of Forms to show all actions completed, when, and by whom.
- 4. Complete button has been removed to clean up the tab for ease of use and user experience.
- 5. Tools button has been removed to tidy up the Toolbar.
- 6. Print Preview has been turned off by default. This can be set back should users choose to.

#### 6.3 Fixes

- 1. TFS-4019 Fix for Groups being seen across multiple practices for the same user.
- 2. TFS-3916 Fix for previous search text remaining in the Toolbar indefinitely.
- 3. TFS-3343 Fix for Consultation Manager crashing in the Vision integration when adding Correspondence Letters.
- 4. TFS-3986 Fix for ExpertCare components not being compatible with the latest version of PoC.

#### 6.4 Known issues

- 1. PRB-18600 PDP Appraisal Summary values slightly difficult to read when using the 'High Contrast' (non-default) Windows theme.
- 2. PRB-18711 Content being cut off from the right side in print. Only a row of pixels is missing, and the text is completely legible. This only impacts SPCs and these are very unlikely to be printed.

### 7.1 Introduction

Version 5.3.2 focuses on improving our Program Upgrade mechanism to help gain full coverage when upgrading our estate to the latest version.

#### 7.2 Enhancements

1. The Program Upgrade mechanism will be able to upgrade its own Service.

#### 7.3 Fixes

- 1. TFS-3616 Fix for mandatory supporting files not being replaceable through Program Upgrades if they are missing.
- 2. TFS-3818 Fix for UTC date and time validation issues when applying upgrades.
- 3. TFS-3859 Fix for program upgrade supporting files being locked by users and preventing workstation upgrades.
- 4. TFS-3931 Fix for MAPI incompatibilities causing Email not to function after Windows OS upgrades.
- 5. TFS-3947 Fix for the blank error received from MS Outlook after an email is sent.
- 6. TFS-3983 Fix for cached datasets not being deleted when the database connection string changes.
- 7. TFS-3988 Fix for Advanced Search methods returning no results in the Education module.
- 8. TFS-3989 Fix for Em Dashes and other symbols not being handled correctly when attaching to the patient record.
- 9. TFS-3992 Fix for the User GMC Number not being populated from EMIS.
- 10. TFS-3994 Fix for new users in TPP being assigned non-clinical roles by default.
- 11. TFS-3995 Fix for duplicate pass-back codes being attached to the patient record in Vision when printing Patient Education leaflets.
- 12. TFS-3996 Fix for Alphabetic Reference View Style not working in the Services module.
- 13. TFS-2304 Fix for external email clients not being recognised on Windows Server OS.

#### 7.4 Known issues

- 1. PRB-18600 PDP Appraisal Summary values slightly difficult to read when using the "High Contrast" (non-default) Windows theme.
- PRB-18711 Content being cut off from the right side in print. Only a row of pixels is missing, and the text is completely legible. This only impacts SPCs and these are very unlikely to be printed.
