Introduction

Our brand guidelines give you a greater understanding of our visual identity and how to make the best use of the Marvel brand.

The following pages describe the elements that make up our visual identity and show how to bring everything together to create a compelling and distinctive brand.

02 Brand Overview

Introduction

Brand Application

Celebrate **simplicity**

It's our mission to create and build a platform that makes design more inclusive and collaborative. Eliminating the complexity of traditional tools and processes makes design more accessible and is why Marvel is loved by its users.

We always look to achieve something with one less click. Our users just want to get stuff done, so let's get out of their way.

This mindset is where Marvel started and has evolved into a core strategic approach, resulting in a platform driven and recognised by simplicity.

Introduction

Brand Overview

Logo

Colours

Typography

Illustration

Photography

Brand Application

Inclusive by design

At Marvel, inclusivity isn't a box ticking exercise. It's our mission with the product.

The more people included in the design process, the better products we'll create. We must create software that is not only accessible to the world, but also representative of it. From illustrations, copy to font sizes and colour.

We are in the amazing position of being able to influence talented designers from some of the most popular products in the world. By leading the way, we can help the industry move forward.

Brand Pillars

Delightful

From our illustrations, to our product interactions and even our tone of voice - we aim to make the Marvel experience one our users will enjoy.

Human Centric

We design with our end-user in mind and are advocates of design thinking, striving for simplicity, good UX and creating an accessible space for design.

Creative

We're a bunch of makers, movers and shakers, striving to ideate, create and build innovative software that stands out from the crowd.

Helpful

Whether it's a support ticket, an enquiry about the product or a contributor writing for our blog - it's our goal to create and maintain a supportive design community.

03

Marvel Logo

Our logo

Our logo is a handdrawn logotype that, like our company, is **friendly, fun yet professional** with lots of personality and energy. The Marvel type also has a stand-alone “M” character for smaller display usage.

Our symbol and wordmark are bold and strong enough to be used individually, but generally speaking, **our logo should only be used in it's extended form.**

The image shows the word "Marvel" in a vibrant blue, hand-drawn script font. The letters are thick and fluid, with a casual, energetic feel. A thick, curved blue underline sweeps beneath the word, starting from the bottom of the 'M' and ending under the 'l'. The entire logo is set against a plain white background.

Extended logo

This is our extended logo. It's clean, bold and friendly. This is the official and only version of the logo and it should never be locked together with our symbol.

Symbol

This is our 'M' symbol. It must be used as a standalone symbol without our wordmark only on really small sizes where the extended logo would be illegible.

Brand Application

Illustration Principles

We don't want any part in perpetuating the narrative that what makes a human, well human, is being a western male. Our aim is to broaden our worldview and uplevel inclusivity. Please refer to these basic principles when creating new illustration work.

Embrace differences

Accurately represent different races, ages, abilities, and body types.

Keep it real

Cast characters who aren't all white men, and reference photos for every person drawn

Be Specific

Make characters specific, rather than generic – think about their clothing, facial features, body types, and so on.

Reflect everyone

Consider all types of diversity, including the disabled community who makes up 15% of the world's population.

Make it delightful

We don't like to take ourselves too seriously, and we love to reflect that in our illustrations.

Together it's easier

We like to portray that when we work together, anything is achievable.

Introduction

Style Technique

Marvel's illustration style is comprised of filled and outlined shapes combined with simplified textured brushes.

Mixed Style

We normally mix filled and outlined shapes to make our illustrations more vibrant.

Grain Brush

We use a grain brush to create a sense of depth on our illustrations.

07

Photography

Photography

We use photography to showcase Marvel being used in our customer's everyday working life.

Embracing and capturing what it's like to work for a company through photography is at the core of our style. We aim to demonstrate their company culture in the most vivid and visual way possible.

Ask yourself questions like: What are the working days like? How does Marvel enhance productivity and collaboration between their employees? What is their downtime like?

It's best to avoid staged pictures as we prefer our imagery to look and feel natural along with representing diversity.

Introduction

Brand Overview

Embrace differences

Accurately represent different races, ages, abilities, and body types.

Together it's easier

We like to portray that when we work together, anything is achievable.

Make it look real

Make sure you capture people acting natural and not posing in front of the camera

Mix people and devices

Pictures are more effective if they bring across the idea of productivity - make sure you showcase Marvel being used.

08 Brand Application

Brand Application

We use Graphic Elements to frame and support product visuals, inject brand voice, and create continuity throughout all of our brand's touchpoints. Here are our guidelines for best practice.

The image displays a video player interface. On the left, a list of recordings is shown:

- Recording by Dan Smith (02:12)
- Recording by Edward Ross (02:12)
- Recording by Xiu Lee (02:12)

The central video player shows a website with the heading "Discover a new way of delivering emails." and a "Get started" button. The website also features a navigation bar with "HOME", "PLANS", "TOUR", and "SHOP", and a footer with "HELP", "LOGIN", "SIGNUP", and social media icons. A progress bar at the bottom of the video player indicates the current position in the video.

On the right, a "Hit Goal" indicator shows a progress bar at 43% completion, with a green circle icon and the text "Hit Goal 43%".

Brand Application

Overview

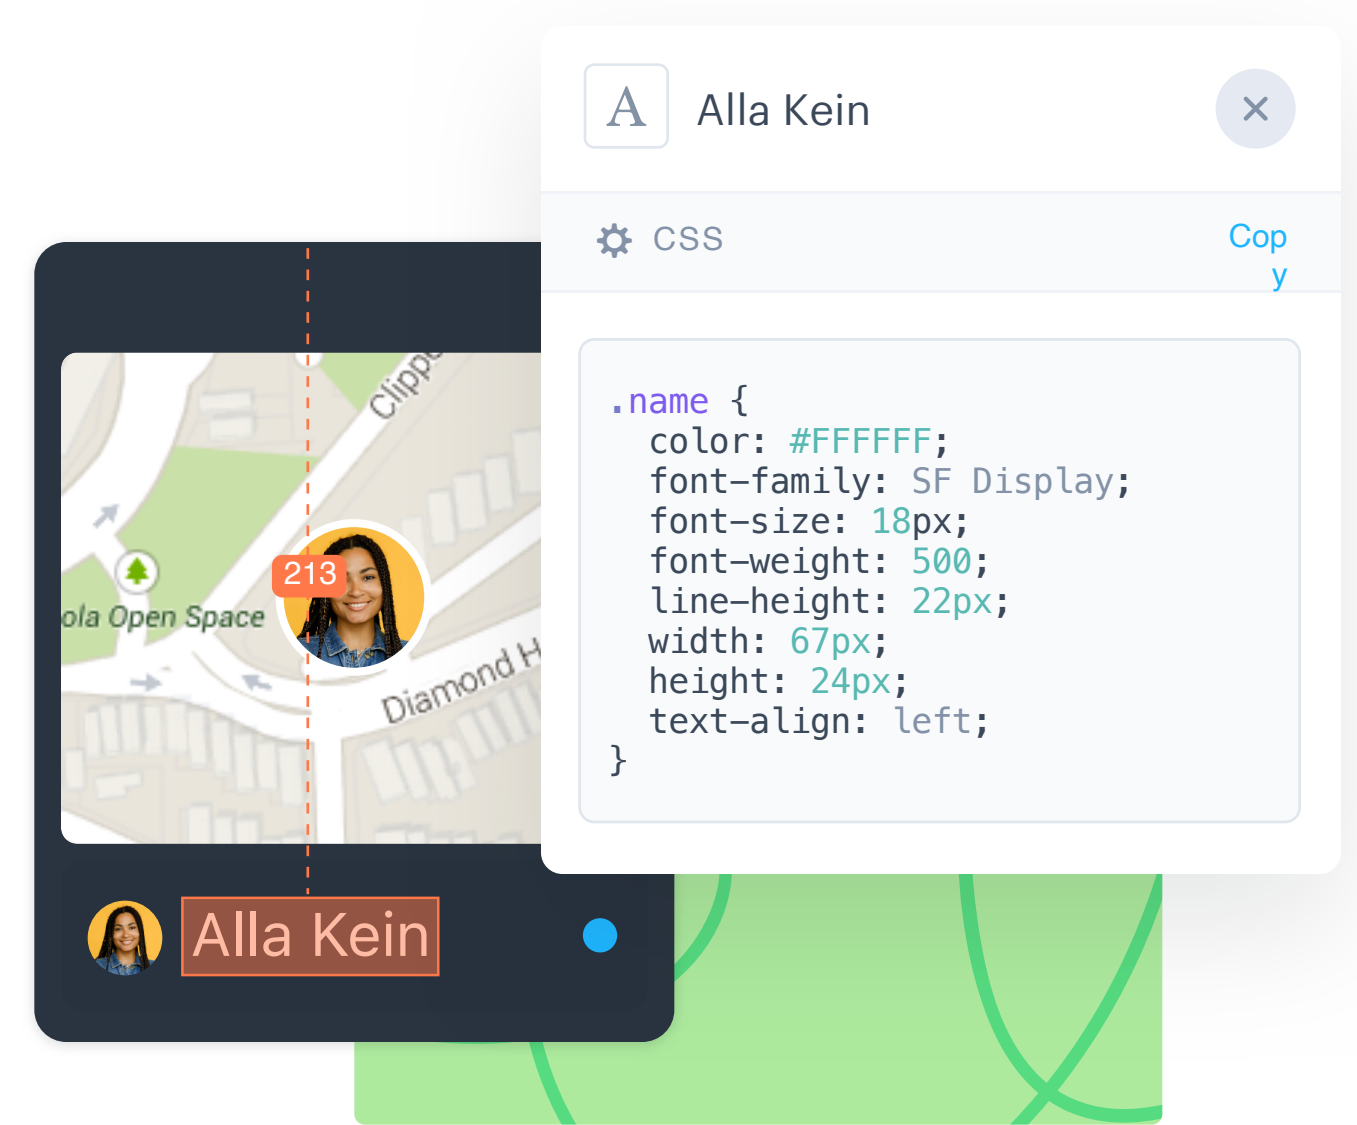

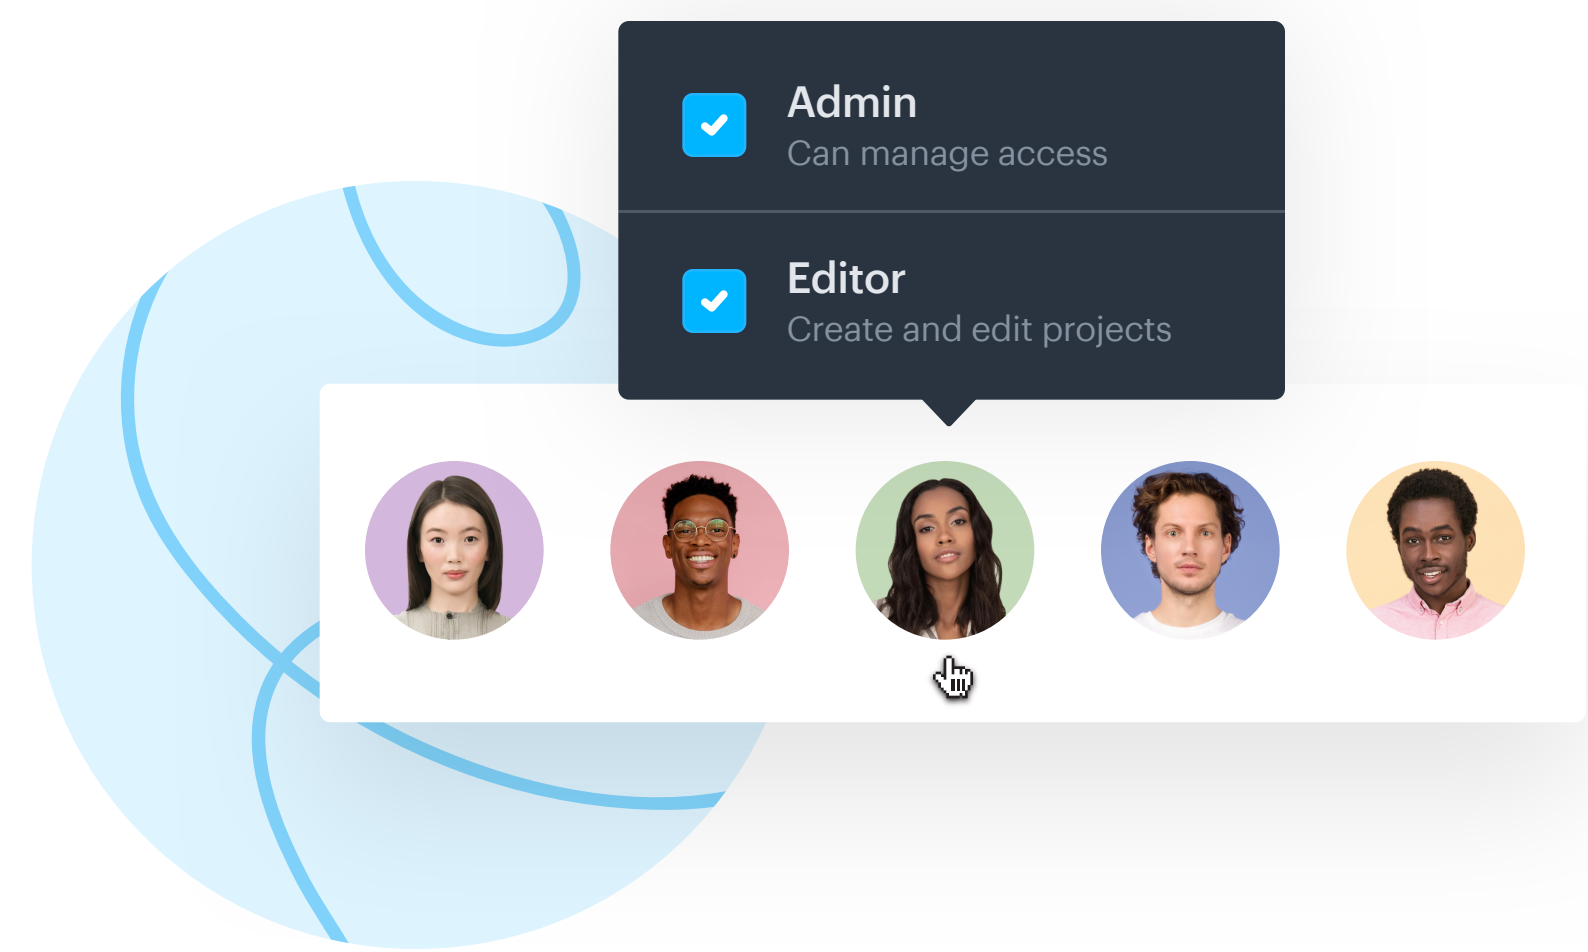

Best Practice

Patterns

Bringing it to life

Simplicity is key

Don't pile on too many elements, patterns or harsh shadows - try instead to maintain the overall “flat” style. Use simple elements to compose artwork that can represent what the supporting text is narrating.

Make it inclusive

Our goal is to represent the change we want to see in the world. Make sure you choose a varied range of ages, genders, races and body types and pay attention to roles or order of appearance you assign.

Introduction

Brand Overview

Logo

Colours

Patterns

Bringing it to life

Pale geometrical shapes help frame and set the stage for product visuals. The Product UI is contained within **overlapping shapes** and it’s often “abstracted” in order to transcend devices and build a story that communicates the selling points of what is representing.

Please note:

Where possible, do not frame the product visuals within specific devices as it could suggest that a feature is only available for Mobile or Web expeirence.

Bridge communication gaps with clients

Client work should be an ongoing collaborative process, but often feedback can get lost in email chains or left undeciphered in meeting notes. Marvel's commenting features mean both your team and your external stakeholders can leave annotated notes across designs - so feedback is clear, documented and all in one place. Our dedicated 'External Reviewer' role sets restrictions on access, without exclusion.

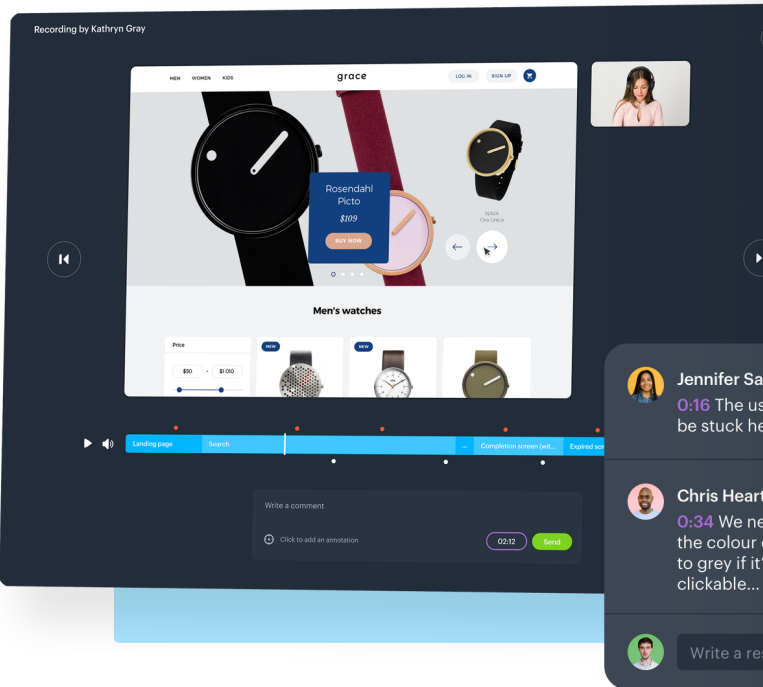

[Request a demo](#)

Speed up time to sign off

We know it can be difficult to get the right people in the same room at the same time. With Marvel, you can share prototypes and design work with a simple and secure URL. Clients and teams can quickly leave feedback through comments and annotations directly on designs to move projects to sign off fast.

[Request a demo](#)

Test work with internal and external stakeholders

Every product or feature is designed with a goal in mind that you want the end-user to achieve. Marvel helps you hit that goal through our User Testing tools where you can improve the experience for your clients end-users or customers. Gather audio, visual and analytical data on prototypes to guide your iterations and create a fantastic user experience.

[Request a demo](#)

[Why Marvel](#) [Enterprise](#) [Pricing](#) [Sign in](#) [Sign up](#)

MARVEL FOR AGENCIES

Deliver world class design to your clients, in record time

In design, good client relationships can steer and streamline success. However, delivering the best client experience from brief to sign off can be tricky, whether that's due to lack of collaborative tools, design understanding or tight deadlines.

With Marvel, design teams can present low fidelity and hi fidelity prototypes to clients either on the big screen or quickly shared via URL to any device. The platform's seamless collaboration tools drive powerful client communication that helps you achieve more, faster.

[Request a demo](#)

Join these leading agencies who use **Marvel Enterprise** to scale design

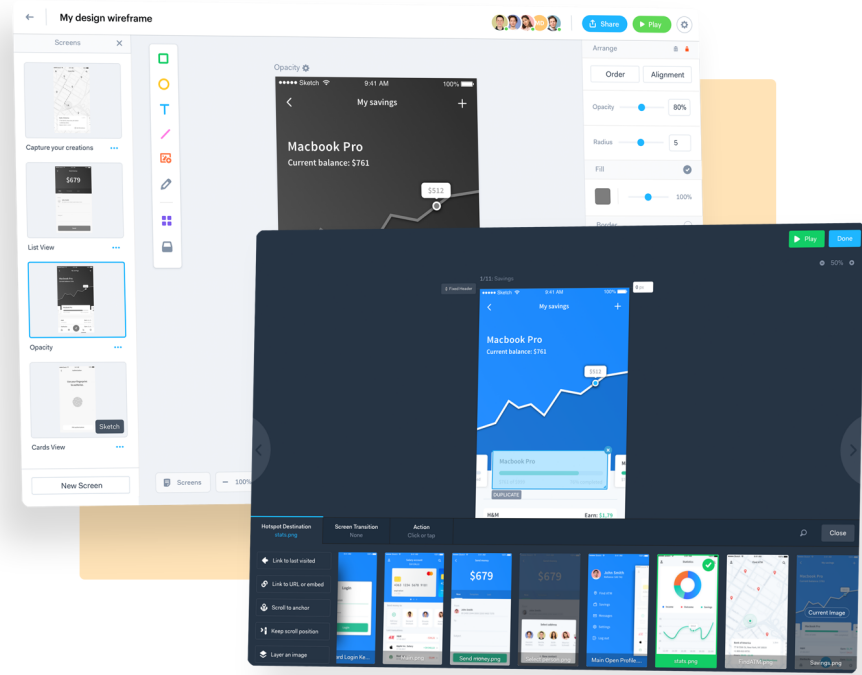

Democratise design by giving every team access to the right tools

From designers to researchers and analysts, Marvel consolidates and simplifies dozens of professional, creative workflow tools - enabling every department to wireframe, design and prototype.

We strive to lower the entry barrier for design and creative tooling. That's why it takes less than 30 minutes to onboard and complete your first project with Marvel. With no learning curve, our platform empowers every team to drive a design-led culture.

Capture user feedback through video and audio

Whether you're running an in-person user interview or a remote usability test, you can create goals for your customers to complete and easily record their screen, audio or video while they use your prototype. Ensuring you don't miss any feedback.

Get real-time insights into how your designs perform

Event tracking and insights allow you to quickly see which users had issues and surface designs that perform better. Eliminate guesswork and understand your users better than ever before.

Collaborate with your team on results

Share your team and stakeholders to view and feedback on results. Highlight any issues and points of interest with stamped annotations and solve problems by jumping into development.
