

FELLOWSHIP IN INTERNAL MEDICINE

About Us

Medvarsity Online is Asia`s largest healthcare Ed-Tech company, with over 2 lakh medical professionals trained and certified. Our partnerships with leading universities globally enable us to present the best courses and faculty to our students and help them meet their learning goals. Medvarsity is on a mission to bridge the gap of skilled medical professionals with over 150 courses in clinical & management areas for doctors, nurses, and general management personnel, covering specialties like Diabetes, Emergency Medicine, Cardiology, Nutrition, Wellness, Healthcare Informatics, Mental Health & more, with all the content being up-to-date.

Medvarsity has presence across 10 locations in India and students across India, Middle East, Africa, and South-East Asia. Our blended training solutions combine the best of traditional e-learning, live virtual classes, clinical bedside learning, mobile learning models to deliver impactful courses to our students.

Course Overview

The Fellowship in Internal Medicine aims to create doctors with specific professional capabilities required to manage patients presenting with a broad range of medical symptoms and conditions in the Internal Medicine department. Doctors trained in this course can be entrusted to undertake the role of a resident in Internal Medicine departments in secondary and tertiary care hospitals. The of the course will cover the theoretical concepts relevant to various presentations and conditions seen in Internal Medicine by system/ specialty and the six-month training period in the Internal Medicine department of a tertiary care hospital.

Course Objectives

By the end of this course, the student must be able to:

- Acquire knowledge of the fundamentals of internal medicine including basic sciences and pathophysiologic principles underlying manifestations of various disease conditions.
- Enumerate appropriate differential diagnosis depending on history, physical examination findings and results from laboratory & diagnostic tests.
- Formulate a management (diagnostic and therapeutic) plan for the patient, based on the clinical information.
- Develop management plans of acute medical cases in internal medicine.
- Describe the management and prevention of chronic diseases.
- Perform complete and comprehensive assessment of patients in the given time-frame in OP and IP settings.
- Demonstrate the proficient and appropriate use of procedural skills, both diagnostic and therapeutic.
- Communicate efficiently with the patient, their attendants (relatives) and other health care professionals.
