

Medvarsity

A photograph of a woman with long dark hair and glasses, wearing a white lab coat over a pink shirt. She has a stethoscope around her neck and is looking directly at the camera. In the background, another woman in a blue lab coat is smiling, and a man in a white lab coat is partially visible. The image is framed by orange and dark blue curved borders.

ADVANCED CERTIFICATE IN CRITICAL CARE MEDICINE EDITION II

About Us

Medvarsity Online is Asia's largest healthcare Ed-Tech company, with over 2 lakh medical professionals trained and certified. Our partnerships with renowned medical professionals enable us to present the best courses to our students and help them to meet their learning goals. Medvarsity aims to offer a comprehensive online educational platform for medical and healthcare professionals to continue their education.

With more than 150 courses in clinical & management areas for doctors, nurses, and general management personnel, we bring to you updated content carefully curated to meet your educational needs. We cover specialties such as Diabetes, Emergency Medicine, Cardiology, Nutrition, Wellness, Healthcare Informatics, and Mental Health. The courses are exclusively designed by the doctors, for the doctors. Our mission is to empower medical practitioners with knowledge and experiences they need to meet the challenges of today and prepare for a better tomorrow.

The non-clinical courses are designed by highly experienced medical experts. **With over 15,000 active learners on our platform and course accreditation by leading global partners,** Medvarsity is the leading online medical certification and training company in the region. Medvarsity has a global presence and students across India, Middle East, Africa, and South-East Asia.

Our blended training solutions combine the best of traditional e-learning, live virtual classes, clinical bedside learning, and mobile learning models to deliver impactful courses to our students.

Medvarsity has been awarded with '**excellence in training and development**' in online education in the year 2018. Medvarsity's vision to "**Impact Healthcare Through Education**" is led by a team of 180 professionals including doctors, management professionals, designers, storytellers, and technologists.

Course Overview:

Due to the rise in the aging population in India, the requirement of ICU beds in hospitals is also skyrocketing. Healthcare professionals may have the knowledge of managing critically-ill patients, but if they are the primary care providers then, they also need to have procedural and technical skills to handle ICU equipment. This is really crucial at the time of emergencies when primary care physicians and nurses need to work swiftly in a short period of time.

The Advanced Certificate in Critical Care Medicine online course gives an overview of working in an ICU and understanding the functions of the devices used there. Emergencies at hospitals can arrive at any moment and they must be prepared with skilled personnels in the ICU. This course prepares medical professionals to handle such situations and act accordingly.

This is the second level of the fellowship program and provides extensive knowledge on the procedural aspects of critical care medicine.

Highlights

- Gain clinical competencies such as airway management, ventilator support, respiratory procedures and more.
- Webinars by experts sharing real life critical cases.
- Certified by Medvarsity and Apollo Hospitals Educational & Research Foundation (AHERF).
- Video lectures by leading faculty members Dr. Sai Praveen Haranath and Dr. Srinivas Samavedam, they are also the course directors.

Eligibility

- Students who have completed “Certificate in Critical Care Medicine”.
- MBBS graduates and interns.

Training and Learning Methodology

Online Learning:

This is a 3-month online certificate course. An account will be created on the online learning management system exclusively for the learner to access the course content. Students can access the course at any time and from anywhere. The online content will be in the form of e-books, PowerPoint presentations, case studies, and video lectures.

Duration

3 months

Assessment:

- Online assessment based on case studies at the end of the course.

Certification:

A certificate will be provided at each level after successful completion of the course and assessments.

Live Virtual Classes (Webinars):

Webinars are conducted to provide an interactive learning environment. Learners can gain insights on latest medical developments, guidelines and real case scenarios by the experts in the field. This also gives a chance to the students to interact with the faculty and discuss their doubts for a better understanding.
