

Masterclass in Digital Health

About Us:

Medvarsity Online is Asia`s largest healthcare Ed-Tech company, with over 2 lakh medical professionals trained and certified. Our partnerships with renowned medical professionals enable us to present the best courses to our students and help them to meet their learning goals. Medvarsity aims to offer a comprehensive online educational platform for medical and healthcare professionals to continue their education.

With more than 150 courses in clinical & management areas for doctors, nurses, and general management personnel, we bring to you updated content carefully curated to meet your educational needs. We cover specialties such as Diabetes, Emergency Medicine, Cardiology, Nutrition, Wellness, Healthcare Informatics, and Mental Health. The courses are exclusively designed by the doctors, for the doctors. Our mission is to empower medical practitioners with knowledge and experiences they need to meet the challenges of today and prepare for a better tomorrow.

The non-clinical courses are designed by highly experienced medical experts. **With over 15,000 active learners on our platform and course accreditation by leading global partners,** Medvarsity is the leading online medical certification and training company in the region. Medvarsity has a global presence and students across India, Middle East, Africa, and South-East Asia.

Our blended training solutions combine the best of traditional e-learning, live virtual classes, clinical bedside learning, and mobile learning models to deliver impactful courses to our students.

Medvarsity has been awarded with **‘excellence in training and development’** in online education in the year 2018.

Medvarsity`s vision to **“Impact Healthcare Through Education”** is led by a team of 180 professionals including doctors, management professionals, designers, storytellers, and technologists.

Course Director:

Mr. Arvind Sivaramakrishnan

Course Director
CIO, Apollo, Chennai

Course Overview:

The Masterclass in Digital Health offers an in-depth understanding of how technology can be used to transform the field of healthcare. The current healthcare crisis has prompted a dramatic change in the field of medicine. The need for updated technology in the healthcare sector is constantly increasing. This program will be beneficial for anyone who wants to understand what digital healthcare is, its benefits, and how they can implement it in their healthcare organisation.

As healthcare goes digital, the demand for professionals who can understand and implement health data has increased considerably. This course is an overview of how this technological evolution is revolutionizing healthcare, patient care, data visualization, and interpretation. Masterclass in Digital Health consists of 3 levels, each offering a unique opportunity to learn various aspects of Digital Health principles.

Course Highlights:

- The Masterclass in Digital Health course is designed by leading experts in digital health and management.
- For a practical experience, learners will take projects under the guidance of the industry stalwarts from **CHiME India**.
- Learn from experienced faculty and course director **Mr. Arvind Sivaramakrishnan**. Get access to global case studies for in-depth understanding in Digital Health.

Course Outline:

Level 1: Certificate in Digital Health

First level of the Masterclass in Digital Health deals with the policies and the application of digital health in various institutions.

Level 2: Advanced Certificate in Digital Health

The second level discusses globally recognized standards in the field of Digital Health along with its pros and cons. It involves a case study approach for better understanding. The course is useful for students looking for career opportunities in Hospital Management.

Level 3: Fellowship in Digital Health

The final level of this Masterclass involves an in-depth understanding of Ethics and Privacy in the field of Digital Health. It provides opportunities to learn system design and analysis along with project ownership experience in Digital health.

Eligibility: Graduates in any discipline are eligible.

Duration: 6 months

Assessment:

This is an online course and assessments will be done through online tests. There will be an assessment after each level.

Certification:

All interested candidates after successful completion of the Certificate in Digital Health will be eligible for the Advanced Certificate in Digital Health. After completion of these two courses, they will be eligible for Fellowship in Digital Health.

Training and Learning Methodology:

- **Learning Methodology:**

The Masterclass in Digital Health equips learners with the knowledge required to get the best of the technology in the healthcare sector. Through online education, case studies and project experience, learners can gain both theoretical and practical knowledge. With this combination of learning and innovative training, people with the interest in Digital Health can benefit from this course and develop these highly sought after skills.

- **Assessment & Certification:**

There are three levels of this Masterclass. Students will get a certificate after each level. On completion of the first level, the student will be awarded the Certificate in Digital Health. This will make the student eligible to pursue the next two courses on Digital Health, the Advanced Certificate on Digital Health and the Fellowship on Digital Health. After completion of the final project students will be awarded the Fellowship. The entire course is certified by the CHiME India.

- **Project:**

Students get a chance to experience a live project in Digital Health under the guidance of industry experts. The final level of this masterclass includes the project and is mandatory to complete it in order to achieve the fellowship. With this practical knowledge learners can get exposure to various aspects of Digital Health functionalities and its application in different sectors.

- **Career Opportunities:**

As the healthcare system is shifting towards a digital health ecosystem, the biggest challenge is the lack of appropriately skilled professionals. Having completed this course, learners can gain a wide range of career prospects in the healthcare and medical sector. Potential careers could be designers, data analysts, application, systems developer, project manager, hospital managers and more in the field of healthcare.
