5,00,000+ medical professionals trained and certified

COURSES

200+ courses in clinical, management and administration

PARTNERS

Global universities and industry leaders

PRESENCE

Students and partners from 190+ countries

MASTER CLASS IN FAMILY MEDICINE WITH AMERICAN CLINICAL ROTATIONS

The Masterclass in Family Medicine is a 12-month integrated course with a 4-week clinical rotation in the United States. It is designed by eminent faculties in the field of family medicine. Family physicians are in charge of the patient as a whole and ensure comprehensive patient care. They understand the patient in the context of both the family and the community. The family physician coordinates the treatments given by different specialists and can provide a 'single window clearance' for all healthcare needs of an individual, thereby improving trust in the doctor.

The Masterclass in Family Medicine is accredited by the Academy of Family Physicians of India (AFPI). All successful students will be awarded a lifetime membership of AFPI, granting them access to the AFPI network and their knowledge base.

Learning complex medical concepts in the traditional didactic textbook and lecture format can be alienating for students. It prevents the opportunity to apply this knowledge clinically. Masterclass in Family Medicine course is designed on Medvarsity's Learning Framework to address this gap in medical education.

The 4-week rotation in the US familiarizes an International Medical Graduate with the practice of medicine in an American clinical setting and provides international students an introduction to American Medicine as they will experience it in a hospital-based residency program.

This program benefits medical students/doctors applying to residency programs in the United States, providing excellent clinical experience and an overview of the US healthcare system. Accepted students are encouraged to explore their areas of interest in ongoing research and initiatives through recent publications or specific projects. Both the doctor and the student collaborate to pursue suitable research projects tailored especially to individual interests during the program.

At the end of each rotation, the supervising physician will provide you with feedback based on a standardized American Medical Association (AMA) clinical evaluation format. A complimentary review and critique of your resume and personal statement, including tips and suggestions for improvements, will be provided. Based on the performance your preceptor will write you a letter to support your goal of achieving a residency.
