

Agile Project Management

15 Credits

150 Notional Hours

15 weeks

10 hours per week

Learn how Agile methodologies enable organisations to deliver digital projects more effectively in fast-changing business environments. In this microcredential, you will explore Agile principles and frameworks such as Scrum, Kanban, and Lean, while developing practical skills in Agile planning, stakeholder collaboration, and iterative project delivery. You'll also discover how Digital Business Analysts contribute to Agile teams by supporting communication, facilitating collaboration, and ensuring that digital solutions align with both business objectives and user needs.

Skills you will develop

- Agile planning and prioritisation
- Adaptive problem-solving
- Time management
- Team engagement
- Collaboration

What you will learn

- Introduction to Agile Project Management
- Agile Frameworks – Scrum, Kanban and Lean
- Agile Planning – Sprints, Backlogs and Prioritisation
- Managing Agile Projects and Continuous Delivery
- Human-Centred Agile Teams and Stakeholder Collaboration
- Agile Project Management in Digital Transformation

Who this course is for

This microcredential is designed for aspiring or early-career Digital Business Analysts, as well as professionals working in business, operations, IT, or digital environments who want to understand how Agile methodologies support successful digital projects. It is also well suited to anyone interested in improving collaboration, responding to change, and contributing to Agile teams that deliver value through iterative project delivery. No prior experience in Agile project management is required. This microcredential forms part of the **Higher Certificate in Digital Business Analysis** (NQF Level 5). Learners who successfully complete the microcredential will receive **advanced standing towards the full qualification** when they enrol, enabling them to accumulate credits progressively while building practical, job-ready skills.

Learning Outcomes

- Understand the principles and values of Agile project management.
- Differentiate between various Agile methodologies, such as Scrum, Kanban, and Lean.
- Apply Agile practices to manage digital projects effectively.
- Develop Agile project plans, including sprints and backlogs.
- Incorporate human-centric practices into Agile to improve team collaboration and stakeholder satisfaction.

All learning material and prescribed textbooks included.

The Agile Project Management microcredential (15 credits, NQF Level 5) is a formally approved component of the SAQA-registered (Higher Certificate in Digital Business Analysis – SAQA ID 125619), while not registered independently on the NQF, the credits awarded derive from and contribute toward the registered qualification in accordance with HEQSF and CHE requirements.

Masterstart Institute (Pty) Ltd is registered with the Department of Higher Education and Training (DHET) as a Private Higher Education Institution under the provisions of the Higher Education Act (Act No. 101 of 1997), as amended, under Registration Number 2026/HE07/001.
