# AC Triac RF + Push Dimmer

Model No.: S1-B

RF dimming/Leading edge or trailing edge/Min brightness settable/Push Dim/Wall box inserted

## **Features**

- RF + Push AC phase-cut dimmer, 1 channel output.
- To dim and switch single color dimmable LED lamps, traditional incandescent and halogen lights.
- Leading edge dimming or trailing edge dimming set by dip switch.
- Min brightness can be set by key.
- Compatibility with Skydance's 2.4G dimming remote control.
- Connect with external push switch to achieve on/off and dimming function.
- Easy to be inserted into standard 86\*86mm wall box.

CE RoHS [emc] LVD

## **Technical Parameters**

Input and Output		
Input voltage	AC100-240V	
Output voltage	AC100-240V	
Output current	Max 1A	
Output power	100-240W	
	100 240 / /	

Safety and EMC		
EMC standard (EMC)	EN 55015:2013 EN 61547:2009 EN 61000-3-2:2014 EN 61000-3-3:2013	
Safety standard(LVD)	EN 61347-2-11:2002 EN 61347-1:2015 EN 62493:2015	
Certification	CE,EMC,LVD	

Dimming data		
Input signal	RF 2.4GHz + Push Dim	
RF Control distance	30m	
Dimming level	256 levels	
Dimming range	O - 1 OO%	

Environment	
Operation temperature	Ta:-30°C ~ +55°C
Case temperature (Max.)	Tc:+85°C
IP rating	IP20

Warranty	
Warranty	5 years

## Mechanical Structures and Installations

# The unit can easily be placed in a junction box behind a pushbutton.

# Wiring diagram

Caution: Please carefully ensure all wire connections and polarities are correct and secure before applying power, otherwise this controller will be damaged.

Dimmable LED light

Connect with dimmable LED light

Note: When calculating the maximum number of load lamps or drivers, the input power or input current parameters of a single lamp or driver must be used, the output power parameters can not be used, otherwise, the product will be overloaded and damaged.

# Leading edge or trailing edge dimming setting

Select leading edge(forward-phase) dimmer or trailing edge(reverse-phase) dimmer according to dimmable LED light or driver.

## Forward-phase control dimmer(TRIAC)

#### Reverse-phase control dimmer

Caution: before power on, you must confirm the selection of dip switch.

## Min brightness setting

Long press Min set key for 2s, the light blink 2 times, ready for min brightness set, then short press Min set key 1-6 times, to get 6 min brightness: 5%, 10%, 15%, 20%, 25% or 30%, the light will output the current min brightness immediately,

Long press Min set key for 2s or wait 8s, quit min brightness set, the light will output 100% brightness automatically.

# Match Remote Control (two match ways)

End user can choose the suitable match/delete ways. Two options are offered for selection:

## Use the controller's Match key

## Match:

Short press match key, immediately press on/off key (single zone remote) or zone key (multiple zone remote) of the remote.

#### Delete:

Press and hold match key for 5s to delete all match, The light blinks 5 times means all matched remotes were deleted.

#### Use Power Restart

## Match:

Switch off the power, then switch on power again, immediately short press on/off key (single zone remote) or zone key (multiple zone remote) 3 times on the remote. The light blinks 3 times means match is successful.

#### Delete:

Switch off the power, then switch on power again, immediately short press on/off key (single zone remote) or zone key (multiple zone remote) 5 times on the remote. The light blinks 5 times means all matched remotes were deleted.

# Application notes

## 1. All the receivers in the same zone.

**Auto-transmitting:** One receiver can transmit the signals from the remote to another receiver within 30m, as long as there is a receiver within 30m, the remote control distance can be limitless.

**Auto-synchronization:** Multiple receivers within 30m distance can work synchronously when they are controlled by the same remote.

Receiver placement may offer up to 30m communication distance. However, we recommend for indoor applications that receiver placements should be no further apart than 15m.

## 2. Each receiver(one or more) in a different zone, like zone 1, 2, 3 or 4.

## **Push Dim Function**

## • Short press:

Turn on or off light.

## • Long press (1-6s):

Press and hold to step-less dimming,

With every other long press, the light level goes to the opposite direction.

## • Dimming memory:

Light returns to the previous dimming level when switched off and on again, even at power failure.

# Malfunctions analysis & troubleshooting

Malfunctions	Causes	Troubleshooting
No light	<ol> <li>No power.</li> <li>Wrong connection or insecure.</li> </ol>	<ol> <li>Check the power.</li> <li>Check the connection.</li> </ol>
No response from the remote	The battery has no power.     Beyond controllable distance.     The controller did not match the remote.	Replace battery.     Reduce remote distance.     Re-match the remote.
