1. Product Introduction

1.1. Product Overview

Aqara Vibration Sensor is embedded with a high precision acceleration sensor and it detects the vibration and movement of objects. It communicates with the Hub via Zigbee protocol. It also works with other smart accessories to set various smart scenes, such as, local and remote alarm when it detects glass breaks.

*A compatible hub is required.

*Aqara Hub is required to enable Aqara Vibration Sensor to work with HomeKit technology.

See www.aqara.com for more details.

*This product is for indoor use only.

1.2. Product Photo

1.3. Selling points

Detects vibration and movement;

Smart home automation;

It alarms and sends notifications to your phone when it detects glass breaks;

Three adjustable sensitivity level;

No wiring required, peel and stick;

Battery last about 2 years.

2. Product Specs

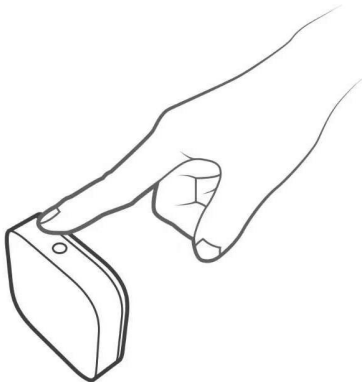

No.	Item	Description	Remark
1	Brand	Aqara	
2	Name	Vibration Sensor	
3	Model	DJT11LM	
4	Battery	CR2032	
5	Wireless protocol	Zigbee	
6	Operating Frequency	2.4GHz	
7	Transmit Power	10dbm	
8	Size	36×36×9 mm	
9	Net weight	11.5g	
10	Packaging size	90×70×50 mm	
11	Carton size	415×410×292 mm	
12	Gross weight	55.5g	

13	Qty/ctn	100	
14	Operating temperature	-10°C ~ +50°C	
15	Operating humidity	0 ~ 95% RH, Non-condensing	

3. Product Set-up

3.1. How to connect

Long press the reset button for 5 seconds until the blue indication light blinks 3 times.

4. Certifications and test
