

Cricut Design Space Storyboard

On-screen media	On-screen text	Audio	Notes
White background with black font for title	How to upload a personal svg image to use in Cricut Design Space with an Explore Air 2 cutting machine.		Play an upbeat song throughout intro and fade it out as voice-over begins.
CDS Home Screen		In this video, you will learn how to upload and use a personal svg file (maybe something you purchased on Etsy or downloaded on line) in Cricut Design Space. Before we begin, you will want to make sure you know where you saved your file! After logging in or opening CDS, click the dropdown menu icon and choose canvas.	Have cursor highlighted so it is spotlighted throughout video. Zoom in and show the mouse clicking on the drop down icon and then clicking on Canvas. Insert a click sound effect and magnifying glass tool *cursor effects and zoom in on hamburger menu - scale up in animations and then scale down before moving on.
Canvas Grid		To upload your image, click the upload button located on the options menu.	Zoom in on and show the mouse clicking on the upload button.
Upload page		Next, click the upload image button	
Drag/Drop Screen		You can choose to drag and drop your file or you can click on the browse button. Let's look at both ways.	
File folder screen will lead to the file showing up on the prepare to upload page		First, click on the file folder icon to select the folder where your file is saved. Here is the file I've saved. Now I'm simply going to drag it to the gray drag and drop area which will lead to the prepare to upload page. But I also want to show how you can access the file by clicking the browse button, so I'm going to click the back button over here to bring me back to the previous screen.

File folder screen will lead to the file showing up on the prepare to upload page		Once you've clicked on the browse button, your file folder will automatically open for you. Double click on the file you plan to use. Now, you'll see the image on the prepare to upload screen.	
Prepare to upload page		Once I'm sure this is the image I want to use, I will come over here to the green upload button and click that.	
Upload page		You are now at the upload page and can see that your image uploaded successfully. Select your image and then click on "add to canvas" button.	
Grid page with object on it.		Your image will show up on the grid page and from here you will be free to create your project!	Fade out music
